Luqeeq Wireless Smart Android Projector

Introduction

The Luqeeq Wireless Smart Android Projector represents a remarkable fusion of innovation and entertainment technology, redefining how we experience multimedia content. This advanced projector seamlessly combines the convenience of wireless connectivity, the power of the Android operating system, and stunning Full HD resolution to create a versatile and immersive viewing experience.

In this introduction, we will delve into the key aspects that make the Luqeeq Wireless Smart Android Projector an exceptional addition to your entertainment arsenal and a valuable tool for professional presentations.

One of the standout features of the Luqeeq Wireless Smart Android Projector is its wireless connectivity. With this projector, you can effortlessly stream content from your smartphone, tablet, or other wireless devices. Whether you're sharing vacation photos with friends or wirelessly mirroring your device's screen for a business presentation, the wireless capabilities of this projector make it incredibly versatile.

Built on the Android operating system, this projector offers a whole new level of functionality. It's like having a smart TV and a powerful computer built into one device. With access to the Google Play Store, you can download and enjoy a wide range of apps, from streaming services like Netflix and YouTube to productivity apps for work or school. Visual quality is paramount, and the Luqeeq projector doesn't disappoint. With a native resolution of 1920 x 1080 pixels (Full HD), it delivers breathtakingly clear and detailed images. Whether you're watching movies, playing video games, or presenting intricate data charts, this projector ensures that every detail shines through.

Specifications

- **Item Type:** Touch Projector
- **Product Material:** ABS
- **Voltage:** 100-240V
- **Remote Control Battery:** AAA x 2 (Battery Not Included)
- **Display Technology:** LCD
- **Projection Light Source:** LED Module
- **Center Brightness:** Typical 100ANSI Luminous Flux
- **Light Type:** LED
- **Physical Resolution:** 1920 x 1080 (Support 4K Source)
- **Projection Size:** 50-180in

- **Contrast:** 1500:1
- **Throw Ratio:** 1.35:1
- **Uniformity:** >75%
- **Projection Distance:** 1.5m-3m
- **Projected Aspect Ratio:** 16:09
- **Focusing Mode:** Manual Focusing
- **Keystone:** Auto Keystone (Horizontal Vertical: ± 40 Degrees)
- **Projection Mode:** Front Projection Rear Projection Ceiling Projection
- **Off Axes Function:** 30%
- **Same Screen:** Support
- **System:** for Android 9
- **Solution:** RK3228A; 4 Cores, A7 Cores, 1.2G
- **Processor:** Mali400 MP2 GPU
- **Running Memory:** 2GB DDR3
- **Internal Storage:** 16GB
- **WIFI:** 2.4G 5G
- **Bluetooth:** 4.0
- **Video Formats:** 4K HEVC H.265 MPEG-2 MPEG-4 H.264 VP8 VP9
- **Music Format:** MPEG1 Layer3 AC3 EAC3 AAC, HEAAC WMA LPCM IMA-ADPCM MS-ADPCM
- **Image Format:** Jpg, Png, Bmp, Etc.

DIMENSION

Key Features

- **Wireless Streaming:** With its wireless connectivity, you can effortlessly mirror your mobile device's screen or stream content from popular platforms like Netflix and YouTube directly on the big screen.
- **Android OS:** The built-in Android operating system opens up a world of possibilities, allowing you to download apps, games, and stream content without the need for additional devices.
- **Full HD Resolution:** Enjoy stunning visuals with the projector's Full HD resolution, making it perfect for

watching movies, gaming, and professional presentations.

- **Versatile Connectivity:** The projector's multiple ports ensure compatibility with various source devices, including laptops, gaming consoles, and streaming devices.
- **Keystone Correction:** Achieve a perfectly aligned image with keystone correction, even when the projector is placed at an angle.
- **Built-in Speakers:** The built-in stereo speakers deliver clear and immersive audio, enhancing your overall viewing experience.

INTERACTIVE FHD PROJECTOR

How to Use

Using the Luqeeeg Wireless Smart Android Projector is straightforward:

- **Connect Power:** Plug in the projector and power it on.
- **Wireless Connection:** Connect your smartphone, tablet, or other wireless devices to the projector's Wi-Fi network.
- **Source Selection:** Choose your desired content source, whether it's an app on the built-in Android OS, a connected device, or wireless streaming.
- **Adjust Image:** Use the keystone correction feature to align the projected image correctly on the screen or wall.
- **Enjoy:** Sit back and enjoy your favorite movies, shows, games, or presentations on the big screen.

USAGE

Safety

- **Cable Management:** Ensure that cables and cords are not left in areas where they can become a tripping hazard. Secure cables along walls or floors to prevent accidents.
- **Operating Environment:** The projector should be used in a clean and dry environment. Avoid exposing it to extreme temperatures, humidity, or direct sunlight, as these conditions can affect its performance and longevity.
- **Stable Mounting:** If you're mounting the projector on a ceiling or wall, make sure it is securely installed following the manufacturer's guidelines and using appropriate mounting hardware. An improperly mounted projector can fall and cause injury or damage.
- **Children and Pets:** Keep the projector out of the reach of children and pets. The projector's power cables and hot surfaces can pose risks, and it's important to prevent accidental contact.
- **Battery Safety:** If the projector has a built-in rechargeable battery, follow the manufacturer's instructions for charging and storage. Avoid overcharging or exposing the battery to extreme temperatures.
- **Screen Safety:** Ensure that the projection screen or surface is properly secured and does not present a falling hazard. If using a screen stand, make sure it is stable.

Troubleshooting

Projector Won't Power On:

- Check the power source: Ensure that the power source is working correctly and that the power cable is securely connected to both the projector and the power outlet.
- Try a different power outlet: In some cases, the power outlet may be faulty. Plug the projector into a different outlet to see if it powers on.

No Image or Blank Screen:

- Source selection: Verify that the correct input source is selected on the projector. Use the remote control or the projector's menu to switch to the desired input.
- Check the cables: Ensure that the video cable (HDMI, VGA, etc.) connecting the source device to the projector is securely plugged in at both ends.
- Source device: Make sure the source device (e.g., laptop, DVD player) is powered on and sending a signal to the projector.
- Lamp status: If the projector has a replaceable lamp, check if it needs replacement. A worn-out lamp may not produce light.

Distorted or Misaligned Image:

- Keystone correction: Adjust the keystone correction settings on the projector to correct image distortion or misalignment caused by the projector's angle.
- Projection distance: Ensure that the projector is placed at the correct distance from the screen or wall to achieve the desired screen size and aspect ratio.

No Sound or Low Volume:

- Audio source: Confirm that the audio source (e.g., laptop, streaming device) is correctly connected to the

projector and that its volume is turned up.

- **Projector volume:** Check the projector's volume settings and make sure it is not muted or set to a very low level.
- **External speakers:** If you're using external speakers, ensure they are powered on and connected to the projector, and their volume is adjusted appropriately.

Connectivity Issues:

- **Wireless connection:** Ensure that the projector and the source device are connected to the same Wi-Fi network. Reconnect or reset the Wi-Fi connection if needed.
- **Bluetooth pairing:** If you're using Bluetooth for audio or accessories, make sure the devices are properly paired and within the Bluetooth range.

Remote Control Problems:

- **Battery replacement:** If the remote control is unresponsive, replace the batteries with fresh ones.
- **IR sensor:** Ensure that the projector's IR sensor is not obstructed, and the remote control is pointed at it from within the specified range.

FAQS

Does the Luqeeq Wireless Smart Android Projector support wireless streaming?

Yes, this projector offers wireless connectivity, allowing you to easily stream content from your smartphone, tablet, or other wireless devices.

What is the native resolution of this projector?

The Luqeeq Wireless Smart Android Projector has a native resolution of 1920 x 1080 pixels, providing Full HD quality visuals.

Can I access apps and games on this projector?

Yes, it features a built-in Android operating system, giving you access to a wide range of apps, games, and streaming services directly from the projector.

What connectivity options are available for source devices?

The projector offers multiple connectivity options, including HDMI, USB, VGA, and audio ports, making it compatible with various source devices.

Does the projector have built-in speakers?

Yes, it features built-in stereo speakers, eliminating the need for external audio equipment.

How do I align the projected image correctly?

You can use the keystone correction feature to adjust and align the projected image for a perfect viewing

experience, even when the projector is placed at an angle.

What is the maximum screen size this projector can create?

This projector can create screen sizes ranging from 30 to 120 inches, catering to different viewing preferences.

How do I connect my wireless devices to the projector's Wi-Fi network?

Access the projector's Wi-Fi network in your device's settings and connect to it. Follow on-screen instructions for authentication if required.

Can I use this projector for business presentations?

Absolutely, the Full HD resolution and built-in Android OS make it suitable for professional presentations and meetings.

How should I clean and maintain the projector for optimal performance?

Clean the lens and vents regularly with a soft, lint-free cloth. Ensure proper ventilation and use the provided power adapter.

What should I do if the projector doesn't power on?

Check the power source, ensure all cables are securely connected, and try a different power outlet if necessary.

How can I troubleshoot audio problems with the projector?

Check the audio settings on your source device, confirm the volume is up, and ensure the audio source is correctly connected to the projector.

Is there a warranty for the Luqeeq Wireless Smart Android Projector?

Warranty details may vary, so it's recommended to refer to the manufacturer's warranty information provided with the projector.
