LUPO USB Multi Memory Card Reader

Specifications

• Product Name: LUPO All-in-1 USB Multi Memory Card Reader

• Compatibility: Over 150 different memory card types

Interface: USB 2.0Plug-and-Play: Yes

• Warranty: 100% money-back guarantee

Product Usage Instructions

Step 1: Connecting the Card Reader

- 1. Use the included USB cable to connect the card reader to a free USB 2.0 port on your computer.
- 2. The LED light will turn on, indicating that the card reader is powered and ready for use.

Step 2: Inserting a Memory Card

- 1. Insert your memory card into the appropriate slot on the card reader. Make sure the card is inserted correctly, with the label facing up and the connectors aligned with the card reader's slot.
- 2. Your computer will automatically detect the memory card, and it will appear as an external drive in File Explorer (Windows) or Finder (macOS).

Step 3: Transferring Files

- 1. Open the external drive folder on your computer.
- 2. Drag and drop files to and from the memory card for easy data transfer.
- 3. After completing the transfer, always safely eject the memory card by using the Safely Remove Hardware feature on your computer.

Step 4: Removing the Memory Card

- 1. Once the transfer is complete and the card is safely ejected, gently remove the card from the reader.
- 2. The reader is now ready for another card to be inserted or can be unplugged from the computer.

Product Overview

The LUPO All-in-1 USB Multi Memory Card Reader provides a simple, fast, and reliable solution for transferring files from a variety of memory cards to your computer. Compatible with over 150 different memory card types, this compact, durable gadget offers plug-and-play functionality, making it an essential tool for photographers, content creators, and anyone needing quick data transfer.

Package Contents

- 1 x LUPO All-in-1 USB Multi Card Reader
- 1 x USB 2.0 Cable

Key Features

- Compatibility: Supports more than 150 memory card formats, including CompactFlash (CF), Memory Stick (MS), MicroSD, SD, SDHC, SDXC, MMC, and more.
- Plug-and-Play: No drivers or software needed. Just plug it into a USB port and start transferring files immediately.
- High-Speed USB 2.0: Transfer speeds of up to 4.3 Mbps for reading and 1.3 Mbps for writing.
- Compact and Portable: Easy to carry, ideal for home or travel.
- Durable Build: Made from high-quality materials for long-lasting use.
- Hot Swappable: Connect and disconnect cards without needing to restart your computer.
- Cross-Platform Compatibility: Works with Windows and macOS operating systems.

- 6. MMC, MMCmobile, MMCplus, MMCMicro
- 7. XD Picture Cards (XD, XD M, XD H)

For a full list of compatible cards, please refer to the product packaging or description.

How to Use

Step 1: Connecting the Card Reader

1. Use the included USB cable to connect the card reader to a free USB 2.0 port on your computer.

2. The LED light will turn on, indicating that the card reader is powered and ready for use.

Step 2: Inserting a Memory Card

- 1. Insert your memory card into the appropriate slot on the card reader. Make sure the card is inserted correctly, with the label facing up and the connectors aligned with the card reader's slot.
- 2. Your computer will automatically detect the memory card, and it will appear as an external drive in File Explorer (Windows) or Finder (macOS).

Step 3: Transferring Files

- 1. Open the external drive folder on your computer.
- 2. Drag and drop files to and from the memory card for easy data transfer.
- After completing the transfer, always safely eject the memory card by using the "Safely Remove Hardware" feature on your computer.

Step 4: Removing the Memory Card

- 1. Once the transfer is complete and the card is safely ejected, gently remove the card from the reader.
- 2. The reader is now ready for another card to be inserted or can be unplugged from the computer.

Troubleshooting

Issue: The card is not recognized by the computer.

- · Solution:
 - Ensure the card is inserted correctly and is fully seated in the card reader.
 - Try using a different USB port on your computer.
 - Restart your computer and reconnect the card reader.
 - Ensure your memory card is supported and in good working condition.

Issue: Slow transfer speeds.

- · Solution:
 - Verify that you are using a high-speed USB 2.0 port for optimal performance.
 - Avoid transferring very large files in one go to prevent bottlenecks.

Issue: The LED indicator is not turning on.

- · Solution:
 - Check the USB connection to ensure the cable is securely plugged into both the card reader and the computer.
 - Test the card reader on another computer to rule out port or cable issues.

Safety and Maintenance

- Keep the card reader away from moisture and extreme temperatures.
- Clean the device using a dry, soft cloth. Do not use harsh chemicals or solvents.
- Do not insert or remove memory cards roughly, as this could damage the card or the reader.
- When not in use, store the card reader in a safe place to avoid damage.

Warranty Information

The LUPO All-in-1 USB Multi Memory Card Reader comes with a 100% money-back guarantee. If you are not satisfied with your purchase for any reason, you can return the product for a full refund.

FAQs

Issue: The card is not recognized by the computer.

If the memory card is not recognized by the computer, try the following steps: – Ensure the card is inserted correctly into the card reader. – Check if the card reader is properly connected to the computer. – Restart your computer and try again. – If the issue persists, try using a different USB port or cable. – Contact customer support for further assistance.
