IMPORTANT

1. Do not use control with exhaust fans
2. CAUTION: To avoid overheating and possible damage to other equipment, do not use to control receptacles, lighting, fluorescent lighting fixtures, or transformer supplied appliances.
3. Do not use control with a fan and light that operate with the same switch.
4. When no "grounding means" exists within the wall box for an existing switch or dimmer, the National Electrical Code® (NEC®) allows a switch/dimmer to be installed as a replacement as long as 1) a nonmetallic, noncombustible faceplate is used with nonmetallic attachment screws or 2) the circuit is protected by a ground fault circuit interrupter. Lutron wallplates meet this requirement.
5. The use of ceiling fan controls on circuits protected by a ground fault circuit interrupter (GFCI) may result in nuisance tripping and is not recommended.
6. Use control with a ceiling paddle fan only. Use only one ceiling paddle fan per control.
7. For new installations, wire a test switch before installing the control.
8. Set multi-speed fans to their highest setting before installing controls.
9. Use only one control in a 3-way circuit.
10. Install in accordance with all national and local electrical codes.
11. Clean control with a soft damp cloth only. Do not use any chemical cleaners.
12. Not for use with DC motor fans.

Set the fan to the highest speed

NOTE: For ceiling-mounted, paddle fans only

Turn power OFF at circuit breaker

WARNING: SHOCK HAZARD. May result in serious injury or death. Turn off power at the circuit breaker or fuse before installing.

Remove side sections (if ganging devices)

When combining controls in one wall box, remove all inner side sections before wiring (see below). Use pliers to bend each side section back and forth until it breaks off. No derating is required.

Determine wiring type (ONLY ONE FAN CAN BE USED PER CONTROL)

For fans switched from **two** locations:

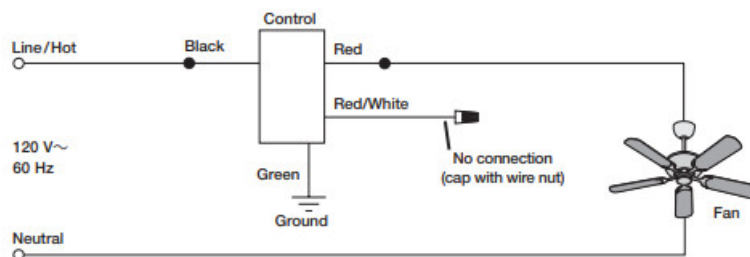

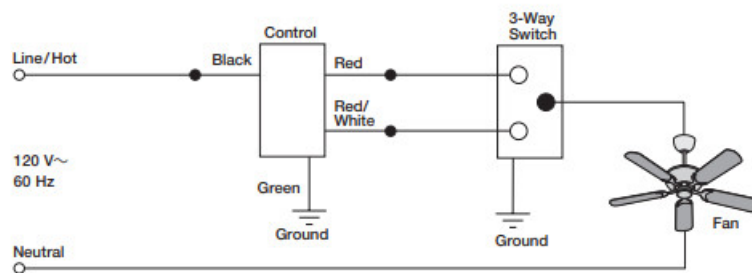

NOTE: Only one control can be used per circuit.

Activate Windows

Remove existing switch and connect the new fan control (appropriately choose ONE of the diagrams below)

Mount the control using the provided screws

Install the faceplate (not included)

Turn power ON at circuit breaker

Installation is complete!

Troubleshooting

Symptom	Solution
Toggle works in reverse (for a single pole).	<ul style="list-style-type: none"> • Verify Step 5A.
The fan doesn't run at full speed.	<ul style="list-style-type: none"> • Verify that fan is set to the highest speed. See Step 1.
