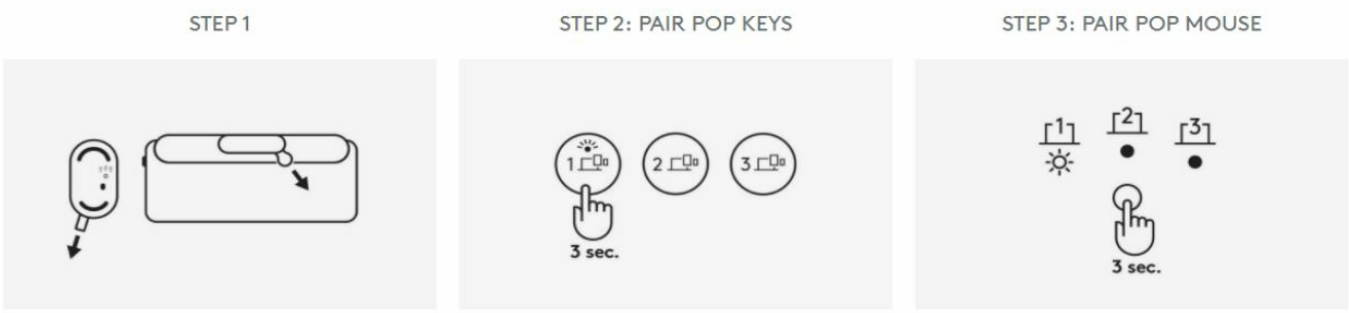
logitech POP Wireless Mouse and POP Keys Mechanical Keyboard Combo

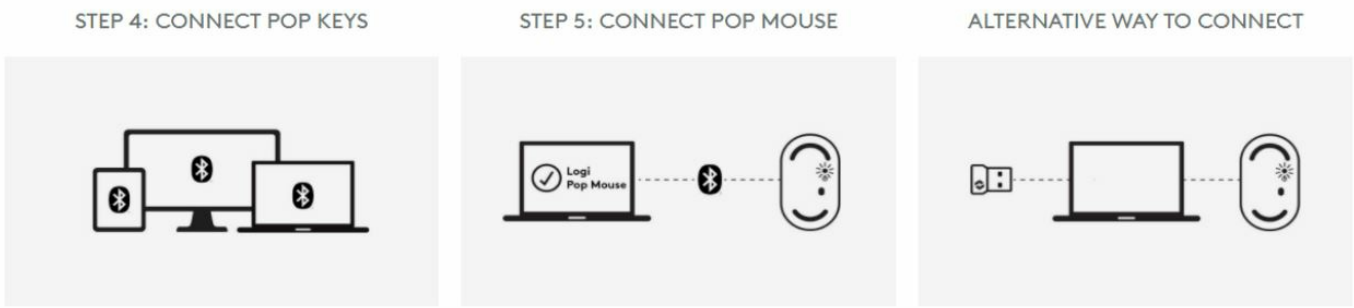
SETTING UP YOUR MOUSE AND KEYBOARD



Ready to go? Remove pull-tabs.
Remove the pull tabs from the POP Mouse and the back of the POP Keys and they will automatically switch on.

Enter Pairing Mode
Long press {that's about 3 seconds) the Channel 1 Easy-Switch key to enter Pairing Mode. The LED on the keycap will start blinking.

Enter Pairing Mode
Press the button on the bottom of your mouse for 3 seconds. The LED light will start blinking.



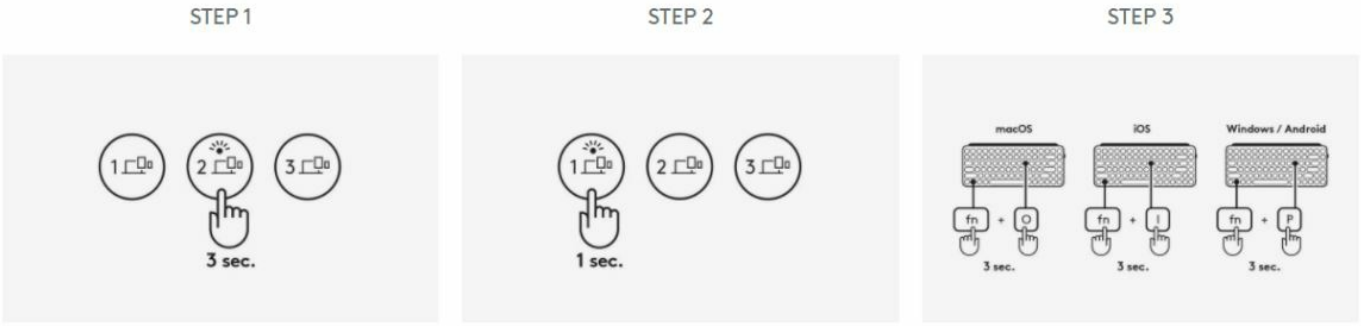
Get your POP Keys connected
Open Bluetooth preferences on your computer, phone or tablet. Select "Logi POP" on the list of devices. You should see the PIN code appear on the screen. Type that PIN code out on your POP Keys then press the Return or Enter key to finish connecting.

NOTE
Each PIN code is rondo ly generated. Make sure you are the ones on your device. When using the Bluetooth connection (Windows/macOS), your POP Ke s' loyolli will automotical adapt to the settings on your connected device.

How to connect your POP Mouse
Simply search for your Logi POP Mouse on your device's Bluetooth menu. Select, and-ta-da!-you're connected.

Is Bluetooth not your thing? Try Logi Bolt.
Alternatively, you can easily connect both devices using the Logi Bolt USB receiver, which you'll find in your POP Keys box. Follow simple Logi Bolt pairing instructions on Logitech Software (which you can download in a flash at)**logitech.com/pop-download**

MULTI-DEVICE SETUP



Want to pair with another device?
Easy. Long press (3-ish seconds) the Channel 2 EasySwitch Key. When the keycap LED starts blinking, your POP Keys are ready to pair to a second device via bluetooth Pair to a third device by repeating the same thing, this time using the Channel 3 Easy-Switch Key.

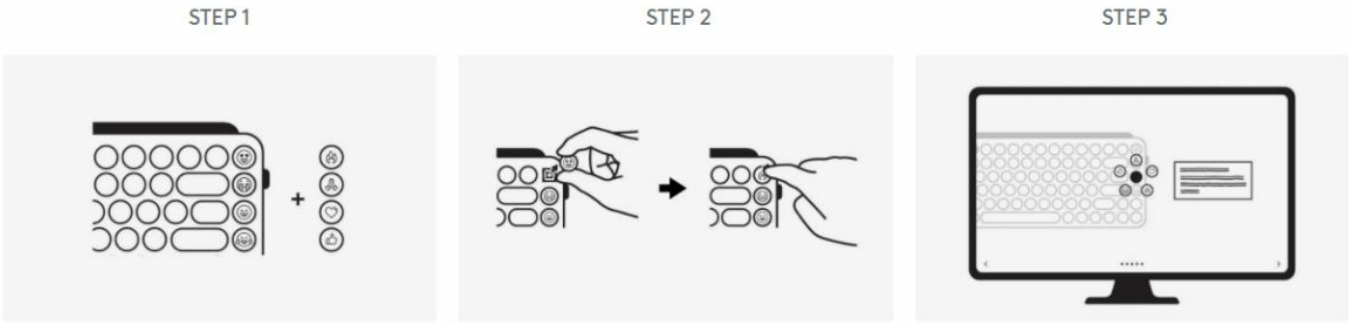
Tap between devices
Simply tap the Easy-Switch keys (Channel 1, 2, or 3) to move between devices as you type.

Select a specific OS Layout for your POP Keys
To switch to other OS keyboard layouts, long press the following combinations for 3 seconds:

- FN and “P” keys for Windows/Android
- FN and “O” keys for macOS
- FN and “I” keys for iOS

When the LED on the corresponding channel key lights up, your OS has been successfully changed.

HOW TO CUSTOMIZE YOUR EMOJI KEYS



Want to pair it with another device?
Easy. Long press (3-ish seconds) the Channel 2 EasySwitch Key. When the keycap LED starts blinking, your POP Keys is ready to pair to a second device via Bluetooth Pair to a third device by repeating the same thing, this time using the Channel 3 Easy-Switch Key.

How to swap out your emoji keycaps
To remove an emoji keycap, firmly grip it and pull it vertically. You’ll see a little ‘+’ shaped stem beneath. Choose the emoji keycap you want on your keyboard instead, align it with that little ‘+’ shape, and press down firmly.

Open Logitech software
Open Logitech Software (making sure your POP Keys are connected) and select the key you want to reassign.

Activate the new emoji
Select your favourite emoji from the suggested list, and get your personality popping in chats with friends!

HOW TO CUSTOMIZE YOUR POP MOUSE

Download Logitech Software
After installing Logitech Software at [logitech.com/pop-download](), explore our software and customize the top button of POP Mouse to any shortcut you like

Change your shortcut across apps
You can even customize your POP Mouse to be opp-specific! Just play around and make it your own.
