Product features

- Latest DALI standard protocol IEC62386
- Support switch and dimming function.
- DALI bus supply power.

- The DIP switch can set address.
- Support scene, group, unicast, broadcast mode.

Technical specs

DALI touch panel

- **Power supply:** DALI power
- **Output signal:** DALI
- **Dimming key:**
 - EDA1:** 1CH control
 - EDA2:** 2CH control
 - EDA3:** 3CH control
 - EDA4:** 4CH control
- **Static current:** 6mA@16V
- **Standby current:** 4mA@16V
- **Working temperature:** -30°C~55°C
- **Dimensions:** L86×W86×H37(mm)
- **Package size:** L113×W112×H50(mm)
- **Weight(G.W.):** 200g

Installation Instruction

Typical base as follow:

- European

- 86 style

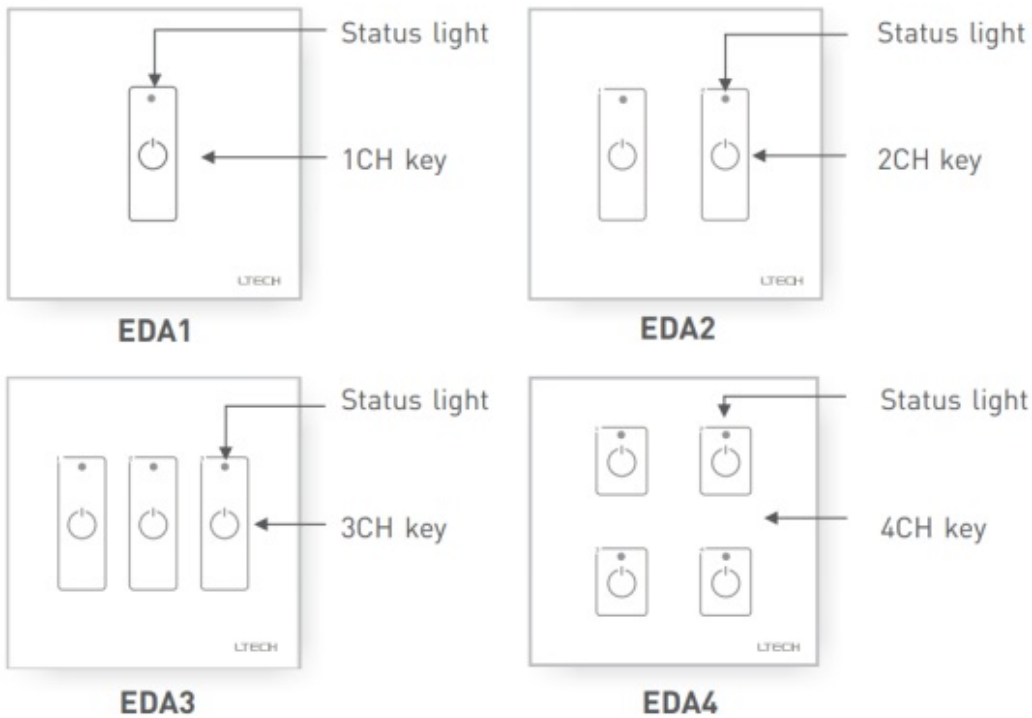

Product size

Unit : mm

Touch panel

Short press: switch; **long press:** dimming (suitable for unicast, broadcast and group mode).

Terminals

X : 10 levels spin switch

Y : 16 levels spin switch

Power and signal combined socket

DALI address setting Wiring diagram

- X= (0-6): unicast mode;
- X= 7: group mode;
- X= 8: scene mode;
- X= 9: broadcast mode.

Via spin switch, you can set **64** unicast address (**0-63**), 16 group address (**0-15**) 16 scene **addresses(0-15)** and broadcast address.

- Unicast mode address:(0-63)

X choose 0-6

First address value = $X \times 10 + Y$

(value beyond 63 will be considered as 63)

- Group mode address:(0-15)

X choose 7

First address value = Y

- Scene mode address:(0-15)

X choose 8

First address value = Y

- Broadcast mode

X choose 9

- E.g.: Set initial address to 40 in unicast mode.

First address value = $X \cdot 10 + Y = 4 \cdot 10 + 0 = 40$

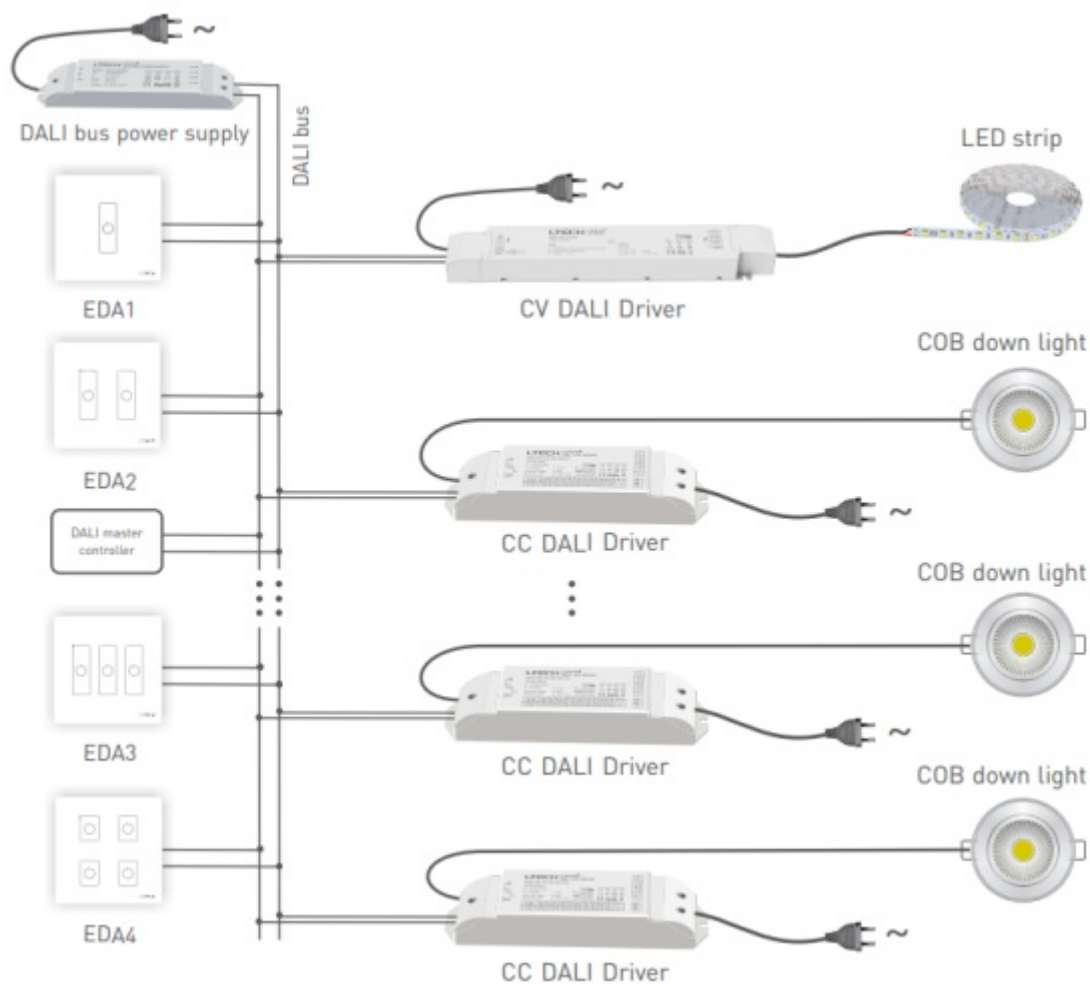

- E.g.: Set initial address to 5 in group mode.

- E.g.: Set initial address to 14 in scene mode.
