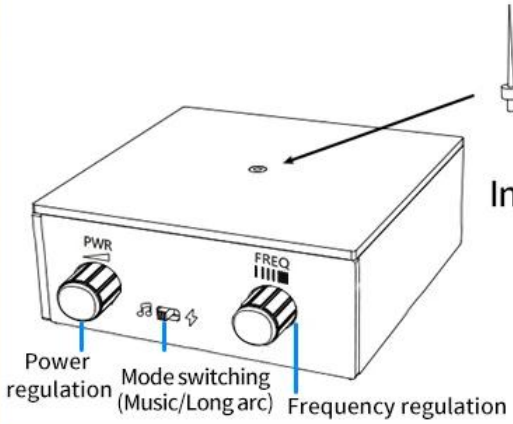
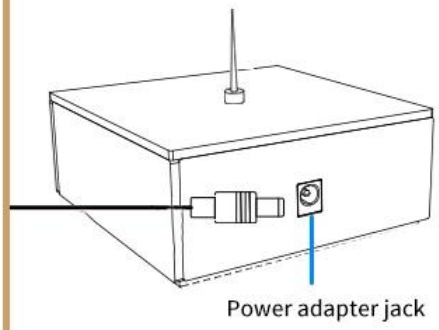
Teaching procedure

1



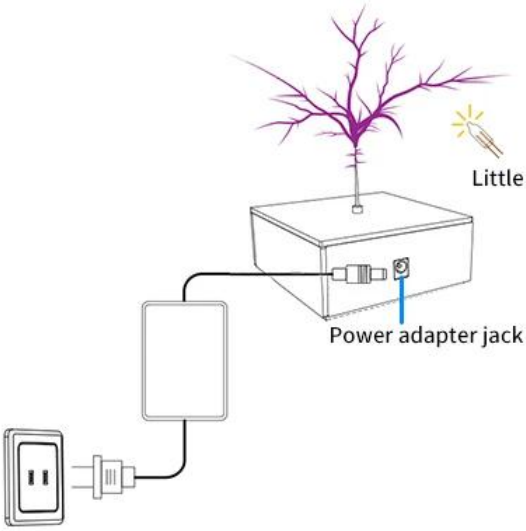
Install the discharge needle and screw it on the fixing hole

2



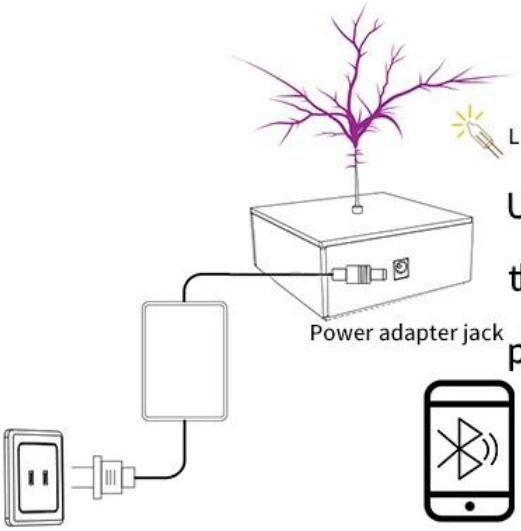
Plug the power plug into the host

3



Plug in socket
Connect the power supply to the host
Then the power supply is switched on to run

4



Use your mobile phone to search for Bluetooth and connect, then you can play music in music mode (when playing music, please turn the phone volume to the maximum and turn up the power knob).

Ordinary music effect is not good, it is recommended to use square wave music, square wave music can contact customer service to receive
