App Download

1. You can search for "FitCloudPro" app in App Store / Google Play / Baidu Assistant to download.
2. Open the watchAPP sownload interface, use the scan function, scan to download or scan the QR code attached to download.

Note: After successful download and installation, please follow the interface instructions to register and log in for better experience and use of the product.

Connect

Pair with the watch using the "FitCloudPro" app on your phone.

How to connect:

Open APP >> „Device“ >> „Add device“ >> "Start Search">> Select the model and connect, wait for a while to complete the pairing.

Note:

1. In order to connect the watch and the phone successfully, Bluetooth must be enabled on the phone.
2. When using an Android phone, the user must grant location permission and enable the location information function on the mobile phone system, otherwise the device may not be found.

Firmware Upgrade

The APP will prompt a new firmware version, and the user can enter the APP interface and select firmware upgrade.

Upgrade Notes:

1. The update operation can only be performed when the watch's battery level is above 60%.
2. During the update process, the mobile phone interface will display an update progress bar, please do not perform any operations on the watch, wait until the mobile phone prompts that the update has been successfully completed, and the watch automatically restarts before starting the watch.

Waterproof Instructions

Waterproof grade: 3ATM

The waterproof performance of this product is not permanent and may weaken with the passage of time.

Add:

It is not recommended to wear in a hot bath. The molecular radius of water vapour produced when washing with hot water is small and easily penetrates into the crevices of the watch. As the temperature drops, it gradually condenses into water droplets, which damages the watch's circuit board and subsequently damages the watch.

Function Introduction

Smart Watch Support:

Bluetooth call, message notification, blood oxygen detection, blood pressure detection, heart rate detection, sleep detection, breathing exercise, exercise mode, remote control photography, music control, etc.
