African Fig Cyathistipula - African Fig

Plant Care Information

- For optimal performance, keep at 60-85°F (15-29°C).
- Protect furniture when watering.
- Feed once per month at half strength when plant is actively growing.
- Ficus cyathistipula can be grown in an indoor plant mix, but adding a bit of perlite to the mix will really help it thrive.
- Water when the top 2-3 inches of soil are dry.
- Dust its broad leaves so they can continue to photosynthesize properly, even in lower light conditions.
