4. USB Ports
5. Info/Panic Button
6. Video Inputs
7. Audio In/Out
8. HDMI Port
9. LAN Port
10. RS-485 Port
11. VGA Port
12. Power Port
13. Power Switch

Step 1: Wired Camera

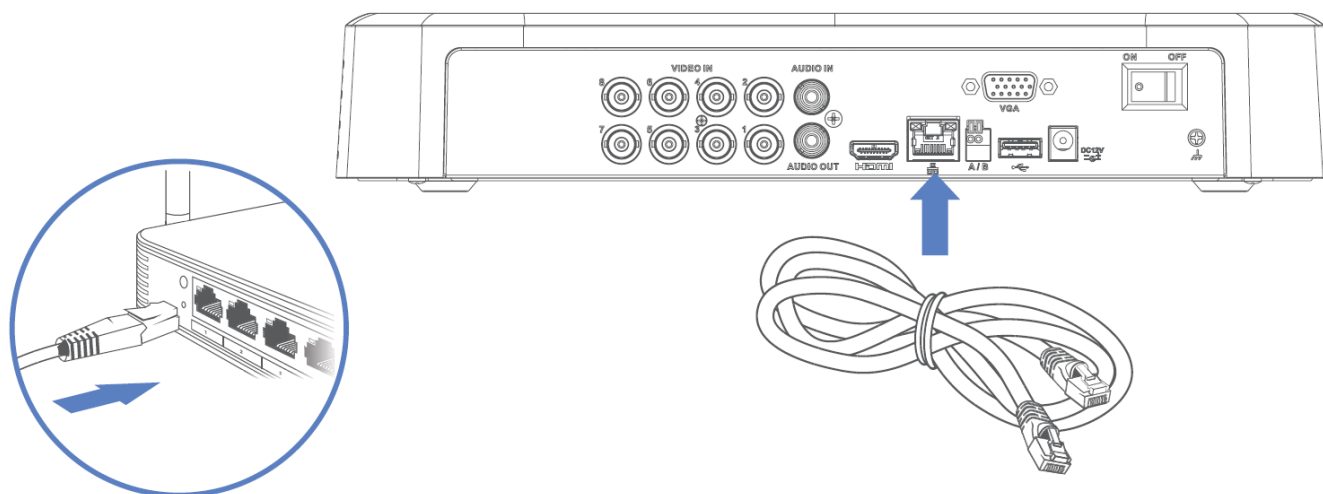

1. Connect the BNC and male power end of the extension cable to your camera.
2. Connect the other BNC end of the extension cable to a video input on your recorder.
3. Connect the female power end of the extension cable to the camera's power adapter.

Note: The extension cable must be a single stretch of cable between your recorder and camera. You cannot connect multiple extension cables to each other.

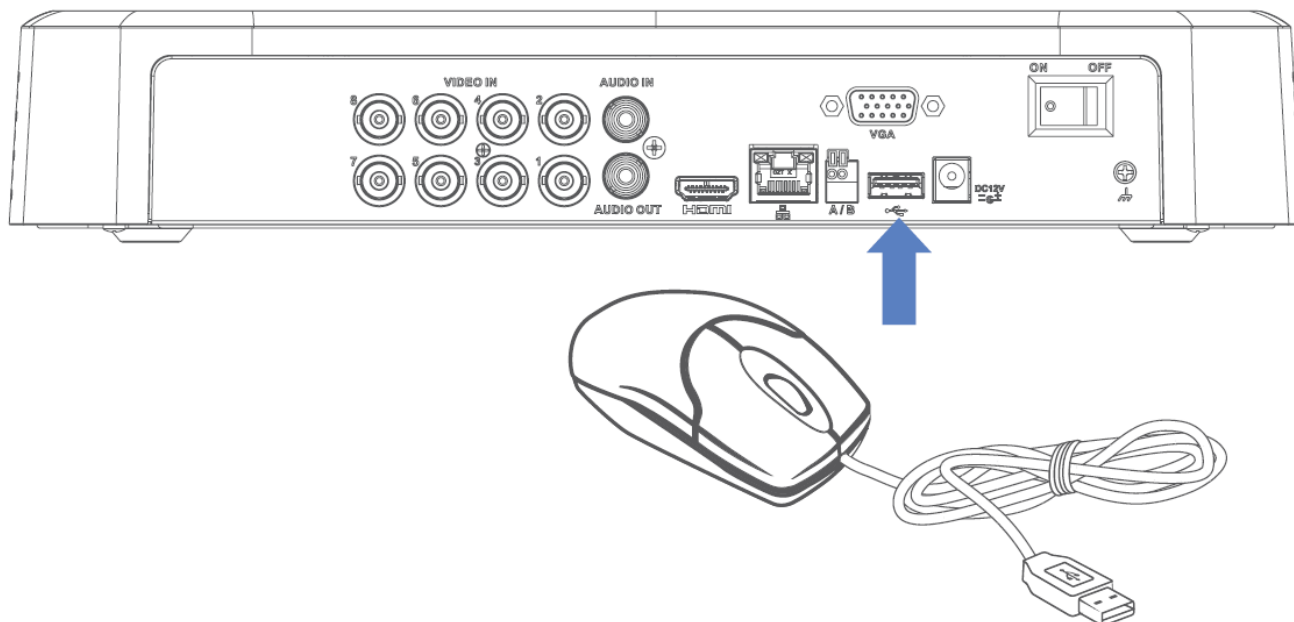

Test your cameras prior to selecting a permanent mounting location.

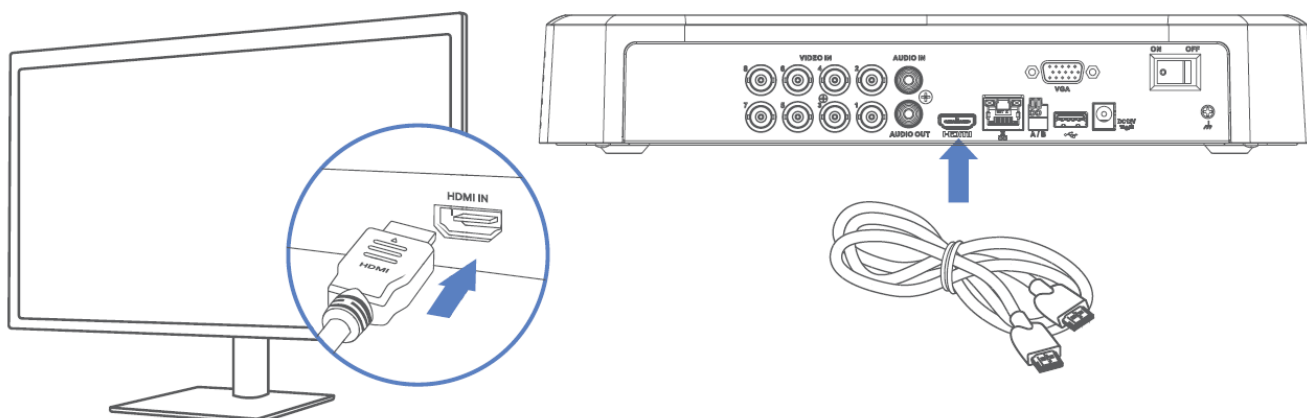

Step 2: Connect to your network: Connect your recorder to your Wi-Fi router using the included Ethernet cable.

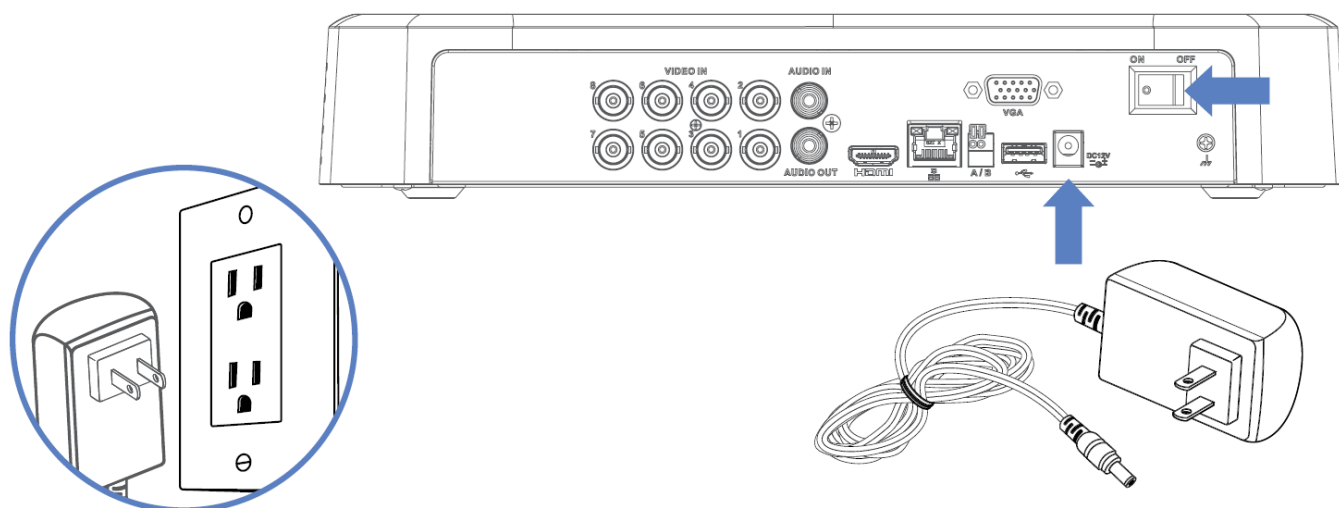

Step 3: Connect your mouse: Connect the included USB mouse to the USB port on your recorder. To copy events or to perform a firmware update, connect a USB flash drive.

Step 4: Connect to your TV: Connect your recorder to your TV using the included HDMI cable. The HDMI supports up to 4K resolution and VGA supports up to 1080p.

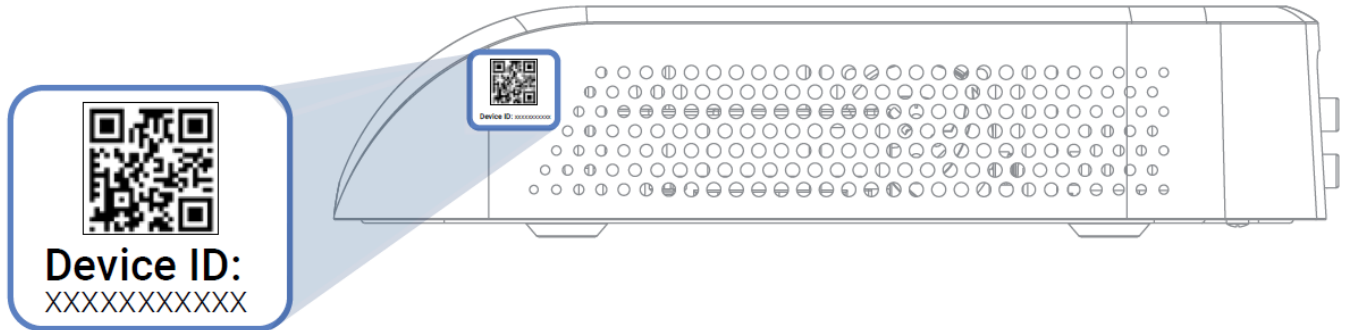

Step 5: Connect your power adapter: Connect the included power adapter to your recorder and a power outlet. Flip the power switch ON and complete the Lorex Setup Wizard.

Download the Lorex Home App

To enable remote viewing with mobile apps, you will need to:

- Have high-speed Internet
- Have an upload speed of 6Mbps for one 4K channel and at least 20Mbps for the whole system
- Find your recorder's Device ID

To connect your recorder to the app:

1. Download Lorex Home app.

2. In the app tap + to add your recorder.
3. Follow the in-app steps to complete the setup.

Fusion Setup

Connect your Wi-Fi device to your recorder: Set up your recorder and wired cameras. Next, download the Lorex Home app and add your recorder and Wi-Fi device. From your recorder, navigate to the camera's setup page and scan your network to connect your Wi-Fi device. To learn more or get support, scan the QR code or visit:
