3. Volume Up
4. Print screen
5. Pause break
6. Context menu
7. Scroll lock

Mouse features

1. Left button
2. Scroll wheel
3. Right button

Help with setup

keyboard and mouse are not working

- Check the orientation of the batteries inside the keyboard and mouse, or replace the batteries.
- Is the USB receiver securely plugged into a computer USB port? Try moving the USB receiver to a USB port closer to the keyboard and mouse.
- If the USB receiver is plugged into a USB hub, try plugging it directly into your computer.
- Remove any metal object between the receiver and the keyboard/mouse that may interfere with reception. Try using the mouse on a different surface.
- Restart the computer.
- If these suggestions don't work, download the Reconnection Utility from http://www.logitech.com/connect_utility
