1. The battery should be removed and put into the battery room of the remote control, according to the logo.
2. Only use the same or the same battery as recommended. 3. Do not mix old and new batteries or different types of batteries.
4. Remove the drained battery from the remote control to prevent battery leakage and damage to the remote control.

Failure symptoms	Cause of failure	Method
No traffic	<ol style="list-style-type: none"> 1. The remote control is not connected to the remote control car. 2. The remote control or remote control car is not properly charged. 3. The rechargeable battery pack is low in power. 	<ol style="list-style-type: none"> 1. Switch on the remote control car and reconnect the remote control. 2. Put the battery into the remote control or remote control car. 3. Charge the rechargeable battery pack.
The vehicle is not controlled remotely close	<ol style="list-style-type: none"> 1. The battery or rechargeable battery pack in the remote control is low in power. 2. There may be interference sources near the site. 	<ol style="list-style-type: none"> 1. Replace the batteries in the remote control with new batteries or charge the rechargeable battery pack. 2. Change of venue.
Exception protection	When the remote control vehicle function is hindered by external forces and cannot complete the full function, or circuit when the battery is short-circuited.	Re-open the power switch and start power protection.

Battery Chargers that use the toy must be checked regularly to prevent damage to wires and other components.
If it is damaged, it must be repaired before it can be used.

1. Can not be close to the source of fire, avoid direct sunlight, high temperature and humidity or long-term placed in the car, can avoid circuit short-circuit, fire.
2. Remove the battery from the remote control when not playing. And the remote control car, remote control back into the box packaging, can avoid in transport or storage damage or deformation.
3. Remote control car should be gently wiped with a damp cloth.

Please do not touch the wheel of the remote control car when the car is moving to avoid injury.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
