**logitech**

**logitech M350 Portable Mouse**

## Product Information

A portable mouse is a device that uses a USB receiver and Bluetooth technology to connect to devices with a built-in screen. It is designed to provide users, especially those with disabilities, with more control in navigating the cursor on their device. The Logitech Pebble M350 Portable Mouse is a compact and lightweight mouse that offers convenience and ease of use.

## Product Usage Instructions

### Power button:

1. Locate the power button on the bottom of the mouse.
2. Slide the power button up to turn on the mouse.

**USB Receiver:** There are two ways to connect the mouse to your device: USB Receiver or Bluetooth.

## USB Receiver System Requirement

### To connect using the USB receiver:

- 1. Remove the top part of the mouse to access the USB receiver located inside.
- 2. Extract the USB receiver from the mouse.
- 3. Insert the USB receiver into your device's USB port.

## Bluetooth

### Bluetooth System Requirement:

- 1. Long-press (three seconds) the Bluetooth power button located on the bottom of the mouse. The LED should blink blue rapidly.
- 2. Go to your device's settings, select "Connected Devices," choose "Pair New Devices," and select "Logitech Pebble M350."
- 3. To check if your device was successfully paired, go to "Currently Connected," and the name of the mouse should appear.

To disconnect the mouse from the device, short-press (one second) the Bluetooth power button. The Logitech Pebble M350 Portable Mouse does not need to be charged. It uses one AA battery, which is pre-installed. To preserve battery life, remember to switch off the power button when the mouse is not in use. Need help with using the Pebble Portable mouse? Call MLBPD at (586) 286-1580 or email us at [mlbpd@cmpl.org](mailto:mlbpd@cmpl.org). Please include your name, phone number, and the tech issue you need help with.

## Getting Started

### Portable Mouse: Getting Started

The power button is located on the bottom of the mouse. Slide the power button up to turn on the mouse.

## USB Receiver

### Portable Mouse: USB Receiver

There are two ways to connect the mouse to your device, USB Receiver or Bluetooth.

### USB Receiver System Requirement

- USB Port
- Windows 8, 10, 11 or later

- Mac 10.15 or later
- ChromeOS, Certified Works with Chromebook
- Linux Kernel

The USB Receiver is located inside the mouse. To extract the USB receiver from the mouse, you will need to remove the top part of the mouse. The USB receiver is located inside the mouse next to the AA battery. Once the USB receiver is removed, you will need to insert it into your device's USB port.

## Bluetooth

**Portable Mouse:** Bluetooth

### Bluetooth System Requirement

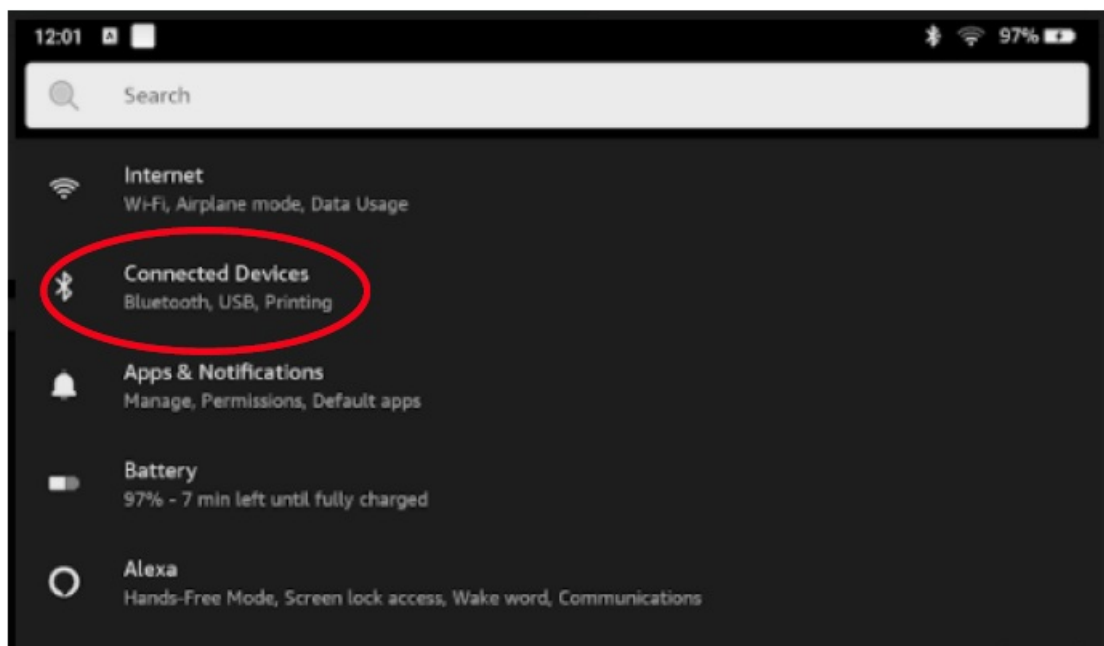

- Bluetooth Low Energy Technology
- Windows 8, 10, 11 or later
- Mac 10.15 or later
- iPadOS 14 or later
- ChromeOS
- Android 8 or later.

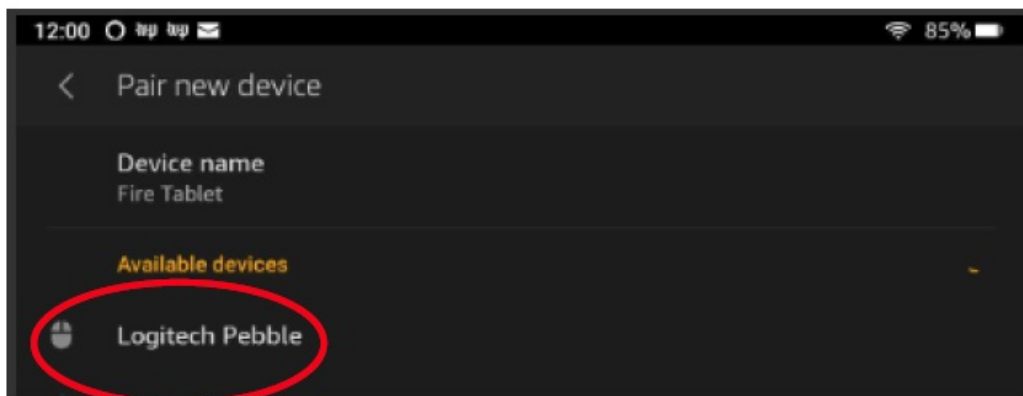

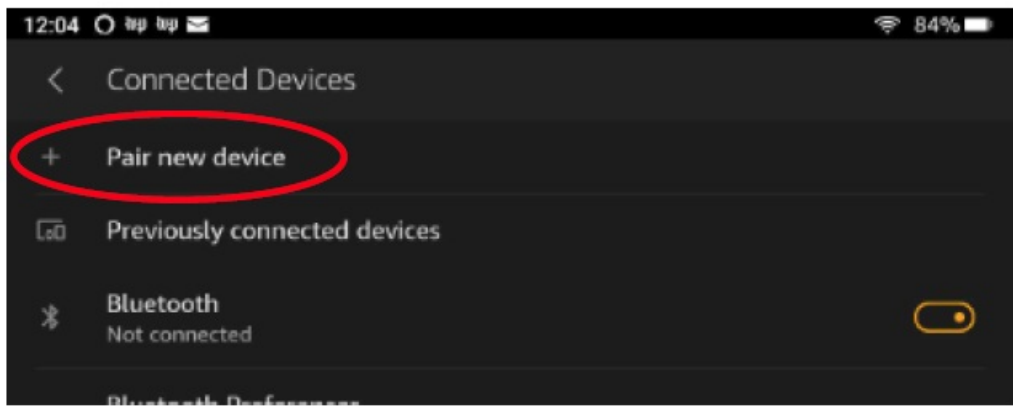

To connect and pair Logitech Pebble M350 to another device using Bluetooth:

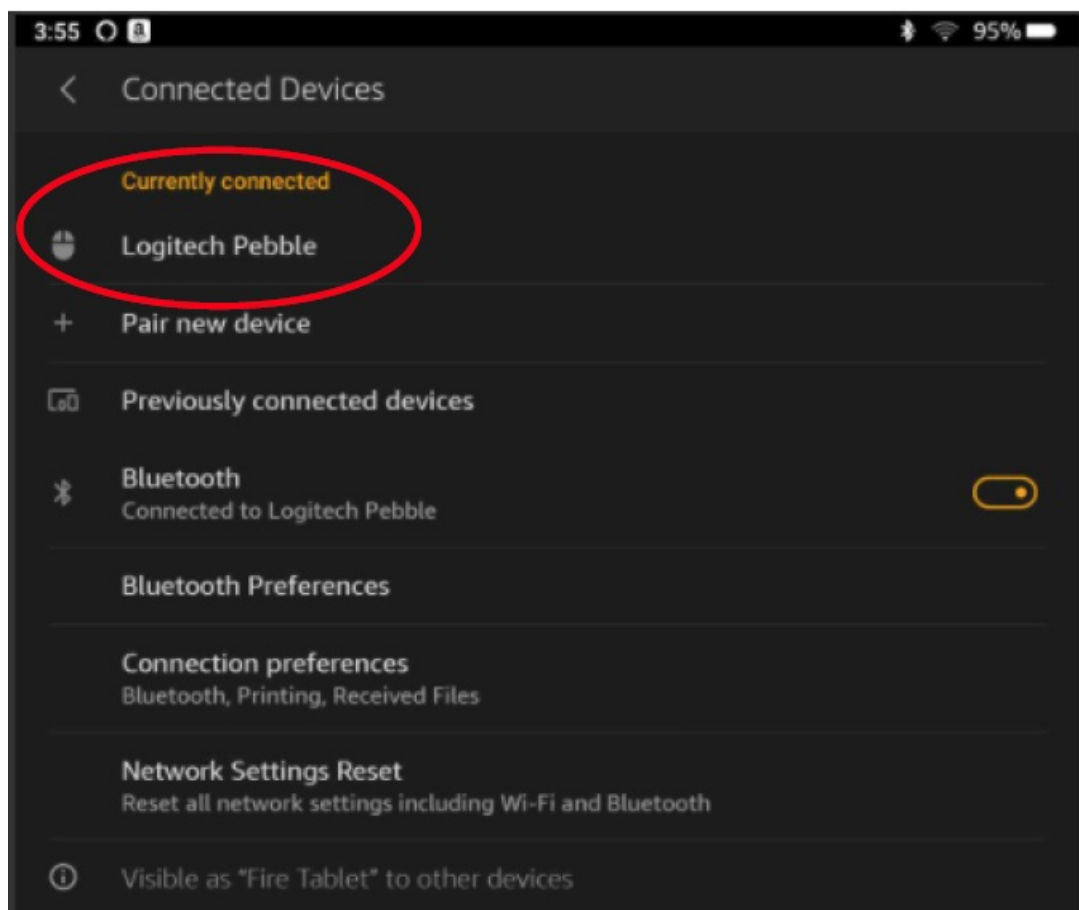

**Bluetooth Power Button**

1. Long-press (three seconds) the Bluetooth power button located on the bottom of the mouse. The LED should blink blue rapidly.
2. Go to your device's settings—select Connected Devices—select Pair New Devices—and select Logitech Pebble M350.

To check if your device was successfully paired to the mouse, go to Currently Connected and the name of the mouse should appear

Short-press (one second) the Bluetooth power button to disconnect the mouse from the device. The Pebble portable mouse does not need to be charged. It uses one AA battery which is pre-installed. To reserve the battery life, the power button needs to be switched to off when not in use. Need help with using the Pebble Portable mouse? Call MLBPD at (586) 286-1580 or email us at [mlbpd@cmpl.org](mailto:mlbpd@cmpl.org). Include your name, phone number, and the tech issue you need help with. "Funding is provided in part by the Institute of Museum and Library Services through the Library of Michigan."

### What is a Portable Mouse?

A portable mouse uses a USB receiver and Bluetooth technology to connect to devices with a built-in screen. People with disabilities may find it challenging using touch screen gestures and keyboard commands to interact with information on their screen. The portable mouse gives users more control in navigating the cursor on their device.
