

Micro music system

- Bluetooth®
- CD, MP3-CD, USB, FM
- USB port for charging

BTM2310/12

Relax to great music

Obsessed with sound

Listen to your smartphone tunes, stream your music library over Bluetooth and play MP3-CDs on this compact, all-in-one Philips music system. Charge all your smart devices, from smartphones to tablets with the built-in USB charging port.

Benefits

Enrich your sound experience

- 15 W maximum output power
- Bass Reflex Speaker System delivers a powerful, deeper bass
- Digital Sound Control

Enjoy your music from multiple sources

- Wireless music streaming via Bluetooth
- Play MP3-CD, CD and CD-R/RW

- USB Direct for easy MP3 music playback
- Audio-in for portable music playback

Easy to use

- Digital tuning with preset stations for extra convenience
- Motorised CD loader for convenient access

PHILIPS

Features

Wireless music streaming

Bluetooth is a short range wireless communication technology that is both robust and energy-efficient. The technology allows easy wireless connection to iPod/iPhone/iPad or other Bluetooth devices, such as smartphones, tablets or even laptops. So you can enjoy your favourite music and sound from videos or games wirelessly.

USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

Audio-in

The Audio-in connectivity allows direct playback of Audio-in content from portable media players. Besides the benefit of enjoying your favourite music in the superior sound quality delivered by the audio system, the Audio in is also extremely convenient as all you have to do is to plug your portable MP3 player into the audio system.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimise the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by causing the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a completely new dimension of deep bass.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set balanced, clear, powerful, warm and bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalising technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.
