LUMIFY WORK ISTQB Advanced Test Manager

Specifications

- **Application:** ISTQB Advanced Test Manager
- **Length:** 5 days
- **Price (Incl. GST):** \$3300

Product Information

The ISTQB Advanced Test Manager certification is a best practice qualification offered by Lumify Work. It is designed for experienced testing professionals who are looking to transition into a test management role. The course is delivered in partnership with Planit, a world-leading provider of software testing training.

The course includes a comprehensive manual, revision questions for each module, a practice exam, and a pass guarantee. In addition, participants will have 12 months' access to the online self-study course after attending the instructor-led course. Please note that the exam is not included in the course fee and needs to be purchased separately.

Product Usage Instructions

Learning Outcomes:

1. Manage a testing project by implementing the mission, goals, and testing processes.

2. Organize and lead risk identification and risk analysis sessions and use the results of such sessions.
3. Create and implement test plans consistent with organizational policies and test strategies.
4. Continuously monitor and control the test activities to achieve project objectives.
5. Assess and report relevant and timely test status to project stakeholders.
6. Identify skills and resource gaps in their test team and participate in sourcing adequate resources.
7. Identify and plan necessary skills development within their test team.
8. Propose a business case for test activities that outlines the costs and benefits expected.
9. Ensure proper communication within the test team and with other project stakeholders.
10. Participate in and lead test process improvement initiatives.

- Manage a testing project by implementing the mission, goals, and testing processes
- Organise and lead risk identification and risk analysis sessions and use the results of such sessions
- Create and implement test plans consistent with organizational policies and test strategies
- Continuously monitor and control the test activities to achieve project objectives
- Assess and report relevant and timely test status to project stakeholders
- Identify skills and resource gaps in their test team and participate in sourcing adequate resources
- Identify and plan necessary skills development within their test team
- Propose a business case for test activities that outlines the costs and benefits expected
- Ensure proper communication within the test team and with other project stakeholders
- Participate in and lead test process improvement initiatives

My instructor was great being able to put scenarios into real-world instances that related to my specific situation. I was made to feel welcome from the moment I arrived and the ability to sit as a group outside the classroom to discuss our situations and our goals was extremely valuable. I learned a lot and felt it was important that my goals by attending this course were met. Great job Lumify Work team.
