Operation Instructions

On/Off: Press and release the button on the side of the light to turn the light on and off.

Cycle Modes: Press the button on side of the flashlight quickly to cycle through modes (High/Medium/Ultra-Low). If the light remains in a single mode for longer than 3-5 seconds the next press of the button will turn the light off. Light automatically resets to High mode when turned off.

Hidden Strobe On/Off: Press and hold the button for 3 seconds to activate the hidden strobe. The flashlight will remain in hidden strobe mode until it is deactivated by pushing and holding the button for 3 seconds again.

Battery Replacement

The LP1036 can use 6 or 3 AAA batteries.
To replace the batteries, turn the tail cap counterclockwise to remove it. Tip the light downward to slide the batteries out of the tubes.

	To use light with 6 batteries, insert 3 batteries into each tube (+) side first (batteries will stick out slightly).
	To use light with 3 batteries, insert 3 batteries into just one of the tubes (+) side first.

For best results, we recommend using brand new alkaline batteries that are the same voltage and brand. Re-

attach the tail cap by pressing down and turning it clockwise until tight.
If you know it will be a while between uses, we suggest removing the batteries from the flashlight and storing it in a dry, protected place.

Features

Constructed with aircraft-grade aluminum
Long-range LPE optics
Patented TackGrip rubber grip
Ergonomic side button
Tactical on/button
IPX4 waterproof rating
Runs on 6 or 3 AAA batteries (6 AAA included)
