Lumens RM-TT Array Microphone

Specifications

- Product Name: Yamaha RM-TT Array Microphone
- Power Source: POE switch
- Network Connectivity: Requires connection to the same network as CamConnect Pro
- Audio Trigger Level: 50dB

Product Usage Instructions

1. Powering On:

Use a POE switch to power on the Yamaha RM-TT array microphone.

1. Network Setup:

Ensure that the RM-TT is on the same network as the CamConnect Pro. Use RMDeviceFinder to find the IP address of the RM-TT.

1. Logging In:

Enter the RM-TT IP address into a browser. Input the password in the login window and click the [LOGIN] button.

1. Check Connection:

Confirm the LED status to ensure the RM-TT is connected.

1. CamConnect Pro Settings:

- Go to Array Microphone Numbers and select the number for RM-TT.
- Choose [Yamaha RM-TT] from the Device options.
- Enter the IP address of the RM-TT.
- Set Audio Trigger Level to 50dB.
- Switch the [Connect] button to connect with Yamaha RM-TT.

FAQ

Q: How do I power on the Yamaha RM-TT microphone?

A: Use a POE switch to power on the device.

Windows 10 (32bit/64bit) / Windows 11

Compatible Models

- RM-CG
- RM-CR⁽¹⁾
- RM-TT
- RM-WAP-8

⁽¹⁾ rear port only

Important Notice

- If the [ETHERNET SWITCH SETTINGS] is set to [Separated] mode (default) and you want to set an RM-CR Dante terminal and corporate terminal to the same IP segment, connect both terminals to the same network switch. If you connect them to different network switches, "RM Device Finder" and "ProVisionaire Control" will not be able to detect the device.

Main Revisions and Enhancements

New Functions

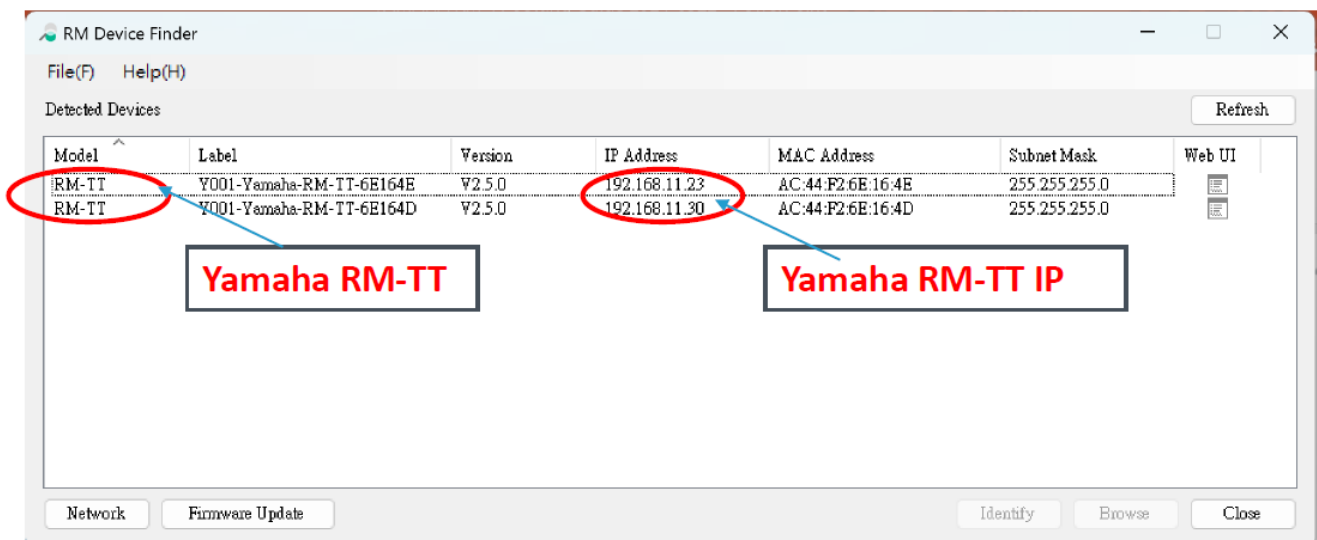

- The RM-TT and RM-WAP-8 can now be detected and the Web GUI can be displayed.
- Added a firmware update function (compatible with the RM-CR, RM-CG, RM-TT, and VXL1-16P).
