Product Instructions

Steps:

1. The switch button indicates the " " product on and off. position. Press the button to turn the
2. Press the switch button to the " " position, the indicator light will light up and the machine will start working.
3. Press the switch button to the " " position, the switch is reset to the power-off state and the machine does not work.
4. When the machine is working, if there is no water in the pot or it is in dry-burning state, the indicator light will be on and the machine will not work.
5. For safe use, please adjust the switch to the reset state and unplug the power cord when the machine is not in use.

First Use

Before using this product for the first time, please note:

1. Make sure to clean this product. Cleaning method: first add appropriate amount of water to the pot and steam for 20 minutes until it reaches disinfection effect, then clean it once with detergent + water and it can be used normally.
2. When the machine is working, do not touch the surface of the upper cover or the steam vent with your hands to avoid burns.
3. When the machine is in use, the bottom of the pot may turn white. Due to different water quality, slight impurities will precipitate when heated. This can be avoided by timely scrubbing after use. This phenomenon is normal and does not affect normal use and is harmless to the human body.
