LUMOS

LUMOS LAXBL-CC Charging Cradle

CHARGING FIREFLY

When the battery is low, place your Firefly into the Charging Cradle and connect it to a power source. A red LED light should appear indicating it's charging. Firefly is fully charged when the red LED light on Firefly turns green. It takes roughly 5 hours for a full charge.

Note: Firefly is Qi-compatible and can also be charged with other Qi wireless chargers. For more information, visit firefly.lumoshelmet.co

FIREFLY CHARGING INDICATORS

LED indicator

The Lumos Firefly has a small LED indicator to convey different information. Please note the colours below and the corresponding message.

Red LED light – Firefly is charging. Green LED light – Firefly is fully charged. Yellow LED light – Firefly has temporarily paused charging to allow it to charge within acceptable operating temperatures*.

- For optimal charging, charge in ambient temperatures of $\leq 30^{\circ}\text{C}$. If charging gets too hot, Firefly will temporarily stop charging to protect itself from overheating. Charging will automatically resume once it has cooled down sufficiently.

TURN YOUR CRADLE INTO A SHEEP ~ BAAA

The Charging Cradle comes with an additional set of feet to add some character. Watch it turn into an alien-sheep-thingy by attaching the set of feet supplied. To attach, gently peel off the default flat rubber base from underneath. Remove the adhesive protector from the feet and carefully stick them to the base of the Charging Cradle. The feet were designed with the longer feet in front, but feel free to orient them however works best for you.

DISCOVER MORE FEATURES

SPECIFICATION OF RADIO TRANSMISSION

- Product: Lumos Charging Cradle
- Model Number: LAXBL-CC
- Operating frequency: 115kHz – 205kHz
- Max. RF output power: 7.2dBμA/m

Hereby, Lumos Labs International Pte Ltd. declares that the radio equipment type Lumos Charging Cradle is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: lumoshelmet.co/EU_DOC

IC Statement

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

The term "IC: " before the certification/registration number only signifies that the Industry Canada technical specifications were met. This product meets the applicable Industry Canada technical specifications. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment should be installed and operated with a minimum distance of 20centimeters between the radiator and your body.

FCC – Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules.

Operation is subject to the following two conditions

1. this device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
