APPLICATION

POC bicycle helmets have been developed for the serious cyclist of Western Europe using the latest helmet technology available. They comply with one or more of the following standards:

EN 1078:2002+A1:2006 – Standard specification for helmets for people cycling and for users of skateboards and roller skates.

U.S. EPC 1078 – Standard specification for bicycle helmets for persons aged 5 and older.

ASTM F2040-15 – Standard specification for helmets used for downhill mountain biking.

ASTM F2002-15 – Standard specification for helmets used for BMX racing.

ASTM F2044-12 – Standard specification for helmets used by users of high-speed electrically powered bicycles.

THIS HELMET CONFORMS WITH THE REGULATION (EU) 2015/2101 AND THE REGULATIONS ON PERSONAL PROTECTIVE EQUIPMENT, AS APPLICABLE TO APPLY IN EU.

The certification label inside the helmet identifies the individual homologation elements and provides protection against any counterfeitable type of impact or excessive force, but they considerably reduce the risk of injury from falls and collisions and are required to in the course of normal use.

The ECE Type examination certificate for this helmet is issued by the Dutch Institute of Testing (TNO) in the Netherlands, The Netherlands.

The ECE Type examination is conducted by the following institution: TNO, Centre for Transport Research, (Lelystad, The Netherlands).

The ECE Type examination is conducted by the following institution: TNO, Centre for Transport Research, (Lelystad, The Netherlands).

INSTRUCTIONS FOR USE

The helmet correctly adjusted will fit you well. Try different sizes and select the model that best suits your head and is comfortable on the head.

1. Position the helmet on your head so the intended protection is preserved. It should cover the forehead, and not be pushed too far towards the back of the head. It is important the helmet sits securely enough and does not slide up over forehead nor slip down over your face, see Figure 1 for guidance.

2. Use the chin strap to adjust the helmet to the position of the fit system.

In the smaller mouth circumference, turn the side flap back up slightly.

Get the most out of your adjusted by a comfortable fit. The elasticated section of the adjuster means you will only have to find the right fit once.
