LUXPRO LP1312R High-Output LED Flashlight

Operation Instructions

On/OF: Press and release the button on the side of the light to turn the light on and OFF

Cycle Modes: Turn ashlight on and o quickly and repeatedly to cycle through modes (High/Low).
Light automatically resets to High mode when turned o for longer than 2 seconds.

If you know it will be a while between uses, we suggest removing the batteries from the ashlight and storing it in a dry, protected place.

Hidden Strobe On/OFF: Press and hold button for 3 seconds to
activate hidden strobe. Flashlight will remain in hidden strobe mode until it is deactivated by pushing and holding

the button for 3 seconds again.

Battery Replacement

The LP1312R uses 9 AA batteries. To replace the batteries, turn the tail cap counterclockwise to remove it. Tip the light downward to slide out the battery case which contains the batteries. Remove the batteries from the case and insert new batteries according to the (+/-) symbols found on the case. For best results, we recommend using brand new alkaline batteries that are the same voltage and brand. Re-insert the battery case into the ashlight. Re-attach the tail cap by pressing down lightly and turning it clockwise until tight.
