## **WHY STUDY THIS COURSE**

Want to learn the best approaches to mobile testing? In this ASTQB® Mobile Testing course, you will discover how to best plan, organise, and execute testing across various mobile devices and user profiles.

By the end of this course, you will know how to prioritise mobile testing and how to accomplish the testing efficiently within tight time constraints. You will also know how to select the best tools for testing, which quality characteristics to address, and work with the project team to quantify risks.

### **Included with this course:**

- Comprehensive course manual
- Revision questions for each module
- Practice exam
- Pass guarantee: if you don't pass the exam first time, re-attend the course for free within 6 months
- 12 months' access to the online self-study course after attending this instructor-led course

*Please note: The exam is not included in the course fee but can be purchased separately. Please contact us for a quote.*

## **WHAT YOU'LL LEARN**

### **Learning outcomes:**

- Identify and mitigate the challenges that face a mobile application tester
- Plan, design and implement appropriate test cases for mobile applications.

## **ISTQB AT MUMMIFY WORK**

Since 1997, Planit has established its reputation as the world leading provider of software testing training, sharing their extensive knowledge and experience through a comprehensive range of international best-practice training courses like BASSIST.

Mummify Work's software testing training courses are delivered in partnership with Planit.

- Work with other team members to identify and assess risks, and to implement a testing solution to help mitigate those risks
- Identify the applicable quality characteristics for a mobile application and identify an appropriate testing approach to address those characteristics
- Participate in tool analysis and selection to select the most appropriate tools for conducting mobile application testing
- Identify areas for non-functional testing and prepare appropriate tests for those areas
- Understand the differences between the various mobile application types and select appropriate tools, techniques and approaches to test those applications.
- Effectively employ simulators, emulators and the cloud for testing
- Participate in planning for the future, including proper tool selection and building for maintainability.

My instructor was great being able to put scenarios into real world instances that related to my specific situation.

I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable.

I learnt a lot and felt it was important that my goals by attending this course were met.  
Great job Lumify Work team.
