ANSI/PLATO FL1 STANDARD

ANSI/PLATO FL1 STANDARD			
			
MODES	LUMENS	RUN TIME	BEAM DISTANCE
Spot Modes			
High	300 lm	3h 30m	100m
Low	100 lm	6h	30m
Strobe	300 lm	--	--
Flood Modes			
White	30 lm	8h 30m	5m
Green	9 lm	26h	3m
Red	2 lm	26h	1m

Operation Instructions

Spot On/Off & Cycle Modes: Press and release the button on the right of the headlamp to turn spotlight on. Press button repeatedly to cycle through Modes (High/Low/Strobe).

Flood On/Off & Cycle Modes: Press and release the button on the left of the headlamp to turn flood light on. Press button repeatedly to cycle through modes (White/Green/Red).

Battery Replacement

The LP346 uses 3 AAA batteries.

To replace the batteries, first locate the plastic tab on the top of the headlamp. Gently push the tab up and outward using your thumb to pop the battery cover loose and open it. Remove the old batteries and insert new batteries according to the (+/-) symbols in the battery tubes. For best results, we recommend using brand new alkaline batteries that are the same voltage and brand. To re-attach the battery cover, press the headlamp housing and battery cover together until it clicks into place. Check that the battery cover is secured by gently tugging on the headlamp straps while holding the main housing firm.

If you know it will be a while between uses, we suggest removing the batteries from the headlamp and storing it in a dry, protected place.
