6. To launch the email application, press the corresponding key.
7. To place the PC in standby mode, use the standby key.
8. To launch the calculator, press the calculator key.

FAQ

Q: What is Unifying and how can I pair my device(s) via Unifying?
A: Unifying is a feature that allows you to pair multiple devices with a single receiver. To pair your device(s) via Unifying:
1. Ensure your Unifying receiver is plugged in.
2. Start the Unifying software by navigating to Start / All Programs / Logitech / Unifying / Logitech Unifying Software and follow the onscreen instructions to pair the new wireless device with your existing Unifying receiver.

Q: How many devices can I connect using Unifying?
A: You can connect up to six devices using Unifying, allowing you to build your ideal combo and use only one USB port for multiple devices.

Logitech® Wireless Keyboard K270

K270

Instruction

Features

1. Play/pause
2. Mute volume
3. Decrease volume
4. Increase volume
5. Navigate to Internet home
6. Launch email application
7. Place PC in standby mode
8. Launch calculator

Plug it. Forget it. Add to it.
Your new Logitech product ships with a Logitech® Unifying receiver. Did you know you can add a compatible Logitech wireless device that uses the same receiver as your current Logitech Unifying product?

Are you Unifying-ready?
If you have a Logitech wireless device that's Unifying-ready, you can pair it with additional Unifying devices. Just look for the orange Unifying logo on the new device or its packaging. Build your ideal combo. Add something. Replace something. It's easy, and you'll use only one USB port for up to six devices.

Getting started is easy

If you're ready to pair your device(s) via Unifying, here's what you need to do:

1. Make sure your Unifying receiver is plugged in.
2. If you haven't already, download the Logitech® Unifying software from **www.logitech.com/unifying**.
3. Start the Unifying software* and follow the onscreen instructions to pair the new wireless device with your existing Unifying receiver.

*Go to Start / All Programs / Logitech / Unifying / Logitech Unifying Software

Help with setup

- Is the keyboard powered on?
- Is the Unifying receiver securely plugged into a computer USB port? Try changing USB ports.
- If the Unifying receiver is plugged into a USB hub, try plugging it directly into a USB port on your computer.
- Did you pull the battery tab? Check the orientation of the batteries inside the keyboard, or replace the two AAA alkaline batteries.
- Remove metallic objects between the keyboard and its Unifying receiver.
- Try moving the Unifying receiver to a USB port closer to the keyboard, or go to **www.logitech.com/usbextender** for a USB extender that will allow the receiver to be placed closer to the keyboard.
- Try reconnecting the keyboard and Unifying receiver using the Logitech Unifying software (Refer to the Unifying section in this guide.)

What do you think?
