ANGLE GUIDE AND RIP GUIDE FOR PRECISION CUTS

The QEP® 22400Q is ideal on job sites where space prohibits the use of a large wet saw. Users will be surprised by the strength of its true 3/5 HP High-torque motor. This economical, yet powerful saw cuts through ceramic, terra cotta, granite, etc. The water catch system not only reduces water run off, it recycles the water back into the reservoir, minimizing fill frequencies.
