Product&Notes

What's in the Box

- Lumary RGBAI Smart Permanent Outdoor Lights

Get Ready

- Know your Wi-Fi network and password.
- Make sure your mobile device is running iOS 13.3 or higher and Android 9.0 or higher.
- Make sure you're connecting to a 2.4GHz Wi-Fi network (Lumary can't connect to 5GHz networks).

Notes

Button Functions:

1. Long press 5s to enter the network configuration mode.

When the factory equipment is powered on, the lights will flicker automatically.

2. Tap the button, the mode is different each time.

3. Press twice in a row: OFF (Open will remember the color or state before the last close.)

(Note: Long press for 5s in any mode will enter the network configuration state.)

Installation Steps:

Install the permanent lights under the eaves to create a wall washing lighting effect.(Recommend)

1. Before installing the permanent lights, please connect each segment of the lights and then power on to confirm if all devices are functioning properly. **Note: Connect first, then power on. Do not connect after powering on to avoid a sudden surge of current that may damage the devices.**

2. When installing the permanent lights, use a sturdy ladder or seek assistance. Avoid installation during rainy weather to prevent accidents due to slippery ladders.

3. Due to the unique packaging of LED and optical principles, it is recommended to install the lights to the left for better light emission angles compared to installing them to the right.

4. Clean the surface of the planned installation area with a cloth or tissue, ensuring it is dry and free from debris. It is advisable to install the eaves lights vertically, maintaining a distance of 5 centimeters from the wall.

5. Peel off the VHB adhesive on the back of the permanent lights. If the eaves are positioned at a right angle to the wall, use equally spaced fixtures to align the lights tightly against the edge of the fixture, and then press it upwards firmly.

6. After installation, use the steel nail cable clips and back adhesive cable clips provided in the accessory kit for securing. It is recommended to use one steel nail cable clip and one back adhesive cable clip to reinforce every two lights. The controller should be fixed to the wall to prevent the top permanent lights from falling due to wind.

7. The connections are made using waterproof connectors;

8. The distance between the centers of the two lights is 40cm, the cable length of the two sides of the control box is 2m, and the first light's external cable length is 20cm.

39 lights:

Power Adapter:

Input: 100-240V 50/60Hz Output: 24V 2.5A

Control Box: Cable length on both ends is 2m each

Permanent Lights: 3*13 LEDs 5.6m of each segment

Accessories: 40 screw clips and 40 back adhesive clips

78 lights:

Power Adapter:

Input: 100-240V 50/60Hz Output: 24V 2.5A

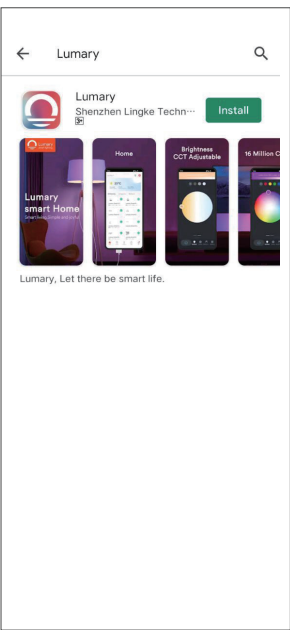

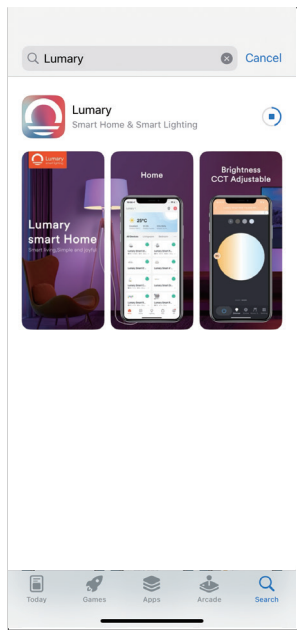

Control Box: Cable length on both ends is 2m each

Permanent Lights: 6 * 13 LEDs 5.6m of each segment

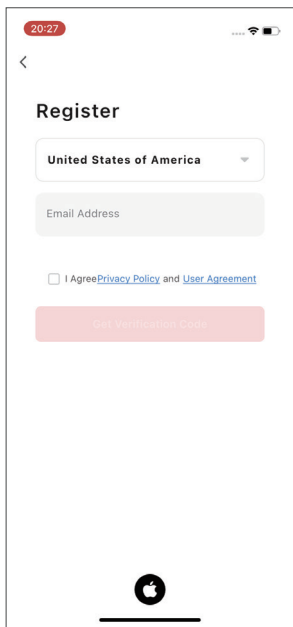

Accessories: 80 screw clips and 80 back adhesive clips

Install the "Lumary" App

1. Find and install the "Lumary" App on Apple Store, Google Play.

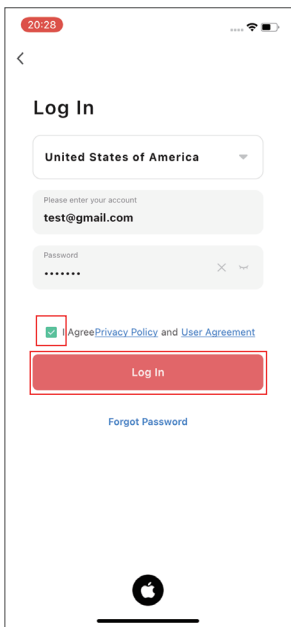

2. Register a Lumary account.

The screenshot shows the 'Register' screen of the Lumary app. At the top, the status bar displays the time 20:27, signal strength, Wi-Fi, and battery icons. A back arrow is in the top left. The title 'Register' is centered. Below it is a dropdown menu showing 'United States of America'. An 'Email Address' input field is below that. A checkbox is followed by the text 'I Agree [Privacy Policy](#) and [User Agreement](#)'. At the bottom is a pink button labeled 'Get Verification Code'. The bottom of the screen features an Apple logo and a home indicator bar.

Enter your email address.

The screenshot shows the 'Log In' screen of the Lumary app. The status bar at the top shows the time 20:28 and system icons. A back arrow is in the top left. The title 'Log In' is centered. Below it is a dropdown menu showing 'United States of America'. A text prompt 'Please enter your account' is above an input field containing 'test@gmail.com'. Below that is a 'Password' input field with masked characters and a toggle icon. A checkbox with a green checkmark is followed by the text 'I Agree [Privacy Policy](#) and [User Agreement](#)'. A red box highlights this checkbox and the text. Below is a red button labeled 'Log In', also highlighted with a red box. At the bottom is a blue link 'Forgot Password'. The bottom of the screen features an Apple logo and a home indicator bar.

Log into the App.

Note: Please select your region and country.

3. Connect

NOTE: Lumary's products can't connect to 5GHz networks.

Steps:

1. Advised to enable Bluetooth, Enable Bluetooth to add some Wi-Fi device easily;

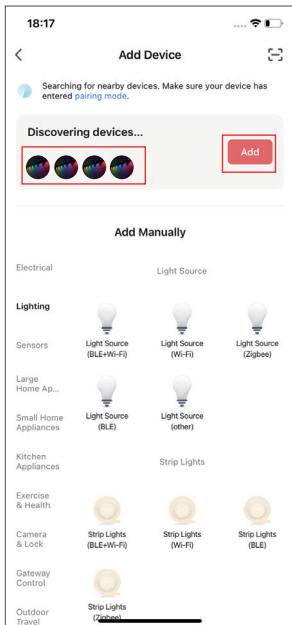

2. Each time the device without distribution network is powered on, confirm the light is breathing or blinking pairing mode;

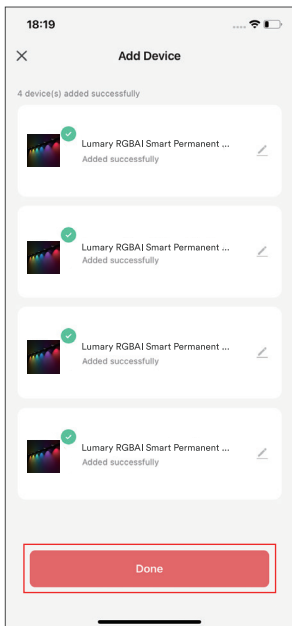

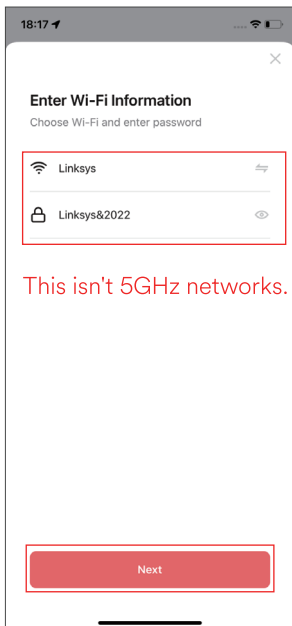

3. Open the Lumary App, In the top corner of the Devices screen, click "+" and select "Add Device" to confirm that the device is paired.

If not, You should long press the button for 5s to make sure the light is blinking.

4. Find the device, choose Wi-Fi and enter password, press "Next". Click "Add", and wait patiently. After that, click "Done", and the device is successfully added to the App.

5. Other ways to add devices, Open the Lumary App>> In the top corner, click "+">> Choose "Lighting">> Select "Light Source (BLE + Wi-Fi)">> Select "AP Mode" or "EZ Mode" in the upper right corner.

4. Troubleshooting

1. Can't connect to your Wi-Fi network.

Make sure you entered the correct Wi-Fi password during the Wi-Fi setup. Check whether there are any Internet connection problems. If the Wi-Fi signal is too weak, reset your Wi-Fi router and try again.

2. If you fail to bind, you will need two phones, one to set the hotspot and the other to connect the hotspot and add the device through the app. If the device is successfully added, the device is normal. The problem may be in the router, you need to check your router Settings to see if there are MAC and DHCP restrictions. Lumary's products do not support 5GHz networks.

3. If you have any questions, You can contact us via our after-sales email: support@lumary.tech or leave a message on our official social media account.

Remote Control

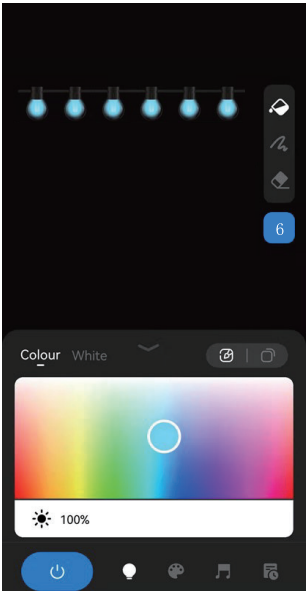

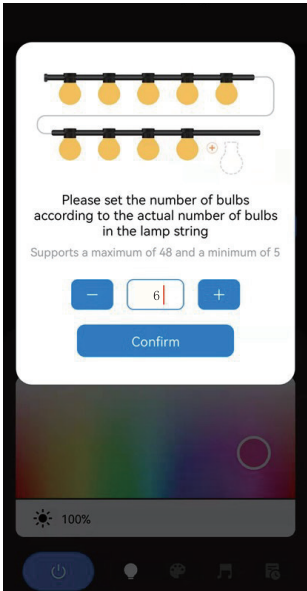

The remote control can control both networked and unconnected devices, when unconnected you need to wait until the device stops flashing and then press the on/off button for 3s (not recommended). For connected devices press the on/off button directly for 3s.

App functions for you

When you enter the App, you can see five sections: On/Off, Colour, Scene, Music, Plan. Detailed function description please check below:

3.1. On/Off. Analog key switch, control the switch of the whole set of string lights.

3.2. Color. After the successful connection, enter this Color UI page by default. This UI page is with 3 icons and 1 digital display.

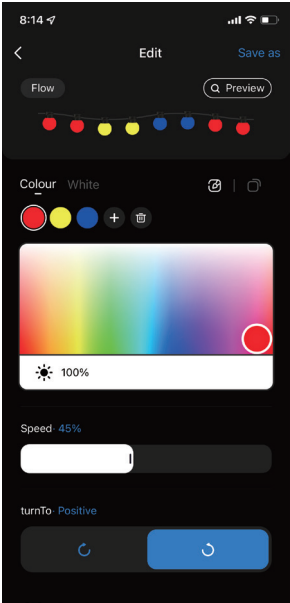

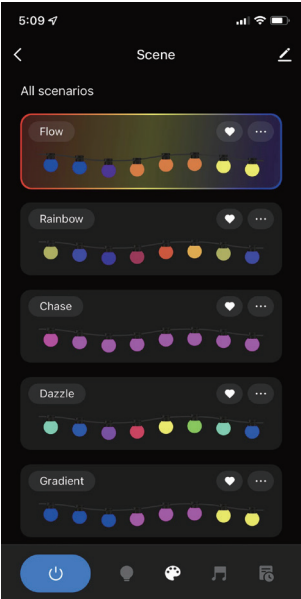

Click on the two ICONS to change to the two color format choices.

3.3. Scene. There're 8 scene modes, namely Flow/Rainbow/Chase/Dazzle/Gradient/Jump/Breathing/Blink, Each mode supports DIY scenes, edit your favorite scenes and collect them. After the collection, it will be at the top of the page, so you can find your favorite mode quickly.

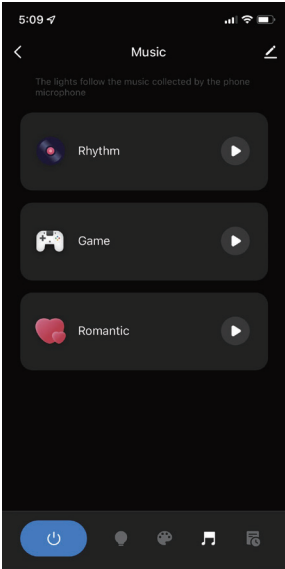

(Note: When you're done editing, be sure to preview and click Save. Next time you open this page, the DIY scene will also be saved.)

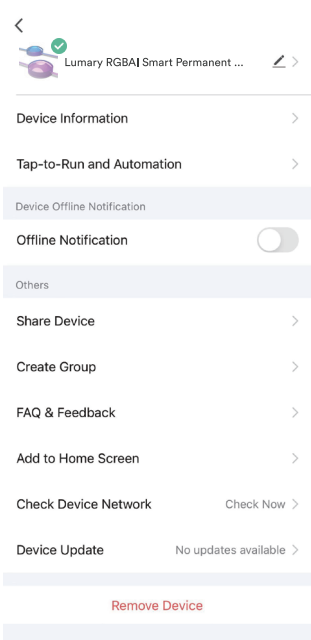

3.4. Music rhythm. When you turn on the music rhythm mode, the light string will rhythm with the following two situations.

- Open the music APP of the mobile phone that controls the light string, click to play music, and the light string will rhythm with the music.
- When the mobile phone connected to the light string is not playing music, the mobile phone will receive other sounds and follow the rhythm.

Tip: If you leave the music rhythm mode, the rhythm will stop.

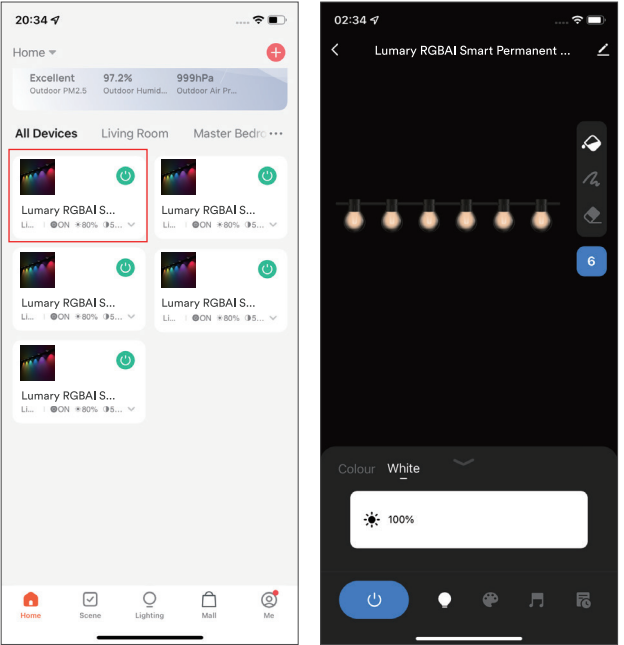

3.5. Plan. The owner can freely set the on/off time of the string light every day.

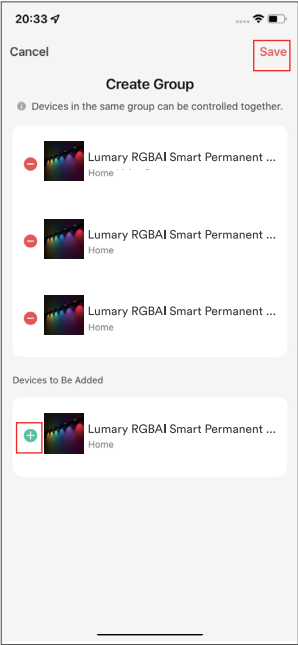

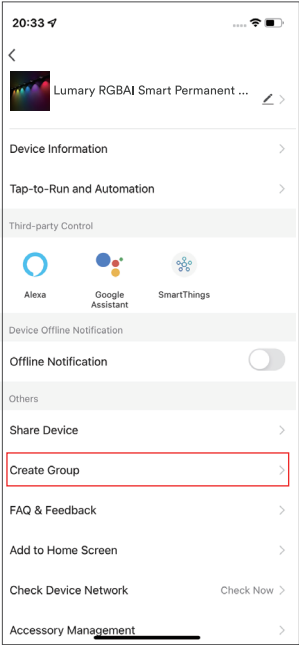

Group Control

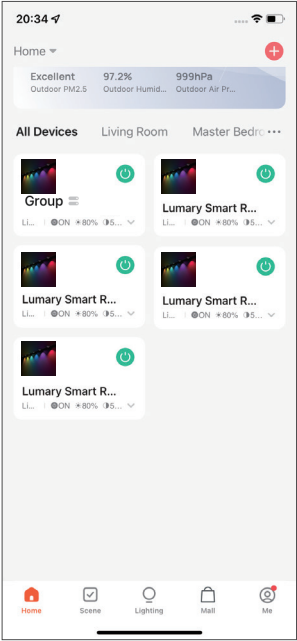

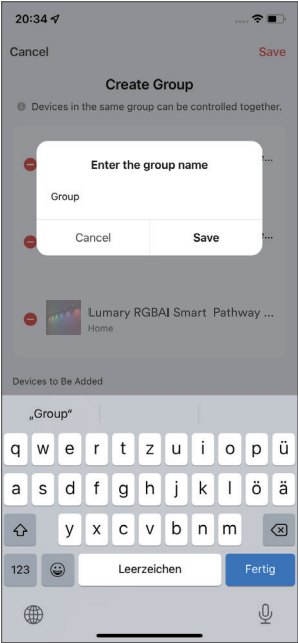

1. Log in to Lumary APP, tap the smart device and enter into, click" ∠ " in the top right corner.

2.Click "Create Group", then select a device and save.

3.You can reset the group name and save it, and the group can control devices.

FAQ

1. What should I do, if I don't have internet access to my Lumary product?

If you do not have a network, you will need two mobile phones, one to set up the hotspot and the other to connect to the hotspot and add the device via the app (refer to the guide).

2.If my Wi-Fi internet goes down, will Lumary App still work?

Lumary products need to be connected to Wi-Fi in order to use them remotely, and the device can be controlled simply using the app via the LAN as well as Bluetooth. For example: on, off, dimming, colour temperature, colors.

3. Why does the flickering occur with Lumary products?

Lumary's products are factory set to the default network configuration. If the device has not been connected to the network, it will flash for three minutes each time it is powered on. If the device is connected to the network, it will stop flashing and will automatically connect to the network when it is switched off and on via the wall switch after 15 seconds.

4.Can I share with family and friends?

Yes, you can share access to your Lumary devices. In the Lumary App, from your main device list, click on one of the devices press the "..." button on the top right and click on "Share Device" to give or revoke sharing permissions. In order to share, the other user should already have downloaded the Lumary App and registered an account.

5.Can I group multiple Lumary devices together?

Yes, you can group multiple same-type devices by room, location, or wherever you want. The same devices can be in multiple groups. For example, if you create a group for "Bedroom" and another group for "Entire House", your Bedroom lights can be included in both groups. From your main device list, click on one of the devices you want to group, press the "..." button on the top right for advanced settings, and click "Create Group". You'll be able to name a new group and choose which devices you'd like to group together.

6.My Lumary device has a funny name. How do I rename it?

From your main device list, click on one of the devices you want to rename, press the "..." button on the top right for advanced settings, and click "Modify Device Name" (or "Modify Group Name"). You'll be able to choose a more familiar name.

7.What's the wireless range?

The range of your home Wi-Fi is heavily dependent on your home router and the conditions of the room. Check with your router specifications for exact range data.

8.What should I do if the device appears offline or is unreachable?

Make sure your Wi-Fi router is online and in range, and check that you have the latest Lumary functionality by clicking "Check for firmware update" in your device settings. Try to turn off the device >> clear the application cache >> reboot the router >> turn on the device after one minute and check and confirm the device status after five minutes.

9.How many devices can I control?

- The maximum number of timers that can be added to a single device: 30
- Maximum number of devices that can be added in a single home: 120
- The maximum number of Tap-to-Run that a single home can create: 100
