

Quick Installation Guide

WS3000
AX3000 Gigabit Wi-Fi 6 Router

<https://app.iiwus.com/>

If your internet source is an Ethernet cable coming from the wall directly instead of a DSL/Cable/Satellite modem, connect the Ethernet cable to the router's WAN port and skip steps 1, 2, 3.

610600xxx

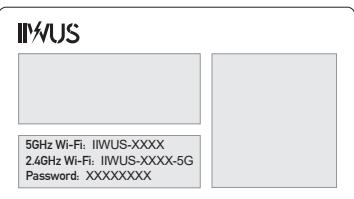

5 Connect your computer to the router (Wired or Wireless).

Wired

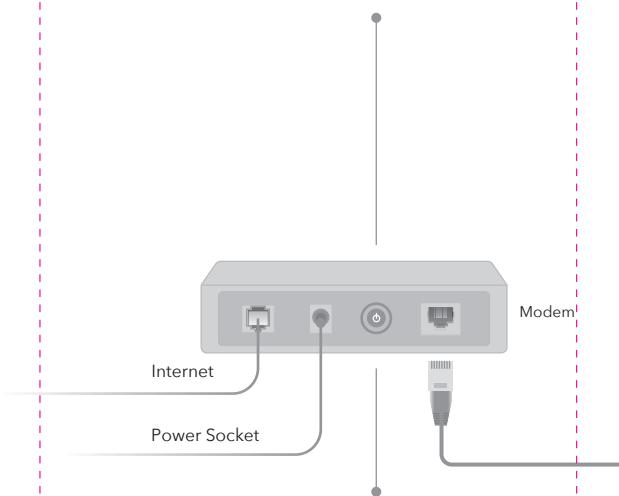

Turn off the Wi-Fi on your computer and connect it to router's LAN port via an Ethernet cable.

Wireless

Connect your device to the router's Wi-Fi using the SSID (network name) and Password printed on the bottom of the router.

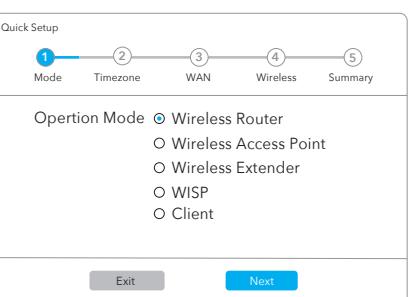

1 Turn off the modem and remove the battery if it has one.

6 Launch a web browser, and enter <http://iiwus.net/> or <http://192.168.10.1/> in the address bar. Create an administrator password to log in.

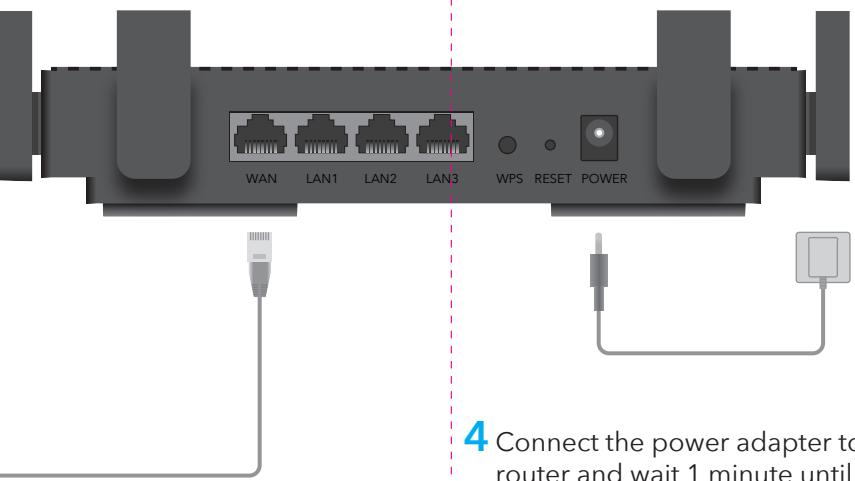

7 The window below will pop up, please follow the step-by-step instructions to set up the internet connection.

Enjoy the internet!

3 Turn on the modem and then wait about 2 minutes for it to restart.

4 Connect the power adapter to the router and wait 1 minute until the system LED changes from flashing to solid on (red or blue), which means the system startup is completed.

LED and Button

	ON	5GHz Wi-Fi On
WPS	Press and hold 1 second to enable the WPS function.	
Reset	Press and hold 2 seconds to reset the router to its factory default settings.	

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules. This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and consider removing the no-collocation statement.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution!

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Exposure

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules.

Guía de Instalación Rápida

<https://app.iwus.com/>

Si su fuente de Internet es un cable Ethernet que viene directamente de la pared en lugar de un módem DSL/cable/satélite, conecte el cable Ethernet al puerto WAN del enrutador y omita los pasos 1, 2 y 3.

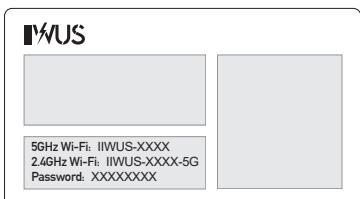

5 Conecte su computadora al enrutador (con cable o inalámbrico).

Cableado

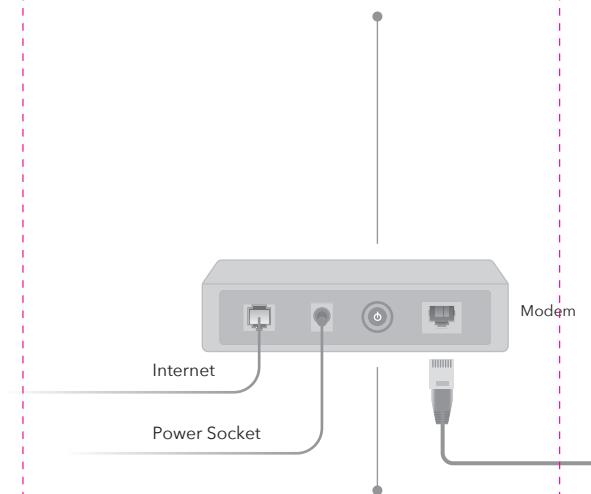

Apague el Wi-Fi de su computadora y conéctelo al puerto LAN del enrutador mediante un cable Ethernet.

Inalámbrico

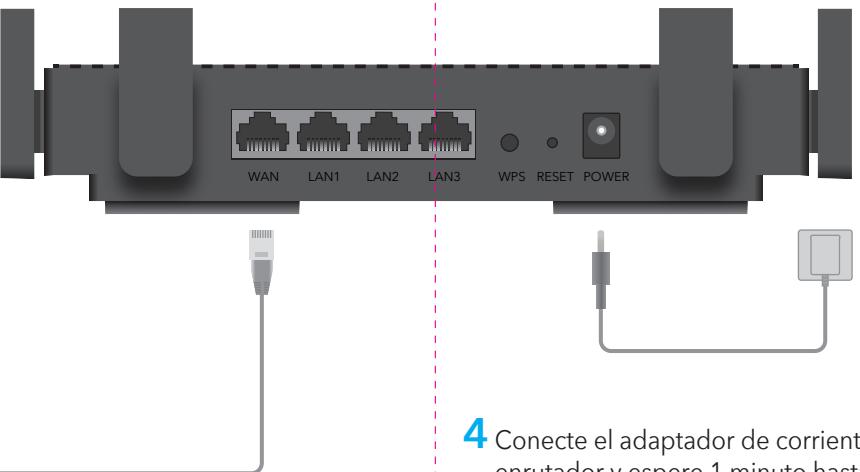

Conecte su dispositivo al Wi-Fi del enrutador usando el SSID (nombre de red) y la contraseña impresos en la parte inferior del enrutador.

3 Encienda el módem y luego espere unos 2 minutos para que se reinicie.

1 Apague el módem y retire la batería si la tiene.

2 Conecte el puerto WAN del enrutador a DSL/módem por cable/Ethernet.

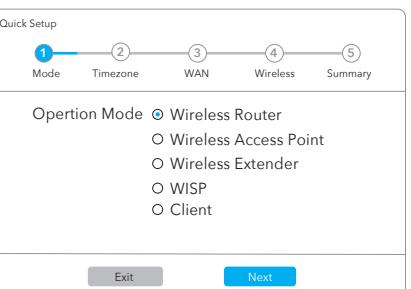

4 Conecte el adaptador de corriente al enrutador y espere 1 minuto hasta que el LED del sistema cambie de parpadear a fijo (rojo o azul), lo que significa que se completa el inicio del sistema.

5 Conecte su computadora al enrutador (con cable o inalámbrico).

6 Abra un navegador web e ingrese <http://iiwus.net/> o <http://192.168.10.1/> en la barra de direcciones. Cree una contraseña de administrador para iniciar sesión.

7 Aparecerá la siguiente ventana; siga las instrucciones paso a paso para configurar la conexión a Internet.

¡Disfruta de Internet!

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

L' émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement Économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- 1) L'appareil ne doit pas produire de brouillage;
- 2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

The device meets the exemption from the routine evaluation limits of RSS 102 and compliance with RSS-102 RF exposure, users can obtain Canadian information on RF exposure and compliance.

Le dispositif rencontre l'exemption des limites courantes d'évaluation dans de RSS 102 et la conformité à l'exposition de RSS-102 rf, utilisateurs peut obtenir l'information canadienne sur l'exposition et la conformité de rf.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

Cet émetteur ne doit pas être co-placé ou ne fonctionnant en même temps qu'aucune autre antenne ou émetteur. Cet équipement devrait être installé et actionné avec une distance minimum de 20 centimètres entre le radiateur et votre corps.

The device for operation in the band 5150 – 5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Les dispositifs fonctionnant dans la bande 5150-5250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux.
