LSEPOUM B0BLNWQN4T Caged Ceiling Fan with
Light Instruction Manual

Caged Ceiling Fan with Light
Installation & Troubleshooting Manual

LSEPOUM

READ INSTRUCTIONNS CAREFULLY FOR SAFE
INSTALLATION AND FAN OPERATION

The first step in the installation of the product is to check whether there is fallen off or poor contact of the wireline, then check the electricity and remote control of the product on the ground. If everything is ok, install the product on the ceiling.

1. Adults, children, and the elderly should not touch the fan blades when the fan is powered on or energized.
Please keep a safe distance and height from the fan.
2. If the fan has a burning odor during operation, please tum off the power to prevent leakage accidents.

■ Kind reminder

1. If the remote control fails to control the light and fan, please check whether the battery is installed correctly or replace the battery and test again! Then check whether there is fallen off or poor contact of the wireline inside the base!
2. If the remote control suddenly cannot be used, please check the code first (refer to the manual of the remote control or contact online customer service by email)! If the problem still exists after checking the code, please contact the Seller to send a new controller accessories.

- Maintenance and cleaning

After the product has been used for a period of time, it can be cleaned with a cloth dipped in detergent, and then wiped with a dry cloth.

- **Warning:**

If it is necessary to remove the fan blade for cleaning, professional electrician must be there to assist the installation so as to prevent falling injury caused by unstable installation of the blade!

- **Kind reminder**

If you do not use the fan or turn on and off the light for a long time, please energize on the product regularly to extend the service life of the product!

SAFETY RULES

1. To reduce the risk of electric shock, turn off the electricity to the fan at the main fuse box or circuit panel before beginning.
2. All wiring must be in accordance with the local electrical codes or National Electrical Code. Electrical installation should be performed by a qualified licensed electrician.
3. To avoid personal injury, the use of gloves may be necessary while handling fan parts with sharp edges.
4. Make sure the installation site you choose allows clear space for the blades to rotate and at least 6.5 feet of clearance between the floor and the fan blade tips.
5. **WARNING:** To reduce the risk of fire, electric shock, or personal injury, mount fan only to an outlet box marked acceptable for fan support and use mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.
6. The outlet box and ceiling support structure must be securely mounted and capable of supporting at least 10 KGS.
7. To avoid personal injury or damage to the fan and other items, be cautious when working around or cleaning the fan.
8. Do not use water or detergents when cleaning the fan or fan blades. A dry dust cloth or lightly dampened cloth will be suitable for most cleaning.
9. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box.
10. Electrical diagrams are for reference only.
11. The fan is more suitable for indoor use.

TOOLS REQUIRED

PRODUCT OVERVIEW

Unpack your fan and check the contents. You should have the followings:

- ① Caged Ceiling Fan with Light
- ② Edison Bulbs X4
- ③ Remote ControlX1

INSTALLATION DIAGRAM

Standard Ceiling Installation	Decorative Ceiling Installation	Sloped Ceiling Installation
General guideline is available for concrete ceiling.	The decorative ceiling(wooden) must be reinforced to be able to bear the weight of 10kg. And the thickness of the board shall be less than 1.18 inches. Please reinforce it in advance before installation.	No angled limited. As long as you like, beyond your imagination. If you want to enjoy downward airflow, angle ranging from 0-2. ° is recommended.

Circuit Diagram

Live Wire (Black)
Neutral Wire (White)
Earth Wire (Yellow)

Note: The black wire and white wire can be interchangeably connected to the junction box which does not affect the performance of fan/light. And it is also safe.

Remote control available only when fan/light powered on from wall switch.

Instructions for use of the remote control

1. Remote control clear code setting:

Turn the power back on, press and hold the “Stop” button for 5 seconds, the indicator light stops flashing, and the code clearing is completed.

2. Remote control pairing setting:

Turn the power back on and hold the “2H” button within 3 seconds.

When the indicator light stops flashing, the pairing code is completed.
