

Performance

Good looks are important, in knives as much as in life! Perfect fits, clean lines, precise grinds and beautiful polishes all add value and satisfaction when you buy a knife. Often, the true beauty of a knife only becomes apparent when the knife is used!

At Cold Steel," we believe that all of our knives must perform. We insist all of our knives deliver extraordinary performance for their asking price — "they must deliver their money's worth".

In order to achieve this goal, we are vitally interested in all the elements that are critical to performance. When it comes to the blade, these include profile, thickness, blade geometry, edge geometry, steel and heat treatment. Every one of these factors is studied in minute detail to arrive at the optimum combination for a specific use. If the knife is a folder, we concentrate on the locking mechanism to ensure the strongest, safest construction. For handles, we strive to develop the perfect mix of materials and ergonomics to offer the most comfortable secure grip available. Above all, we TEST what we make! Rigorous testing is the only way to ensure we get the level of performance we demand.

Steel and Heat Treatment

San Mai®

San Mai® comprises of three layers of expertly laminated stainless steel combined in one blade.

Hard carbon steel is sandwiched between two layers of tough lower carbon spring steel, thus maximizing edge holding ability while still being able to withstand impact and lateral stresses.

Produced in extremely small production runs, San Mai® is used on only our most collectible high-end fixed blades, and is a registered trademark of Cold Steel worldwide!

Carpenter CTS®XHP

Carpenter American CTS® XHP is a high carbon, high chromium powdered alloy steel with very impressive edge holding abilities. With an extra fine, uniform grain structure it out performs its ingot-steel equivalents by a large margin. This high performance steel has been used in everything from superior custom kitchen cutlery to surgical tools. It can also be polished to a beautiful satin finish, making it an excellent choice for high end every day carry knives, especially those that require a very fine cutting edge.

CPM-S35VN

An exceptional American super steel, CPM-S35VN is not only very tough and durable but it will take a fine razor sharp edge that will last a long time. An incredibly fine-grained powdered steel with a uniform microstructure, it offers very consistent performance. Durable, reliable, highly corrosion resistant and tough even when honed to a very fine edge, it is a good well rounded steel choice for high-end superior quality custom knives and tools.

AUS 8A

We have been using the same expertly heat treated Japanese AUS 8A steel for nearly 3 decades. This steel has tested amazingly well over the years and has proven to be an excellent steel for working knives — tough, corrosion resistant, with good edge holding and easy to re-sharpen.

Carpenter CTS®BD1

A performance stainless alloy steel from the USA that has seen extensive use in the Military and Defense Industry as well as in Surgical Cutlery and the custom knife industry. BD1 has earned an excellent reputation for edge retention and corrosion / stain resistance.

8Cr13MoV

Possessing very similar properties to AUS8A, 8Cr13MoV is a reliable steel for working knives. This high carbon stainless steel has proven itself to be tough and corrosion-resistant in our tests. Like AUS8A, it boasts good edge holding and is easy to re-sharpen.

SK-5 High Carbon

Japanese high carbon SK-5 is traditionally used for making a variety of hand tools, including chisels and woodcutting saws. With good all-round toughness and excellent edge holding capabilities, as well as excellent abrasion resistance it has stood the test of time and seen use in many countries.

1090 High Carbon

1090 High Carbon Steel is an excellent choice for larger fixed blades. It takes and holds a good edge while remaining tough enough to withstand even our brutal stress tests. A good all-round performance high carbon steel that is very forgiving under shock.

1055 High Carbon

The carbon content and lean alloy of this shallow hardening steel make this a very sturdy material that avoids a lot of the brittleness commonly associated with higher carbon materials.

Particularly suited to blades that require extreme impact resistance it is often seen in high durability large fixed blades and swords.

CPM 3-V

American CPM 3-V can take an extremely fine edge which is highly chip-resistant. In recent years, it has proved very popular with custom knife makers.

Though costly, this modern tool steel is astonishingly tough and exceptionally wear resistant. It is a fine-grained powdered steel, with a very uniform microstructure giving it excellent impact resistance and fine edge holding performance, and making it perfectly suited for larger blades where extreme toughness is required.

German 4116

4116 is a fine-grained stainless steel from Germany often used in the Pharmaceutical Industry and in high end Kitchen Cutlery. Its carbon and chromium content is balanced for excellent corrosion resistance and strength. Capable of taking a very fine, sharp edge, it makes an excellent choice for outdoor hunting applications.

Our 4116 Stainless Steel is sub-zero cryo quenched for markedly increased strength, hardness and durability and superior edge-holding potential.

Warranty

We stand behind our knives and swords 100%. We subject them to the highest standards in the industry and strive to make each as perfect as possible. We warrant that our folding knives, fixed blade sheath knives, and swords are free from defects in workmanship and materials.

This warranty does not cover normal wear and tear, re-sharpening of the blade, damage caused by misuse, lack of normal maintenance, or disassembly.

Remember any knife or sword can break or fail if subjected to sufficient abuse, so please do not use our knives and swords inappropriately and remember no knife or sword should be used as an axe, hatchet, screwdriver, or pry bar.

NEW IRON PROF

Cold Steel, the innovator of product torture-testing, is at it again with IRON PROOF and SWORD PROOF 2018!

Our PROOF video series has chronicled the abuse and hard-use testing of our designs since the company was in its infancy, and we're back with an all new edition featuring our latest and greatest releases, more feats, and a larger cast—including many of our celebrity friends!

Cold Steel's testing methods may seem unorthodox— but without standardized product testing in the knife industry, we had no choice but to blaze our own trail and set the bar. When we first started showcasing and filming tests, we sent shockwaves through the industry. Our efforts to simply prove our goods were durable and safe were met with extreme resistance. But we haven't let that phase us, and our competitors still haven't risen to the occasion.

We test what we make. We test everything in graphic detail. We torture-test our inventions beyond comprehension—because safety and reliability are of utmost concern to Cold Steel. Cold Steel leads the way; with innovations in handle ergonomics, material development, and the invention of the Tri-Ad lock®, which has been proven time and time again to be the safest and strongest folding knife lock on the market.

We don't shy away from discussion of and demonstrations of the tactical, combative use of our knives. As our company president, Lynn C. Thompson is fond of saying; "We were tactical before tactical was cool!" In fact, our proprietary testing methods are now regularly utilized as the standard on popular television shows.

Seeing is believing. Gone are the days of waiting by the mailbox for the latest PROOF video on VHS tape or DVD. Visit Cold Steel's YouTube channel to see PROOF of the entire line in action—anytime, anywhere!

We hope this latest installment in our PROOF video series will prove as entertaining as it is informative, but be warned: This presentation features hardcore cutting tests, torturous abuse and extreme feats that may be too graphic for some people, and viewer discretion is advised.

We believe you will not find stronger or safer knives, swords, and tools on the market. Period.

WATCH ON:

YOUTUBE.COM/CSKNIVES

WARNING:

Any knife can be broken or damaged if subjected to sufficient abuse.

These destructive tests constitute GROSS ABUSE of a knife.

Duplicating these tests or altering your knife will void your warranty.

Cold Steel's warranty covers defects in materials and/or workmanship.

It does not cover abuse, or the effects of normal wear and tear.

DO NOT TRY THIS AT HOME.

The Tri-Ad® Lock

makes the safest, strongest folders on the planet. It's one of many qualities that separates Cold Steel from our competitors.

Our latest improvement is our patent-pending Tri-Ad® lock. Andrew Demko

is the originator of the Tri-Ad's® novel locking mechanism.

The "Stop Pin"...

The cornerstone of the Tri-Ad's® strength, among other subtle refinements, is the inclusion of a new "stop pin" which re-distributes the load of vertical positive and negative pressures on the lock.

The stop pin receives all positive pressure (pressure on the cutting edge) and transfers it into the handle frame and liners where it can be more effectively absorbed.

Negative pressures on the lock produced, for example, by prying, digging, piercing or even abusive spine whacks are redistributed because the stop pin receives the forward pressure from the rocker and transfers it into the liners protecting the rocker and its pivot from

Self Adjusting...

Finally, outside of keeping the lock free from the buildup of pocket lint in the mechanism, the Tri-Ad® lock requires very little maintenance. It's designed to be self adjusting, in the sense that, over time as parts begin to wear, the Tri-Ad's® design will allow it to adapt so the locking bar always wedges deeper in the lock channel between the stop pin and the shoulder of the precision cut tang notch. This feature allows for a very safe and secure lock-up.

Tri-Ad[®] Lock Strength:

NEGATIVE PRESSURES on the lock are transferred to the rocker, pushing it forward into the blade tang. The stop pin effectively absorbs most of this force and re-distributes it into the frame

Positive Pressure on the cutting edge is transferred from the stop pin into the handle frame and liners where it can be more effectively absorbed.

THE BLADE IS SHOULDERED AROUND THE STOP PIN FOR INCREASED RESISTANCE TO WEAR AND TEAR. THE STOP PIN BUFFERS AGAINST, AND REDISTRIBUTES THE FORCE PRESSURE FROM THE BLADE.

THE FULL SURFACE OF THE LOCK AND BLADE TANG MATE FLUSH TOGETHER. THE SLIGHTLY ANGLED LOCK TENDS TO FORCE THE LOCK INWARDS UNDER PRESSURE INSTEAD OF OUTWARD.

EXTRA SPACE IS PROVIDED TO ALLOW THE ROCKER TO FALL DEEPER INTO THE NOTCH OVER TIME IN RESPONSE TO NORMAL WEAR AND TEAR.

THE ROCKER PIN HOLE IS MADE WITH EXTRA SPACE ON EITHER SIDE TO ALLOW FOR SELF ADJUSTMENT.

62PV1 Frenzy I (OD Green) 62PV2 Frenzy II (Blue) 62PV3 Frenzy III (Grey)

Ti-Lite[®] Series

Cold Steel's Ti-Lite® folding knives evoke the sleek speed and rebellious lines of the classic 1950's switchblade.

They feature sharp and strong bead-blasted blades, and CNC milled 7075 Aluminum handles which are finished with a protective EDP (Electric Discharge Plating) coating.

The Ti-Lites are equipped with our patent pending, stainless steel leaf spring locks (proven, in our tests, to hold upwards of 145 lbs).

ur tests, to hold upwards of 145 lbs).
For ease of carry, the Ti-Lites come equipped with

a small, but unobtrusive steel pocket clip, and can be opened rapidly by using the thumb studs or by snagging a quillon on the edge of your pocket as you draw your knife out.

G-10 Ti-Lite®

Often imitated, but never equaled, the Ti-Lite® (designed by the late, great Phil Boguszewski) is a masterpiece of performance and style.

Now, one of our most popular and enduring tactical folders is available with some of the highest quality

with some of the highest quality

American made materials on the market!

This new Premium format Ti-Lite® features an American CTS XHP powdered steel blade for superior edge holding potential and a rich black DLC (Diamond Like) coating for new levels of durability and scratch resistance.

The eye-catching curved quillions add to its rebellious switchblade-like design, while also facilitating a lightning fast draw. Simply snag one on the corner of your pocket as you draw the knife, and the Ti-Lite's® razor sharp blade can be brought into play in the blink of an eye!

Each G-10 handle is painstakingly 3D CNC machined and milled at great expense, providing an incredibly comfortable grip however you choose to hold your knife.

Furthermore, the premium G-10 offers an exceptional strength to weight ratio, rivalling even our aluminum handled model while being a fraction of the weight!

Sleek, lightweight and undeniably good looking, the G-10 Ti-Lite® brings a whole new level of performance to an already legendary line of blades!

Custom knife maker Andrew Demko said: "If you look at this from a technical standpoint, when you are talking about pure performance, you can't make this new Ti-Lite more top-of-the-line! It's taking a classic knife by an awesome custom knife maker to a whole new leve!!"

Zy-Ex[™] Ti-Lites®

Our Zy-Ex[™] Ti-Lites® mimic the look of their more expensive counterparts almost exactly — but instead of 7075 Aluminum, we use 43% glass filled Zy-Ex[™] for the handles, and Japanese AUS 8A instead of American XHP for the blades.

The resulting knives are extraordinarily lightweight, while remaining remarkably strong, sharp and good looking - at a price almost everyone can afford!

Counter Point Series

We spent years exploring high-end boot knives, and now we've applied that knowledge to a folding knife — the Cold Steel Counter Point. The Counter Point is available in three blade sizes - 3", 4" and 6". Their stiletto-inspired spear point blades have a distinctively pronounced false edge and a lustrous satin finish, combining to make a blade that not only looks great, but delivers a show stopping performance! The Counter Point is highly corrosion and stain resistant and takes a very sharp and durable edge. The Counter Point's handle is made from Griv-Ex™ and reinforced with heat treated aluminum liners, making it not only very strong, but comfortable and secure in almost any grip imaginable. For added strength and safety, we equipped the Counter Point with our famous Tri-Ad® locking

Tiger Claw

Created by custom knife maker Andrew

Demko, the Cold Steel Tiger Claw is overflowing with design innovations! The blade was designed following Andrew Demko's extensive testing as a Journeyman Electrician and Engineer. When developing his own hand-made knives he made a Karambit-Hawkbill hybrid blade that could cut rope, cable, wire and anything else his vocation threw in his path. This knife served him well through years of hard use, and, when tasked by Cold Steel to develop his own take on a folding Karambit; this blade shape immediately came to mind.

Replicating Andrew's original blade design in premium American CTS XHP steel, the Tiger Claw offers the tactical performance of the Filipino and Indonesian fighting Karambit, coupled with the utility and function of a working man's Hawkbill.

With the Demko thumb-plate, the Tiger Claw offers a fully ambidextrous fast draw from the pocket either in a saber grip or a traditional blade-down Karambit grip, deploying the blade with lightning fast ease! Made with his signature minimalist style, Demko's Tiger Claw features a slim CNC machined US G-10 handle, a black aluminum pommel ring, and our exclusive Tri-Ad® locking system.

Swift Series

The Cold Steel Swift is a sleek, fast and good looking assisted-opening folder designed by custom knife maker Andrew Demko.

Featuring patent pending Flash-Tek technology, the Swift has the astonishing speed and smoothness of an assisted opening knife, but with the strength you have come to expect from Cold Steel and from Andrew Demko! Available either two-tone satin polished or black DLC coated, the Swifts beautiful blade is manufactured from American CTS XHP Alloy and honed to a fine cutting edge. The modified spear point has a distinctive curved spine which not only reduces the knife's profile when closed but creates a comfortable and functional place for your finger or thumb for detail and precision work. The Swift also features ergonomic 3-D CNC machined and bead blasted G-10 handles that are a joy to hold and easy to use, with or without gloves.

Our "XS" (Xtra Safe) safety keeps the blade securely locked when closed, while also acting as a secondary locking feature for even greater levels of strength when open!

This incredibly comfortable, lightweight and fast action folder is sure to become a much loved every day carry choice!

NEW Storm Cloud

Sometimes you need the performance of a big tactical blade, but don't want to alarm the general populace when you snap it open. With that in mind, Mike Wallace developed the Storm Cloud, a strikingly handsome folder featuring a 3 ½" American-Made CPM20CV powdered steel blade. Unlike the Americanized Tanto Cold Steel is known for, the Storm Cloud boasts a modified Tanto that places the point closer to the center of the blade for increased accuracy and penetration when piercing. To compliment this exceptional blade, we've crafted a sumptuous G-10 handle featuring a silky-smooth overlay of carbon fiber that allows the knife to effortlessly transition from the boardroom or church pew to the field and back again. But don't mistake this knife for just another pretty face, it's a highly capable thoroughbred!

Weighing in at only 3.5 ounces, it's as light as a cloud and, due to its interchangeable pocket clip, it's fully ambidextrous so it can be easily carried without adding bulk or weight. When it comes time to unleash the Storm Cloud, you can rely on lightning fast pocket deployment, courtesy of Andrew Demko's patented Thumb Plate. Safety and reliability come standard with the Storm Cloud, which is outfitted with the Cold Steel® Tri-Ad lock®, the strongest and safest folding knife lock available.

The original Cold Steel Black Talon was a handmade, limited edition folder, featuring a modified curved talon blade* made from Japanese San Mai® steel. It had a sleek titanium frame with G-10 scales and - for its time - a very strong locking mechanism. Our fans begged us to release a revised version of this classic blade, so we happily obliged, with a re-designed knife that we have christened the Black Talon II! A design collaboration between Lynn C. Thompson and Andrew Demko, the Black

Talon II features the distinctive down-swept point and pronounced belly of the original, but with satin polished American CTS XHP Alloy steel and a re-designed tip for added durability. The American made G-10 scales offer maximum retention and grip even in cold or wet conditions while still being kind on your clothing when drawn from the pocket. Featuring our high performance

Tri-Ad® locking mechanism for added safety, this thin, lightweight and eyecatching knife is sure to be the talking point of anyone's collection! *USED WITH THE KIND

Espada Series

Classic Models:

We have never been afraid to break with convention. That's why, when everyone else in our industry made the smallest, flimsiest, dainty little knives that they could, we released a series of blades that could only be described as one thing - pocket swords! The Cold Steel Espada was inspired by the classical Navaja knives of Spain, but was utterly modern in both appearance and materials. These mega-folders took the market by storm! A design collaboration between custom knife maker Andrew Demko and Cold Steel President Lynn C. Thompson, our Espadas are available in two sizes to suit both the bold and the boldest of individuals!

Despite their imposing size, our Espada are expertly designed to fit comfortably and discreetly in your pocket. You'll soon forget that you are carrying such a large and impressive blade. Equipped with the patented Demko Thumb Plate, the Large and Extra Large Espadas can be snagged on your pocket, opening the knife as you draw it - and opening in the blink of an eye! The Espada's beautiful blades are made from premium American CTS XHP Alloy Steel - chosen for its ability to not only take a super-fine cutting edge, but to hold it for an exceptionally long time. They also feature expertly polished G-10 scales and mirror polished 7075 Aluminum bolsters and

Each Espada is equipped with our patented Tri-Ad® locking mechanism, proven to have amazing shock resistance and strength. In our own notoriously brutal product testing, the XL Espada was not only capable of holding 600 lbs of free hanging weight, but we even used it to support a hanging engine block!

G-10 Espadas

Our popular Espada series is also available in a slim-line, tactical "blackout" edition. Featuring a hard-wearing DLC coated black blade and G-10 handle scales.

Colossus

Designed by custom knife maker Mike Wallace, the Colossus is quite simply a cutting machine!

Its extra-broad blade is fully flat ground, with a continuous curve that facilitates amazing shearing cuts!

Made from premium American CTS XHP steel, this beast of a blade is just perfect for everyday utility use and cutting chores. Zipping through even tough material like a hot knife through butter!

The 3D CNC machined textured, and stippled twotone G-10 handle is not only incredibly comfortable both in the hand and in the pocket, but it also houses what is arguably the strongest lock in the industry! The Cold Steel Tri-Ad® has proven itself time and time again as an unbelievably strong and safe locking mechanism — a perfect choice for a knife with this much cutting potential!

Available with either a rich satin polish or deep black DLC (diamond like) coating, the Colossus is sure to become your favorite knife for everyday cutting tasks.

Ultimate Hunter

A design collaboration between custom knife-maker Andrew Demko & Lynn C. Thompson, the Ultimate Hunter represents the culmination of almost 3 years of design evolution.

Exhaustively field tested on 4 continents - the Ultimate Hunter has proved its worth time and time again!

Made from American CTS®XHP steel with a Rockwell hardness of 60-61, the Ultimate Hunter is hand-ground to a razor edge that will last an amazingly long time.

The heavily bead blasted, CNC machined G-10 handles are comfortably smooth, while still giving a very secure, safe grip.

Equipped with a super-strong Tri-Ad® locking mechanism for extra safety, the Ultimate Hunter is a pure thoroughbred hunting/outdoorsman's blade that also makes an excellent everyday carry knife practical, functional and incredibly capable!

NEW Bush Ranger

Longtime Cold Steel customers may remember the original Bush Ranger, a fixed-blade field knife from years past that was designed by Lynn C. Thompson. One of its major strong-suits was its extremely comfortable handle. Mike Wallace drew inspiration from that knife to create a folding field knife that also feels great in the hand for extended periods of time without causing fatigue. The new Bush Ranger is perfect for the hunter or survivalist who wants something midweight, yet is a real workhorse. While designed for tough work in the field, it's equally at home in a pair of jeans or slacks for everyday carry (EDC). If you like having lots of choices when you carry, the Bush Ranger's got them; from a lanyard hole, to its ambidextrous pocket clip options, and the ability to easily deploy from your pocket thanks to Andrew Demko's patented Thumb Plate. You can be sure your fingers are safe no matter the task at hand, as the Bush Ranger features Cold Steel's Tri-Ad lock, the strongest and safest folding knife lock on the market. Featuring a 3 1/2" American-Made S35VN Sheffield clip point blade and a CNC machined American G-10 handle, this premium folder will

proudly give you many years of service.

SR1 Series

The Cold Steel SRK (Survival Rescue Knife) has been a flagship blade in our line-up for over 25 years. The knife of choice for many in the military, it remains the standard issue fixed blade of the Navy SEALs during BUDS training to this day.

When we asked custom knife maker Andrew Demko to develop a high-end tactical folding knife for military application, he took his inspiration from our SRK! The SR1 features Andrew's signature minimalist style, without flourishes or embellishments, just pure functional, practical design.

The SR1 and the new SR1 Tanto are made for work. Crafted from American CPM-S35VN premium powdered steel, both are heavy duty work horses, designed for the harshest and unforgiving environments.

A good blade needs a good handle, so the SR1's handle is made from premium G-10 with heat treated nested steel liners. With a coarse-textured surface for a secure grip even in cold, wet conditions, and expertly contoured to allow for a comfortable and safe grip even while wearing heavy gloves.

For added reliability and peace of mind, we equipped the SR1 with our Tri-Ad® locking mechanism - proven over time to weather the worst abuse, with unparalleled shock and impact resistance - making this knife the ideal choice for a survival rescue blade.

The Cold Steel AK-47 has proven to be exceptionally popular with Military personnel and Law Enforcement professionals, and with good reason! It features a solid 6061 Aluminum pommel and an American CTS®XHP Alloy Steel blade, vacuum heat-treated and sub-zero quenched for maximum toughness, and hollow ground for an edge that has to be felt to be believed.

The AK-47 blade is also DLC (Diamond Like) coated for superior corrosion and abrasion resistance. It has a high quality G-10 handle that offers an incredibly secure grip even when wearing thick gloves or working in cold or wet conditions, plus, it is equipped with our Tri-Ad® lock.

The Tri-Ad® is arguably the world's strongest locking mechanism. With a rock-solid lock-up and extreme shock resistance - two features of particular concern to our modern Military, who require dependable tools for the worst possible situations!

58TLCAK AK-47

Finally, to assure fully ambidextrous and fast deployment, each AK-47 features our patented thumb plate, allowing the knife to be drawn and simultaneously opened by snagging it on the edge of a pocket.

American Lawman

Cold Steel's American Lawman is named in honor of, and expressly designed to serve, our brothers and sisters in Law Enforcement. This rugged knife is designed to perform in the most extreme environments yet still remain comfortable to use and easy to carry. The drop point blade is big and sharp enough for almost any task yet remain's "Civilian Friendly" in appearance. Made from high performance American CTS®XHP Alloy steel and hollow ground to a thin, hand-polished edge, each blade is also DLC (Diamond Like) coated for added endurance and corrosion resistance.

The Lawman's handle is also designed to be as versatile and user friendly as possible. Made from G-10, it is contoured for grip security in even the worst conditions.

A lock failure on your folder is incredibly dangerous - but if the lock fails on a police officer's knife in the line of duty, it could be disastrous! That's why we have equipped the American Lawman with our Tri-Ad® locking mechanism. Designed to withstand terrific impact forces and shock, it has passed some of the most gruesome torture testing in the industry.

Code 4

When developing the Cold Steel Code 4, our aim was to create an ultra-thin, ultra-light, highly functional utility knife that is a breeze to carry.

There is great comfort to be gleaned from knowing you are carrying a good knife, and many of our friends in Law Enforcement talk about how they're always looking for that one reliable, lightweight blade that can become a permanent part of their everyday load out. We believe that our Code 4 is destined to become that knife!

It won't weigh down your uniform or provide unnecessary bulk. So it's always there when you need it!

Available in a variety of blade configurations, with ambidextrous pocket clips and thumb studs, each Code 4 features sturdy, hard-anodized gun metal grey 6061 Aluminum handles, our world-renowned Tri-Ad® locking mechanism, and high satin polished, razor sharp USA CTS®XHP blades.

Night Force

The Night Force is the perfect balance between an elegant "Gentleman's carry" pocket knife and a tactical EDC blade.

Made in Italy in limited numbers, the Night Force is undeniably stylish, with the sleek lines and premium materials you would expect from a top-of-the-line every day carry knife, but built with the performance and sensibilities of a tactical folder!

The Night Force's beautiful clip point blade is made from lustrous contrasting rose-patterned Damascus DSC® steel (comprising of Bohler N690 and Buderus Nitro B), and equipped with our HTR™ opening mechanism, allowing for a very positive ambidextrous grip on the knife when deploying the razor-sharp blade.

The lightweight ergonomic handle is made from a beautiful black G10 / Carbon Fiber laminate, making the Night Force an incredibly comfortable knife to carry all day without compromising on grip and functionality.

The Night Force's G10 back-spacer is designed to protrude slightly from the butt of the knife, making for a very capable less-than-lethal percussive tool, which can be used to focus impact, deliver raking strikes or manipulate limbs for joint locks.

Described by members of our R&D team as "classy tactical", the Night Force is the kind of thin, light and elegant knife you can wear with a suit or in formal clothes, or any time you want a stylish blade as part of your wardrobe - but it is still capable of offering the peace of mind that comes from a truly tactical folder.

4-Max

The 4-MAX was developed as a collaboration between Cold Steel and award winning custom knife maker Andrew Demko. It was produced with one clear goal in mind - to deliver a folding knife with the maximum strength and performance possible within a 4"

Bridging the gap between production knives and expensive custom offerings, the 4-Max is made to Andrew's exact specifications and from the highest-grade American made materials. Its extra wide, drop point stonewashed blade is made from American made CPM 20CV steel, offering a near perfect balance between durability and edge holding performance.

The 4-Max's tumbled titanium liners and back spacers and Cool Grey 3-D CNC machined and bead blasted G-10 handle scales provide even greater degrees of strength! Equipped with the ground breaking Tri-Ad® locking mechanism, this knife is quite possibly the strongest production folder we have ever produced! The 4-MAX has passed

every one of our grueling and torturous shock and impact tests, and then gone on to easily hold over 800 lbs of free hanging weight - with no damage! If you are looking for a highly collectible mega-folder made with the

specifications, tolerances and materials normally only found on a luxury custom knife – then your search is over! Check out the 4-MAX today! The 4-MAX is produced in limited production runs in Italy, using

high-end American materials.

Immortal

Designed by custom knife-maker Mike Wallace, the Immortal is a big, bad and battle-ready tactical folding knife.

The Immortal's blade is ground almost like an extra wide Tanto point, but with an angular chisel ground false edge giving it a distinctive Gladius-inspired shape, while it's contrasting two tone line-grain satin polish further emphasizes those angular grinds making the Immortal really stand out from the crowd.

Equipped with Andrew Demko's patented Thumb Plate, the Immortal's razor sharp American CTS XHP steel blade can be opened and used ambidextrously, or deployed with lightning speed when snagged and drawn from a pocket.

Its deeply grooved and contoured CNC machined G-10 handle scales feature a flared integral finger guard and thumb ramp which offers an extremely secure and comfortable grip even in the worst conditions or when wearing thick gloves.

Furthermore, the Immortal's sturdy 6061 Aluminum back spacer has been designed to protrude slightly from the handle butt, creating an aggressively textured filed pommel that can be used to focus the impact of less-than-lethal percussive blows.

Featuring our Tri-Ad® lock for added strength. shock resistance, durability and security, the Immortal is an unashamedly tactical folding knife that will be the pride of any warrior's collection!

Golden Eye

The Golden Eye is a high performance "EDC" (every day carry) blade. Designed by award-winning custom knife maker Andrew Demko, this elegant, pocket knife is thin and light enough to carry all day.

The Golden Eye's hand-honed razor sharp blades are available with either the iconic Cold Steel American Tanto point or Andrew Demko's signature modified Drop point. Both are line grain two-tone satin polished a costly and time consuming process usually seen on expensive custom knives - making their exquisite grind lines really gleam.

The contrasting brass HTR™ thumb ramp allows for smooth and easy ambidextrous deployment, while adding another element of visual appeal to the blade.

The Golden Eye's ergonomic medium textured G-10 handle scales give an extremely secure and comfortable grip, while their rich forest green complements the steel and brass colors of the blade.

An extra-long, slimline steel clip (with integrated lanyard hole) allows for comfortable and discreet ambidextrous tip-up carry, while keeping the Golden Eye snugly secure in your pocket.

Lastly, we have equipped the Golden Eye with our Tri-Ad® locking mechanism, giving unparalleled security, safety and strength.

Golden Eye Elite

Featuring the same high quality blade steel as the Golden Eye, with the same rich dual-tone line grain finish and contrasting brass HTR™ thumb ramp, but replacing the G-10 handle with costly carbon fiber scales.

Carbon Fiber, with its excellent strength-to-weight ratio, provides a perfect balance between good looks, comfort and class, with impressive durability and all-round toughness. The Golden Eye Elite is an EDC blade that's a perfect choice for when you want to add

that extra level of flash and elegance to your gear without sacrificing performance or reliability.

Lucky Series

The Cold Steel Lucky is our modern re-invention of the classic Gentleman's pen knife. Astonishingly lightweight, it barely moves the scale at a little over one ounce, making it utterly effortless to carry. Use the removable pocket clip to wear it with dress pants or lightweight summer slacks, carry it in a shirt pocket or even use it as a tie clip, it is so thin and light you'll forget you even have a knife - but it's always there when you need it! The Lucky's twin blades (one plain edge, one serrated) are made from premium CPM S-35VN steel, securely nestled between two-tone polished carbon fiber scales - and with an RC of 60-61, the Lucky takes a razor edge that will last! Stylish, unobtrusive, elegant and legal almost everywhere in the world, it's a versatile knife that will serve you well, and look beautiful while doing it!

Lucky One

Our single bladed Lucky is even lighter and more discreet to carry.
Featuring a single razor-sharp plain-edged CPM S-35VN steel blade and feather-light polished carbon fiber scales, this classy pen knife is simply a breeze to carry and wear all day long.

Charm

There is a great deal of truth to the saying "the best knife is the one that you have with you" and while here at Cold Steel we generally advocate "bigger is better" when it comes to blades, there's no denying the usefulness of a small knife that you can take with you virtually everywhere.

The Cold Steel Charm takes micro-knives to a whole new level. This diminutive slipjoint folding knife has an overall length of only 2 7/8" when open, and it weighs barely 0.6 oz! — yet, thanks to its high performance modern materials it's a surprisingly useful and functional daily carry choice!

Made in Italy, the Charm features a hand-honed and hair-shaving sharp CPM-S35VN clip point blade, and a beautiful black Micarta handle with nickel silver bolsters.

It's an ideal choice for a pocket watch chain, necklace, key chain or lanyard. Whether carried in the coin pocket of your blue jeans, tucked into the pocket of your vest or "waistcoat" or worn around your neck on a necklace, the Charm is a handy sharp little tool that is always there when you need it.

A stylish twist on a little blade from classier times. The Charm is a perfect heirloom knife to pass down through the generations.

Khan

The Cold Steel Khan is a lightweight, durable EDC (every day carry) pocket knife designed by custom knife maker Mike Wallace.

It's sturdy 3" blade is made from expertly heat treated cryoquenched Japanese AUS 8A steel, providing an excellent balance between edge-holding and ease of re-sharpening. The Khan's blade is also equipped with the HTR™ - an innovative thumb opening feature designed by Andrew Demko - to allow for a secure and positive grip on the blade for ambidextrous deployment, adding to this tough little knife's practicality and functionality.

The contrasting grinds of the Khan's line-grain satin polished American Tanto blade contrast beautifully with its rich blue G-10 handle scales, bead blasted pocket clip, and Silver Eye, adding good looks and style to this practical utility knife and tool.

Easy to carry, easy to use, and easy on the wallet—the Khan is a knife you'll be proud to carry in your pocket every single day!

Grik

Created by custom knife maker Andrew Demko, the Grik is a pocket-friendly, functional utility and every day carry knife.

The Grik's distinctive modified spear point blade is made from expertly heat treated and cryo-quenched Japanese AUS 8A steel for a perfect balance between edge holding and ease of re-sharpening. A shallow indent in the spine of the blade makes a comfortable thumb stop for leverage when doing hard work, or a rest for your index finger when using the tip for precision cutting.

The Grik's two tone line-grain satin polished blade and contrasting black polymer HTR™ thumb ramp make the knife really "pop" - making it as easy on the eye as it is to use.

But it's the Grik's handle that sets it apart! Made from ergonomically contoured GFN with a replaceable and reversible clip, it's an extremely thin and flat low-profile carry that's easy on your pockets and incredibly discreet.

Furthermore, the Grik's polymer clip is comfortable inhand, negating those "hot spots" that often occur when using a steel-clipped folder for any prolonged length of time. Plus, unlike a steel clip it won't scratch your paint work or tear the leather seats in your car!

Equipped with our Tri-Ad® locking mechanism, that has been proven to offer unsurpassed levels of safety security and strength, the Grik is a tough, practical and functional everyday working tool that you'll find is utterly indispensable.

Thompson Voyager®

Cold Steel President Lynn C. Thompson's passion for knife-training is well known by our customers. A lifelong Martial Artist who still trains at least 16 hours a week, he is dedicated to the pursuit of knowledge pertaining to the combative application of the blade.

From his lectures and demos at the Soldier of Fortune conventions and the Gunsite Academy Edged Weapons Symposiums of the 80's and 90's, to his present day training of members of our nation's military and law enforcement - he has shared his knowledge and experience with some of our nation's most honored and respected tactical experts, and the most common question that they ask is, "Mr. Thompson, what knife do YOU carry?"

As the designer of many of our most memorable blades, and the lead designer of our in-house R&D department, Lynn often switches out between different knives. But one blade has remained a constant favorite of his, the Vaquero!

With its long, wide undulating blade shape, the Thompson Voyager® with its Vaquero style blade has the broad belly and sweeping curves of a kukri, but also the prominent piercing tip of a dagger. Fully serrated, with our signature "grip n' rip" serration pattern

for shearing through tough, fibrous material, the Vaquero is not only a great choice when working with thick rope or abrasive mediums, but a devastatingly effective self-defense tool.

The Thompson Voyager® is strictly limited to 2000 pieces. Each is numbered, with a laser-engraved signature on the blade and unique box hand signed by Lynn.

Featuring our Tri-Ad® lock for strength, an expertly heat treated American CTS®XHP steel blade, and DLC (Diamond Like) coating for superior scratch resistance, the Thompson Voyager® is sure to be a proud addition to your collection!

Steve Austin

Steve Austin is one of the most recognizable wrestlers in the world. His bombastic outspoken character and on-screen charisma has made him more than just a celebrity, but a part of American popular culture!

Behind his larger than life persona, Steve is an avid outdoorsman and hunter, and a lover of MMA and of Martial Arts. His podcast — The Steve Austin Show — has reached a huge audience, with celebrity interviews from the world of MMA, Pro Wrestling, Movies and more.

Steve regularly discusses his love of blades, and as a collector (and user) of edged tools he has amassed a wealth of knowledge and practical experience.

On his famous "Broken Skull" Ranch, he has put a multitude of knives through their paces, and over the years he has learned to truly appreciate a tough, hard-working knife that won't let you down.

We're honored to be the knife brand of choice for Steve Austin, and to develop the quality, hard working tools that bear his name!

Steve Austin's Broken Skull

Named after Steve Austin's famous "Broken Skull" Ranch, these awesome pocket knives have been developed to reflect Steve's personal taste in every day carry blades. Available in 5 color configurations, the Broken Skull features a super sharp, wide, flat-ground clip-point blade that makes daily cutting chores and even skinning game a breeze!

Black DLC (diamond like) coated for superior scratch resistance, the Broken Skull's blade is hair popping sharp straight out of the box — and because it's made from high performance American CTS®XHP powdered steel it will keep that screaming edge for a long time!

The Broken Skull's handle scales are made from premium G-10 and contoured for a superb grip while still being thin, light and smooth enough to make it effortless to carry these knives all day long.

At a featherweight 3.1 oz. the Broken Skull is a knife you'll always be happy to carry. Never weighing you down or filling your pockets with added bulk, but always there when you need it!

Steve Austin's Working Man™

As a ranch owner and outdoorsman, Steve Austin is a proud proponent of the carry and use of a good working knife. For him, a blade is a tool first and foremost, and whether he's working on his famous Broken Skull Ranch in Texas or on a movie set in Hollywood, he's always the guy with the knife!

From the tip of its cryo-quenched German 4116 steel drop point blade to the butt of its tough GFN polymer handle, the Working Man™ is designed to offer high performance at an affordable price.

Available in 3 colors, each Working Man™ is equipped with our revolutionary Tri-Ad® locking mechanism, offering unparalleled strength, safety and shock resistance. The Working Man™ also features a wide lanyard hole and fully ambidextrous reversible pocket clip making it a breeze to carry and use in the field. If you have been looking for an inexpensive pocket knife that isn't afraid to put in hard work — your search is over!

Finn Wolf

A design collaboration between custom knife-maker Andrew Demko and Cold Steel President Lynn C. Thompson, the Cold Steel Finn Wolf is a folding utility and camp knife that draws inspiration from the classic Finnish Pukko.

Equipped with our Tri-Ad® lock for superior safety and security, the Finn Wolf is a folder that you can rely on in even the most uncompromising conditions. Its satin polished Japanese AUS 8A blade is ready to put in long hours and hard work, and with its keen zero ground edge it's a breeze to re-sharpen in the field. With this much performance packed into this comfortable, strong, practical and inexpensive a package, there's simply no excuse not to add a Finn Wolf to your collection today!

DRAGONFLY

WAKIZASHI

DRAGONFLY

O TANTO

Many Japanese swords offered today are interpretive copies of antiquities from feudal Japan, and they were made for warriors of small stature who seldom rose above five and a half feet. As beautiful and skillfully designed as these swords are, they may not be perfectly suited for the modern warrior, who has grown to be a substantially taller and stronger version of his historical counterpart! With that in mind, Cold Steel has created the Dragonfly Series - a line of Japanese swords featuring thicker, wider and heavier blades.

These beautiful swords have a distinctive teal-green silk cord-wrap and black samé (ray skin) handles, complementing rich iron furniture with a dragonfly motif.

Their deeply curved and hand polished 1060 steel blades terminate in a long "iris leaf" point for maximum cutting potential.

Additionally, these swords come with two protective bags. A blue cotton travel bag and an intricately decorative display bag made from fine heavy silk brocade.

Mizutori Series

The Crane is a symbol of luck and longevity, loyalty and strength, and is a much-loved symbol in Japan.

As we developed a new Katana to add to our long standing and world-renowned lineup of Japanese blades, we felt it only fitting to add the Crane as a motif.

The Mizutori (Crane) Katana is a high-end, high-performance blade that was inspired by older, practical battlefield Katanas.

Measuring a hair under thirty inches, the Mizutori's blade is made from high quality Damascus steel and differentially hardened with a clay tempered Hamon. The handsome blade features a hand sharpened Hamaguri grind with highly polished spine and blade flats.

The Tsuba and Menuki both feature an iconic crane motif, and the high quality rayskin handle is tightly wrapped in brown silk cord, adding a level of detail and beauty that must be seen to be believed.

Housed inside a lustrous black lacquered Saya, the Mizutori Katana a stunning and attractive sword that is sure to become the pride of your collection!

The Mizutori (Crane) Wakizashi mirrors the materials, fit and finish of its larger brother in every way except size. It's equally light and fast, and with the same high-quality materials, but at a fraction of the size, making it an exquisite companion piece to the Mizutori Katana, or a beautiful stand-alone blade.

Gold Lion Series

The Cold Steel Gold Lion Katana represents a Samurai's "every day carry sword" for personal protection, and the defense of his Lord, his family and his home. Significantly lighter than some of our other heavier-duty Katanas, it is not only faster in-hand, but easier and more comfortable to carry when tucked into an Obi and worn all day.

The Katana's Menuki bears the symbol of the Japanese Shisa (Lion Dog) a guardian or protector - a fitting motif for this beautiful lightweight sword.

Measuring just under thirty inches, the Gold Lion Katana's blade is made from expertly hand honed and highly polished Damascus steel, with an Hamaguri grind, peaked Lori Mune spine and undulating clay-tempered Hamon.

The black iron Tsuba, Fuchi and Kashira all have gleaming 24 carat gold leaf accents and the handle features white ray-skin and a black silk cord wrap.

The Gold Lion Wakizashi mirrors the

The Gold Lion Wakizashi mirrors the materials, fit and finish of its larger brother in every way except size. It's equally light and fast, and with the same high-quality materials, but at a fraction of the size, making it an exquisite companion piece to the Gold Lion Katana, or a beautiful standalone blade in its own right.

COLD_{STEEL®}

Butterfly Swords

Still amazingly popular with Martial Artists and collectors alike, these iconic Chinese Butterfly Swords are carried in pairs that are cleverly nested together so they appear to be one sword in the sheath. But when they are drawn, they can be separated and wielded in both hands with lightning speed!

Our interpretation of these classical blades are 15" long and 2 5/8" wide. Their pronounced "D" shaped guards have a long forward quillon for deflecting and trapping opposing weapons.

The Butterfly's handsome hardwood handles are covered with braided silk cord to provide a secure and comfortable grip. The perfect gift for Chinese Martial Arts practitioners, and a fine addition to any blade-lover's collection!

Chinese War Sword

There are few swords in the world that are more effective than the two-handed Cold Steel Chinese War Sword.

Over the years we have tested this sword time and time again, and we've consistently cut bigger, tougher and more challenging targets. It remains one of the most popular swords in our line up, and when you see the tests, it's easy to see why!

The Chinese War Sword's cord wrapped grip, "S" shaped guard, and steel ring shaped pommel all work in concert to make it a well-balanced sword that's unbelievably fast and agile despite its formidable size. Each sword is hand sharpened and is protected by an attractive heavy leather scabbard.

Jade Lion Gim

The Jade Lion Gim has proven to be incredibly popular with Chinese Martial Artists and blade collectors alike. Hand forged and expertly tempered from high-quality Damascus steel, its subtly patterned blade is as sharp as it is beautiful.

The Jade Lion Gim is a civilian self-defense Wen Jian (Scholar's Sword), with a little more panache than the practical versions (like our own Gim Sword) that were made for the battlefield. In our tests it severed and pierced 4" bamboo poles with a single cut or thrust.

The heavy guard and pommel are cast from nickel-silver and adorned with watchful Chinese lions. Providing exquisite contrast to the jade green cord and Samé wrapped handle and Samé skin wrapped rosewood scabbards.

Gim Sword

After extensive study of the history and use of the Wu Jian or "Martial Sword", we decided to make our own battle worthy Gim for serious collectors and practitioners of Chinese Martial Arts. The blade of our Gim is forged from 1060 carbon steel and expertly heat treated. With twin sharp edges and a strong, useful point, the Gim is as elegant as it is effective.

The traditional guard and pommel are made of thick brass and fit snugly on a beautiful Rosewood handle. The Gim Sword comes with a wood scabbard with brass throat, chape and sword rings, so that it can be worn suspended from the belt or slung over the shoulder

Sword Canes

The Sword Cane remains an enduring and romantic personal defense tool that is still popular to this day. The steel blade, safely encased in an innocuous walking stick, can be brought into action with lightning speed!

Aluminum Head

This elegant sword cane closely resembles our popular City Stick, and comes with a removable highly polished Aluminum head. It features a tough fiberglass carbon fiber composite shaft that can be used as an effective self-defense tool in its own right. The light and fast blade has a tapered square cross section with a sharp point.

Pistol Grip

With a finely crafted solid Aluminum head, our pistol grip cane is far lighter, better balanced and easier to carry and use than ever before!

Heavy Duty

The Cold Steel Heavy Duty Sword Cane is quite possibly the toughest and widest sword cane ever built! It features an extra strong partial crook handle made from heavy duty nylon, and a 2mm thick aluminum shaft that's heat-treated for strength. The tapered shaft is capped with a thick rubber ferrule for better traction on slick, icy sidewalks or uneven terrain. The concealed blade is released by quickly pulling on the handle to break the suction of its friction lock. Made from Stainless Steel with a proprietary heat treatment and tempering, it's a hard and resilient blade that's sturdy enough for both cutting and thrusting.

This is no mere show piece! This Cane conceals a true battle-ready sword, proven in our infamous PROOF videos to make the kind of cuts one would expect from a high quality saber!

Ouick Draw

Cold Steel has long extolled the virtues of Sword Canes. These dapper and discreet self-defense tools are non-threatening and just plain stylish. Hiding in plain sight until needed – then they spring into action in a heartbeat!

Our latest Sword Cane, the Quick Draw features a black aluminum shaft that is lightweight and durable, with a rubber ferrule tip to aid traction when walking on slippery or uneven surfaces.

A short, swift pull on the Griv-Ex[™] pistol grip handle will disengage the friction seal and guickly deploy a tapered 8mm thick and 18" long needletipped spike!

This "Quick draw" style steel piercing implement is designed for rapid deployment, and when coupled with an ergonomic and intuitive pistol grip, even smaller or infirm wielders can bring this sharp little threat- deterrent into play in a flash!

The Quick Draw Sword Cane is so inexpensive, so good looking, and so easy to use - there's simply no excuse not to add one to your household today!

Thompson Saber

Cold Steel's Thompson Saber is not a historical or period-specific sword; rather it is a newly developed, thoroughly modern saber. Designed by Cold Steel President Lynn C. Thompson, and bearing his name, the Thompson Saber was created to Lynn's exact specifications. Lynn said: "I wanted to make a battle sword. Not a dueling sword as such, but a true sword fighter's blade for the modern martial artist" "It's ground to my exact specifications; as it slightly favors the cut over the thrust, it's hair shaving sharp for the first six inches from the point, then gradually less sharp down through the rest of the blade, leaving enough material to block, parry and even bludgeon an opponent's blade. It's deeply blued to aid in rust resistance, but also to make the blade harder to see in the fast paced cut and thrust of combat!"

The Thompson Saber has a modified 1904 Saber guard and a sizeable ray skin wrapped handle that will accommodate even big modern fencer's gloves. The Thompson Saber comes complete with a heavy duty thick leather and steel scabbard with a leather belt frog for ease of carry.

The 1917 Series

With their deeply blued blades and rich Rosewood handles, our 1917 series blades are instantly recognizable! These knives and swords all share the same sleek lines, and utilitarian, practical design. Evoking a spirit of adventure, from the American Frontier to the High Seas, our 1917 series of swords, sabers, cutlasses and knives are perfect for any historical reenactment group from the 1830's onward, Cowboy Action Shooters, Civil War or Naval Battle reenactment, even modern military groups.

Tactical Rondel

Our Tactical Rondel is a fascinating hybrid inspired by our "1917" series of knives and swords. Taking our medieval Rondel Dagger as a starting point, we began exploring the modern combative potential of this specialized weapon. The armor piercing capabilities of the Rondel simply cannot be ignored, and

as the modern battlefield warrior's kit includes more and more armor, gear, tools and padding, the merits of a dedicated piercing tool become apparent. The Tactical Rondel's stiff blade has extra-deep hollow ground blade bevels that are hand-honed to create 3 sharp edges and a needle like thrusting point!

The handle is big enough to accommodate even gloved hands, and the classically inspired dish guard and pommel provide excellent protection when making hard thrusting strikes.

The Tactical Rondel's sheath is also inspired by our "1917" line. Made of stiff hand-stitched black leather, with a blued steel throat and chape, it hangs comfortably from the belt via a leather frog, and, thanks to its

stud and loop construction, it is easy to remove without detaching all of your gear.

1917 Frontier Bowie

The Frontier Bowie features a wide, sharp blade with a generous clip and fuller. Made from 1085 High Carbon Steel, it is heat treated to a hard spring temper and beautifully blued to a lustrous finish. The Frontier Bowie's big "S" shaped guard offers excellent hand protection while the slim, flat profile of the modified pistol grip handle resists twisting in your hand, and keeps your edge alignment true.

The Frontier Bowie comes complete with a high quality leather sheath with a blued steel throat and

Cold Steel's modern interpretation of the classic 1917 US Naval Cutlass is as authentic as possible. For instance it features the curved blade, short clip point and iconic half-basket guard of the original as well as a deep blue finish on all metal parts.

The scabbard and belt loop are also highly accurate reproductions and are fashioned from high quality leather complete with brass and copper "furniture".

Improved 1917 Cutlass

Our improved 1917 Cutlass is identical in every way with the original except we have substituted a far more effective guard. Made from heavy steel plate with multiple "lightening holes" and featuring rolled edges it is far more durable than the original Cutlass while offering superior hand protection and minimum bulk.

MAA Messer

Designed by Luke LaFontaine and Dave Baker, Cold Steel's one-handed Messer is a sword that has to be held to be appreciated!

This modern interpretation of the historical German Langes Messer (or Long Knife) is beautifully balanced and a joy to use. Thinner and lighter than many of our current offerings, it handles almost like a giant Bowie Knife!

Its clip-point style blade is fully sharpened on the primary edge, with an un-sharpened "false edge" terminating in a sturdy upswept point.

The Messer's stylish and functional cross-guard, knuckle bow and pronounced shell-shaped "Nagel" are also blued to match the blade and enhance the rosewood handle scales.

Complete with a black leather scabbard with blued fittings, this beautiful addition to our Man at Arms series has already become a firm favorite with our crew, and we're sure it will be a popular addition to your collection!

MAA Arming Sword

The Arming Sword takes its inspiration from the side arm of choice for many of history's foot soldiers and journeyman warriors. Smaller and more agile than many of the heavier swords on the battlefield, this double edged blade was light enough to be easily wielded with one hand, and stiff enough to find vulnerable gaps in a knight's plate armor, or burst through his mail! Our interpretation of this lightning fast

fighter's sword is made from expertly heat treated carbon steel and richly blued to an inky black finish. Featuring pronounced upturned parrying quillons, a fluted leather grip, and a counter balancing wheel pommel, the Arming Sword is beautifully balanced, and, with all blued steel fittings, it's good looking too!

The MAA Arming Sword is sold complete with a hand stitched black leather scabbard with a steel throat and chape.

MAA LaFontaine Sword of War

Designed by noted swordsman Luke LaFontaine and bearing his name, the LaFontaine Sword of War combines elements of a 16th Century "Sword of War" with a "Complex Hilt Longsword".

Not carried on a belt or baldric, rather it was held in hand, rested on the shoulder or simply carried by a manservant or page.

Designed primarily for battlefield combat, it was almost as big as a Zweihander or a Great Sword; with a long double edged blade, elaborate ring guards, counter guards and peaked quillons, a closed ricasso for looping a finger through the cross for added control, and a heavy counterbalancing pommel that made a fearsome weapon in its own right!

A versatile and complex weapon with many advantages that should be apparent to any Historical European Martial Artist, it was also a symbol of prestige that said much about the status and prowess of its wielder.

Made in our signature "Man at Arms" style, the LaFontaine Sword of War features a 1055 Carbon Steel blade that has been deeply blued to an inky black sheen.

The LaFontaine Sword of War is fully sharpened and supplied complete with a thick leather and steel scabbard.

COLDSTEEL® COLDSTEEL®

1849 Rifleman's Knife

We have long admired the timeless good looks and pure functional design of the American Rifleman's Knife.

This rare blade was originally issued in extremely limited numbers, and has the distinction of being the first knife officially designed for, and purchased by, the U.S. Army back in 1849.

Our blade takes inspiration from an antique in the private collection of our company President Lynn C Thompson, and while our blade is not an exact replica, it features many of the design nuances that make this knife such a classic!

It's big, stout spear point blade is stiff enough to oppose even much larger weapons, making it an ideal complimentary knife to carry and use alongside a saber or cutlass. Plus, its beefy 12" blade and solid guard make a more than capable stand-alone blade in its own right! It's easy to see why it was chosen as a backup blade for our nation's riflemen.

The Cold Steel 1849 Rifleman's Knife is hand forged from 1085 High Carbon steel, with a solid brass guard and beautiful Rosewood handle scales that encapsulate the sturdy full tang.

The Rifleman's Knife is sold

complete with a high quality hand-stitched leather sheath and belt frog, with polished brass throat and chape. Perfect for

reenactors and collectors alike. Add one to your collection today!

Colichemarde Sword & Dagger

The Colichemarde emerged during the decline of the Rapier and the rise of the small sword. With a uniquely shaped blade that was extra wide at its forte but then dramatically tapered to a fine needle point. This allowed the sword to be used to parry or oppose even the heaviest weapons, yet remain light enough to be fenced with lightning speed. Cold Steel's interpretation of this blade closely mirrors the historic original, from extra wide forte to super sharp point. The hilt features a decorative double shell guard, complete with finger loops and knuckle bow, while the grip is completely wire wrapped and capped with a matching pommel. We have also created a matching dagger as an optional companion to this exquisite sword, with a beautifully polished blade, double quillons, and wire wrapped handle.

Ribbed Shell Swept Hilt Rapier

The Rapier enjoyed a long reign as the civilian weapon of choice for self-defense and dueling for centuries! Its long, double-edged blade was ideal for delivering the point at great distances. Its elaborate hilt (evolving from rings, bars and guillons, to shells, and chiseled cups) offered excellent protection and caught or deflected blows with ease. Sadly, the rapier eventually succumbed to the dictates of fashion and gave way to smaller swords. Our modern interpretation of this historical classic has a long, narrow blade with a single wide fuller to assure perfect balance. Its hilt features a classic ribbed shell and multiple bars, quillons and a knuckle bow for hand protection. The grip is made of wood covered with rich black ray skin and wire and terminates in a heavy ribbed pommel that serves as a perfect counter balance to our Rapier's blade.

Cavalier Rapier

By the mid-1600's dueling was at the height of its popularity. In fact, this trend for settling affairs of honor with steel reached such heights that King Louis XIII of France outlawed dueling for fear of losing too many of his important dignitaries to this dangerous pursuit!

Aristocratic noblemen saw it as their manly duty to defend their honor at sword-point, and as such began not only seeking out the knowledge and training imparted by specialist sword masters, but also exploring new types of weapons to help them gain a decisive edge.

One particular sword began to gain popularity - a smaller, lighter and faster version of the Rapier that was easier to carry and guicker in combat. A precursor to what would eventually become the Small Sword referred to by many simply as the "transitional rapier".

Cold Steel's interpretation of this blade (which we have named the Cavalier Rapier) features a sharp double edged and needle tipped blade which is decidedly shorter and lighter than a classic Rapier, allowing for much more speed and agility.

With a tempered steel pierced shell guard, rings, quillons and knuckle bow it offers astonishingly good hand protection, while its wire wrapped grip and counter balancing pommel give great comfort and liveliness in-hand.

Provided complete with a hand-stitched leather sheath with steel throat, chape and integral belt hook for ease of carry.

Small Sword

Toward the end of the 17th century, a sophisticated, shorter and lighter version of the Rapier emerged as the tool of choice for personal carry and defense - the Small Sword. Its stiff, lightweight blade was forged in a triangular cross section, and the hilt was both simple and smartly functional, consisting of no more than an elliptical plate, or two shells and a knuckle quard. Cold Steel's modern version duplicates the best features of many historical examples, but uses 1060 carbon steel, heat treated to a tough spring temper.

The hilt features two shells with functional finger loops and a light, but exceptionally strong, knuckle guard. Each Small Sword also comes complete with an attractive leather scabbard with an intricately decorated throat and chape.

The Cinquedea [Ching-kwi-dey-uh] has held a long fascination for us here at Cold Steel. It gained popularity as the sidearm of choice for noblemen walking through the narrow alleyways and walled cities of Italy. A blade worn exclusively for civilian self-defense, it was essentially the precursor to the civilian side sword and the rapier – and yet, this instrument of personal protection seems to have owed much of its design to fashion as it did to the cut and thrust of

mortal combat! Surviving examples of these unusual short

handled and steeply tapered blades are often highly embellished and ornate. With etched or gilded blades and deep multiple fullers that border on jewelry rather than weaponry – but beneath the romanticisms of high renaissance fashion lay a tool made with purpose. A wide, stiff cut and thrust blade that could be brought into play in confined spaces, and deliver a mortal wound!

Our interpretation of the Cinquedea is made from expertly heat treated 1065 Carbon steel with a highly engraved guard and pommel, and a hand-carved rosewood grip.

The Cinquedea is sold complete with a leather scabbard with engraved steel throat and chape.

88CDEA

CINQUEDEA

Rondel Dagger

Cold Steel's Rondel Dagger is inspired by historical examples of the combative incarnation of this medieval dagger. Rather than a multi-purpose tool, this version was a specialized weapon. A side arm developed for in-fighting, to pierce mail or heavy clothing, and to slip through gaps in plate armor.

The long, straight triple-edged and hollow ground blade is incredibly stiff and terminates in a needle sharp point. The blade is richly blued, then the edges are hand polished, giving the Rondel its handsome appearance.

The handle of the Rondel Dagger is turned and intricately hand-carved from Rosewood, with brass pins added to give further decoration and more traction to the

The period-correct double dish guard and pommel are further embellished with file work and offer incredible hand

protection. An historically accurate handstitched leather sheath with blued steel throat and chape allows the

Rondel Dagger be tied to a belt or baldric and comfortably worn in a variety of positions.

Two Handed Great Sword

Our iconic Two Handed Great Sword is one of the biggest swords we make. But don't let its size fool you! There is nothing awkward or clumsy about this awesome sword.

Sure, it's big and meant to be carried over the shoulder instead of in a scabbard, but it's extremely well balanced and easily wielded by people of larger stature and physical strength

The Great Sword features a large guard with side rings and integral parrying hooks that allow the blade to be "choked up" on for closer range sword techniques.

The leather covered wooden handle comfortably affords

a full twohanded grip, and is capped by a heavy steel pommel that helps counter balance its long blade.

If you're looking for the ultimate in big, beastly and battle ready blades - your search is over!

Viking Sword

The historic Viking sword of the 9th & 10th centuries featured a long wide blade with a broad central fuller and two keen edges. A simple guard with forward curving quillons was often utilized and combined with a utilitarian wooden handle and a heavy 5 lobed pommel to balance the long

Cold Steel's interpretation of this sword features a double-edged blade that is hand forged out of Carbon steel and hand polished and sharpened to perfection. The wooden handle is covered in leather and is supported by a simple, elegant guard at one end and a 5 lobed pommel at the other.

The Viking Sword is supplied with a leather wrapped wooden scabbard that is reinforced with a polished steel chape and throat.

Norman Sword

Cold Steel is pleased to offer you our version of the sword ancient Norman warriors used as they crossed the English Channel to conquer Britain at the battle of Hastings in 1066 A.D.

Like the original swords we have studied, our replica offers a long, wide blade with twin fully sharpened edges and a broad point. To reduce weight, increase "hardiness", and maximize eye appeal we have added a broad fuller in the middle of the blade.

The hilt of Norman Sword has also seen equal attention featuring upturned, spatulated quillons, a leather-over-wood grip and a modified "cocked hat" pommel. This pommel shape was chosen because it allows greater articulation of the hand while counter balancing the long heavy blade.

*THE TWO HANDED GREAT SWORD DOES NOT INCLUDE A SCABE

Italian Long Sword & Dagger

Historically, the Long Sword featured a distinctive cruciform hilt and a long, double edged blade that was equally adept at opposing both light and heavily armored foes. Its extra-long blade offered the reach and leverage for powerful stabbing, cutting and chopping strokes while its long cross guard and heavy pommel were useful for hooking, striking and smashing.

When heavy plate armor was encountered, strikes with the edge were often abandoned in favor of a "Half-Swording" technique; where one hand grips the hilt and the other the blade for grappling and in-fighting - to better direct the point in powerful jabs, and to accurately thrust at the small gaps and joints in a suit of armor.

Cold Steel's Italian Long Sword is designed so that the blade and balance slightly favor the thrust, while still being capable of delivering astonishingly effective cuts. It features a simple cruciform hilt, long upturned cross guard, leather-over-wood grip, and a heavy counter-balancing fish tail pommel.

Scaled down in size but almost identical in appearance, our optional companion dagger is sharply tapered with a double edged blade. Ideal as an offhand parrying tool, a back-up blade or just as a fine dagger to wear on your belt!

Hand-and-a-Half Sword & Dagger There are few swords that are more versatile or effective than the

"Bastard" or "Hand-and-a-Half Sword"

It's reasonably light, fast as lightning in offense or defense and best of all forged from tough 1060 carbon steel with a hard spring temper. Equipped with two fully sharpened edges and a strong yet wickedly effective point it commands respect at first glance!

Its long handle is suitable for use with both a one or two handed grip, and is fashioned out of wood covered in black leather. To balance the Hand and a Half Sword's long blade the butt is capped with a "scent stopper" style pommel.

An optional companion dagger is also available. Scaled down in size and almost identical in appearance, fit, finish and materials. In truth it makes a terrific off hand parrying weapon and can stand alone in its own right as a dagger you can wear with pride on any occasion.

Every Hand-and-a-Half Sword and dagger reflects the highest standards in workmanship and materials. To safely house your sword and dagger, we have also included attractive scabbards made of wood covered with black leather, with steel throat and chape

English Backsword

"What a brave weapon is a short sharp light sword, to carry, to draw, to be nimble withal, to strike, to cut, to thrust both strong and guick"

- PARADOXES OF DEFENSE, GEORGE SILVER, 1599

We are proud to add our interpretation of a 17th Century **English Mortuary Hilt** Sword. —Inspired by historical examples, this nimble single-

handed sword is fast and lively in the hand and a sheer delight to train with.

Able to land a decisive blow even when cutting fast from the wrist, this beautiful sword has already proven to be very popular among our crew, who have proclaimed it to be one of their favorite one handed cutters.

Made from 1055 Carbon Steel and supplied with a mild patina to give an "antiqued" finish, each English Backsword is fully sharpened and supplied complete with an ornate leather and steel scabbard. An excellent addition to the collection of any Historical European Martial Artist or Historical Reenactor.

Scottish Broad **Sword**

The infamous weapon of the Highland clansman, the Scottish Broadsword has a long, double-edged blade and distinctive basket

hilt, and, when combined with targe and dirk, has proven to be more than a match for enemy soldiers on battlefields the world over. Cold Steel has chosen to make our own interpretation of this famous sword. Hand forged 1055 Carbon Steel, expertly heat treated and beautifully polished with triple fullers, our blade is capable of passing the stringent British Proof test.

The Sword's basket hilt is made of blued steel with a wood grip covered in ray skin and wrapped

Finally, the Broadsword is safely housed in a wood and leather scabbard with a blued steel chape and throat.

Scottish Dirk

Cold Steel is proud to offer quite possibly the finest production Scottish Dirk on the market today.

The wide, sharp 13" blade is forged to a hard spring temper from 1055 carbon steel, while the intricately hand-carved Rosewood handle is as beautiful as it is functional.

The Scottish Dirk by Cold Steel is sure to be treasured for generations.

The latest addition to our line-up of high-performance swords is inspired by examples of early 17th Century Polish

Used both on horseback and on foot, these battlefield sabers had a fearsome reputation, not least for the skill-at-arms of the Polish Noblemen who wielded

them, but also for their phenomenal cutting potential.

Our interpretation of this historically significant blade was designed by custom bladesmith Dave Baker, and is made from expertly heat treated Carbon Steel. With a fully sharpened, distal tapered and strongly curved blade, the Polish Saber is capable of delivering exceptional cuts, while still remaining stiff enough for the thrust.

Equipped with a solid steel, brass inlaid guard and knuckle bow for hand protection and a functional thumb ring to facilitate the moulinet – allowing the wielder to keep the blade in continuous motion, parrying, cutting and changing direction at great speed!

With an eye-catching leather wire wrapped hilt, and matching leather scabbard and brass inlays left blank for personal engraving, this sword is as good looking as it is functional, and it's sure to be the pride of any European Martial Artist or blade enthusiast's collection.

German Long Sword

Cold Steel's German Longsword is a high-end, high performance sword for serious users and collectors. A modern interpretation taking its inspiration from historical examples, it has an expertly heat treated and spring tempered 1060 steel blade that is exquisitely balanced, beautifully polished and hand-honed to a keen

A large S-guard and protective side ring offer significant hand protection while being capable of performing the binding, trapping, and winding techniques that made the German Sword Masters art so

A wrapped leather grip terminates in a heavy steel pommel that not only counter balances the long blade but serves as a potent weapon in its own right. The twisting spiral design on the pommel is more than just a good looking decorative feature; it also provides a comfortable and secure grip even in gloved or gauntleted

Finally, the German Longsword is encased in a thick ridged, hand-stitched leather scabbard with an antiqued steel chape and brass buckled leather straps for wearing your sword on a belt or baldric.

Grosse Messer

The German Grosse Messer ("big knife") is one of the largest of the blades that fall under the classification of

It can be wielded in one or both hands and is capable of astonishing cutting feats. Cold Steel's modern version of this historical classic features a hand-forged blade of 1060 carbon steel that's so sharp we've used it to split a telephone book in half, with a single blow! The guard and pommel are made from blued steel and feature rosewood handle scales strongly riveted to the sword's full tang. The Grosse Messer also comes with a handsome wood and leather scabbard, reinforced with a steel chape and throat that has been blued to match the guard and pommel.

Kobun

The Cold Steel Kobun is a lightweight knife that takes its name from the Japanese underworld, where the word "Kobun" is sometimes used as an indicator of rank that suggests the word "soldier", or one who takes orders from his "Oyabun" or boss. It's a fitting name for a knife like the Kobun, which was effectively designed to be "a good soldier". Proven to be incredibly popular with the Military, where it's prized for its light weight and discreet profile as much as its durability and cutting potential.

The Kobun features Cold Steel's iconic reinforced "American"

The Kobun features Cold Steel's iconic reinforced "American Tanto" point, making it highly resistant to bending or breaking because it is reinforced by the full thickness of the blade's spine (which runs almost to the very tip of the blade). Despite its thin profile, the Kobun's deeply checkered Kray-Ex™ handle is designed to offer maximum grip and is contoured to resist turning or shifting in the hand.

The Kobun comes complete with a Secure-Ex® sheath.

Counter TAC Series

Our Counter TAC boot knives were designed with one simple philosophy in mind. Functionality. Quite simply - they work, and they excel at what they do! Their stone wash finished, AUS 8A full-tang blades are vacuum heat treated, and sub-zero quenched for strength and durability. The ergonomic design of the Kray-Ex ™ handle is comfortable and adaptable to any grip, and the deeply textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances. Finally, each Counter TAC is shipped with a state of the art Secure-Ex® sheath, complete with a removable boot/belt clip and lashing slots so you can carry it just about anywhere.

Steel Tiger

The Steel Tiger is a thoroughly modern tactical interpretation of the Indonesian Karambit. A design collaboration between Lynn C. Thompson and the late custom knife maker Steven Likarich, the Steel Tiger was designed to possess all the best features of this iconic hooked blade and to integrate them seamlessly with modern materials and styling. The Steel Tiger's deeply curved and needle sharp AUS 8A stainless steel blade is vacuum heat-treated and sub-zero quenched, taper ground and given a stone wash finish for maximum strength, cutting power, edge retention and performance.

The durable Griv-Ex core handle fully encapsulates the tang, emerging to create the bolster, thumb-shelf and distinctive finger ring. This core is then injection over-molded with premium Kray-Ex™, creating a superb, non-slip grip that won't let you down even in when your hands are cold or wet. For safety and convenience the Steel Tiger comes with a Military style Secure-Ex® sheath that you can lash to your gear or retain on your person

via the removable boot/belt clip.

Mini Tac Tanto

The Mini Tac Tanto offers a remarkably wide, stiff blade and a very sturdy reinforced point, making it ideal for piercing even tough, hard objects. As an added bonus, its width allows for a generous hollow ground blade bevel and an extra keen edge, so it can cut almost as well as it pierces.

Mini Tac Skinner

Ideal for cutting and skinning strokes. The Mini Tac Skinner has been extensively field-tested by our R&D team all over the world, and has proven to be more than capable of processing even the largest game and slicing even the thickest hides.

NEW Mini Tac Bowie

A welcome addition to our popular Mini Tac series, the Andrew Demko designed Mini Tac Bowie offers the well-known versatility of a sharp, sturdy clip point,

making it ideal for use in the field or for everyday carry. Supplied with a Secure-Ex[™] sheath and steel bead lanyard, its sure to give you many years of service.

Spike Series

Our Spike series neck knives are slim, light and super-tough. Their razor sharp, zero ground blades, are made from German 4116 Cryo Quenched Stainless Steel and are complemented by heavily scalloped, textured handle scales that offer a comfortable and secure grip. The Spike's ergonomic handles feature Integral quillons that provide a safe stop for index finger and thumb, while deeply textured and sculpted Griv-Ex™ provides excellent positive traction even when your hands are cold, wet and slippery. Available in four distinctive blade shapes (Bowie, Drop Point, Tokyo and Tanto point) they offer all the strength of a one-piece solid steel construction while still being light enough to carry all day without fatigue. Each Spike is supplied complete with a Secure-Ex® sheath that provides excellent retention and safety.

Hide Out

Our Hide Out was designed as a small, inexpensive and super-functional neck knife. The resulting blade is a true featherweight, weighing a meager 1.5

Its high satin polished, double-edged Japanese AUS 8A blade is "Scandi" ground, which makes it very sharp and also very stiff, allowing for a strong and durable tip, despite its sharpness. Its full tang is encapsulated in a weather proof Kray-Ex™ handle that has been designed to be very thin and flat. The handle is subtly contoured and deeply checkered to give the hand great purchase and security on such a small, thin knife, while still enabling effortless transition between grips. A Secure-Ex® sheath and bead chain lanyard allow you to wear this knife discreetly and comfortably all day long.

Secret Edge

Thin, light, and flat, our Secret Edge is suitable for anyone in the market for an unobtrusive, yet highly effective neck knife.

Unlike its heavier, bulkier rivals, the Secret Edge virtually disappears under clothing and, at 3.2 ounces (with sheath!) it's easy to wear all day. Inspired by the Scottish Skean Dhu, but with modern materials, performance and appearance, the Secret Edge has a flat ground Japanese AUS 8A blade that's wide at the base for cutting power and narrow at the tip to assure effortless penetration.

For secure purchase on such a diminutive blade, the Secret Edge is equipped with highly textured Griv-Ex™ scales and three ening holes, to allow the handle to hug the palm and resist rolling or twisting in the hand. The Secret Edge also comes with a Secure-Ex® sheath, offering reliable retention without compromising speed of access or deployment.

We have continually refined our designs, discarding some features and

Our Safe Maker series represents the pinnacle of our learning, experience, testing, and development. The blades, shafts, and 'T' shaped tangs are fashioned from one solid piece of AUS 8A Stainless Steel, and then subsequently vacuum heat treated and sub-zero quenched for added strength and performance and given a stone wash finish. A textured Kray-Ex™ handle encapsulates the tang and part of the shaft for added

comfort and security. Available in two sizes; each Safe Maker includes an easily concealable and sturdy Secure-Ex® boot/belt sheath.

comfortable and secure grip.

Bird & Trout

The Bird & Trout knife is a much loved. lightweight tool that is enjoyed by hunters, fisherman and outdoorsmen the world over.

Its lightweight one-piece construction and its versatile, ultra-skeletonized sheath make it effortless to carry and a joy to wear all day long. The Bird & Trout's integrated finger ring allows the knife to hang from the finger when not in use, keeping it instantly accessible even when working with cold, wet or bloody hands. Use the bead chain lanyard provided to carry the knife discreetly around your neck, fasten it to your key ring or wallet chain, or utilize a Tek Lok or a Molle compatible adapter (like the offerings by our friends at Blade Tech) to carry the knife on your belt, your L.B.V. or even strapped to a pack.

Bird & Game

The Cold Steel Bird & Game is a must-have lightweight knife that's the perfect option for when weight is truly a factor. Its simple, full tang construction belies a multitude of design nuances that will soon become apparent to any hunter, survivalist or outdoorsman. Simply put, once this knife is in your hand – you'll love it!

Inspired by our much-loved Bird & Trout Knife, and taking design-cues from our Spike series, the Bird & Game is designed for small game use, but is more than capable of processing large game in a pinch. The integral finger ring (coupled with the textured polymer handle scales) allows the wielder to keep a secure grip on the blade, and even let it hang from a finger while working on particularly intricate or delicate tasks.

The Bird & Game's razor sharp Japanese AUS 8A blade has been expertly heat treated for durability, while still being a breeze to resharpen in the field.

Weighing in at a meager 1.4 oz., the Bird & Game is an inexpensive, super lightweight hunting tool that can be stowed in a bag or pack, or even hung from a chain around your neck with its Secure-Ex™ sheath.

Master Hunter

Without a doubt, the Master Hunter is one of the finest hunting knives we have ever produced. Available with Japanese VG-1 San Mai® steel, or with American CPM 3-V High Carbon Steel blades, it features a broad blade that's been flat ground to achieve the ideal blade cross-section and edge geometry for hunting application.

Carefully honed to razor sharpness, its edge cuts effortlessly while its dropped point simplifies the chore of field dressing and skinning. The spine of the blade is a full 3/16" thick to allow for the necessary strength and stiffness to field dress and skin the biggest animals. The grip is specially designed to promote long use without fatigue. Made of the shock absorbent, highly tactile Kray-Ex™, it will offer a secure purchase no matter how wet or bloody your hands get. For safety, the Master Hunter comes in a thick Secure-Ex® sheath that will accommodate just about any size belt and allow you to carry it all day without fatigue.

Pendleton Series

Our company president, Lynn C. Thompson, bought the first knife that custom maker, Lloyd Pendleton ever made in 1973. The two went on to be fast friends, and together they collaborated on some of our most popular and critically acclaimed hunting knives, the Pendleton Series.

Pendleton Hunter

The Pendleton Hunter is much loved by the hunting community; it has remained a staple in our collection for many years. Lloyd Pendleton's signature drop point blade makes skinning and field dressing a cinch! The Pendleton Hunter's thick spine, combined with its deep wide hollow grind result in a very versatile point combined with a razor sharp edge. The contoured handle supports a modest guard and thumb stop while still facilitating a wide range of grips for the intricacies of processing game.

The Pendleton Hunter's deeply checkered Kray-Ex[™] handle also helps the hunter to retain a secure grip on the knife even when his or her hands are cold, wet and bloody. Our Pendleton Hunter is available in premium American CPM 3-V High Carbon Steel, with a hard wearing DLC (diamond like) coating or in VG-1 Stainless Steel.

Pendleton Mini Hunter

Our Mini Hunter pares down a functional hunting knife to the smallest size that practicality allows. Despite its diminutive size and unassuming appearance, this excellent hunting knife is capable of skinning, dressing and processing even large game. The Mini Hunter is an indispensable tool that makes a perfect addition to any hunting pack or survival kit, while being innocuous enough to wear on your hip without drawing unwanted attention. The Mini Hunter comes complete with a tough, weather resistant Secure-Ex sheath, which locks it safely in place, while remaining light enough to carry 24 hours a day. Our Mini Hunter is available in premium American CPM 3-V High Carbon Steel, with a hard wearing DLC (diamond like) coating or in VG-1 Stainless Steel.

Pendleton **Custom Classic**

Super limited edition and highly collectible, the Pendleton Custom Classic duplicates the high quality fit, finish and aesthetics of Lloyd Pendleton's celebrated custom made drop point hunter. Its hand crafted and beautifully polished blade is hollow ground from Japanese VG-1 San Mai® steel and boasts state of the art vacuum heat treatment, a sub-zero quench, and multiple tempering. Lloyd's design also features a precision machined guard and integral bolster with a unique thumb print relief on the bolster that promotes a wide variety of grip positions.
The handle is also a faithful copy of Lloyd's

original design. Made from highly polished black linen Micarta handle scales and equipped with red fiber liners that accent the knife's beautifully polished tapered tang.

A heavy duty cowhide sheath is included to complement the traditional appearance of this truly classic hunting knife.

with a versatile Secure-Ex sheath allowing the

knife to be fastened comfortably and securely

Monolithic Fixed Blades

Cold Steel President Lynn C. Thompson has become enamored with the simple functionality of drop-forged knives. Their solid one-piece construction allows for new levels of strength and durability, and as an avid survivalist, hunter and outdoorsman their bare-bones ruggedness has an undeniable appeal.

These incredibly tough and hard wearing blades have no leather or wood handle to crack, rot or break, and no loose parts to break, damage or lose in the field. They are easy to maintain and to clean, and inexpensive enough that you can afford a spare to add to your hunting pack or bug out bag.

Our Monolithic fixed blades are drop-forged (not cheaply cast!) from 52100 High Carbon Steel. Their solid steel bodies are expertly heat treated from the tip of their sharp blades to the butt of their stout handles. Furthermore, each one is ergonomically contoured with a deep trough in the handle for a comfortable and secure grip. Easy to modify and simple to customize, they also make great "project knives" for rehandling, filework, engraving or any other fun modification projects.

Our drop forged blades come complete with our Secure-Ex® sheath.

Drop Forged Hunter

Inspired by a solid steel hunting knife by French knife-maker Michel Achez, our Drop Forged Hunter is a no-nonsense hard working outdoor / hunting knife and tool. It features a continuously curved, superwide blade that is both sharp and strong, and designed to put in great work in even the most demanding conditions With its handsome and weatherproof black powder-coat and modern Secure-Ex sheath, the Drop Forged Hunter brings all the best features of a timehonored hunter's knife, but in a thoroughly modern package!

NEW Drop Forged Push Knife

The newest addition to our Drop Forged
Series, the Drop Forged Push Knife, is arguably
the strongest push knife on the market. The
largest of the push knives in our catalog, it's
extremely sturdy and features razor-sharp
double edges and a thick, wide,
sturdy spear point. Perfect for
tactical and law enforcement
professionals, you can
confidently conceal the
Drop Forged Push Knife
courtesy of its Secure-Ex
sheath with adjustable

design it has tremendous

Drop Forged Bowie

Our company President Lynn C.
Thompson proclaimed that the Drop
Forged Bowie is one of the best
minimalist Bowie-style knives he
had ever held. Inspired by a blade in
Lynn's private collection (made by an
Arkansas-based custom knife maker)
the Drop Forged Bowie is one of the
smallest bowie style fixed blades we've
ever produced.

It Features a stiff, sharp 6.75" clip point blade, sturdy guard and a very comfortable drop-style handle — all drop forged from one solid piece of heat treated steel!

Lynn went on to say: "This is everything you could want in a mini bowie, and it's fast as can be! I love this knife!"

The Drop Forged Bowie is sold complete with a versatile and secure Secure-Ex sheath, allowing for a wide range of carry options.

Steel

The Survivalist is the largest of our Monolithic knives. It's long, wide blade (inspired by our ever-popular Recon Scout) is designed for military application as well as hunting, survival & bush-craft.

Its razor-sharp edge, steel guard, generous belly, thick spine and stout tip make it an excellent choice for almost any endeavor.

Drop-forged from one solid piece of steel, the Survivalist is unbelievably durable, making it an excellent choice for tactical /military use, emergency preparedness and survival applications.

The Survivalist comes with our versatile military-style Secure-Ex sheath, giving you a host of comfortable and secure carry options in the field.

Chaos Series

Taking inspiration from the classic "Trench Knives" from both World Wars of the last century, we have developed a series of new tactical fixed blades that are suitable for the challenges faced by today's modern day warriors. Our Chaos series fixed blades are equipped with unique "D" ring guards made from reinforced 6061 aluminum, allowing for an incredibly secure and comfortable grip while protecting the hand both from incoming attack and damage while striking or cutting an opponent who's covered in body armor, ammo, flashlights, magazines and gear!

Their extra thick 1055 carbon steel pommels are tapered to concentrate the percussive force of a hammering strike, and their full tang SK-5 High Carbon steel blades are expertly heat treated for maximum performance. Their tough Secure-Ex® sheaths are Molle-Lok and Tek-Lok compatible, with rugged adjustable Cor-Ex belt loops and retaining straps for a secure and reliable lock up when not in use. The Chaos series combine maximum safety and security with extreme performance and combat potential.

Chaos Stiletto

The Chaos Stiletto's Drop Forged SAE 4140 blade features an isosceles triangular cross section with deeply hollow ground fullers creating three sharp edges and a slightly curved tip that terminates in a needle sharp point.

Leatherneck Series

The Cold Steel Leatherneck Series is comprised of two distinct and iconic blade styles, both of which have proven to be exceptionally popular with our brothers and sisters in the armed forces: The Leatherneck-SF (for Semper-Fi) has a beautiful hand honed saber ground clip point blade, and the Leatherneck Tanto features our signature Cold Steel "American Tanto" blade with a stout reinforced tip for extra strength. Both are made from tough D2 Tool Steel with a non-reflective black powder coat finish. To keep the user's fingers from sliding forward onto their keen edge, the Leathernecks come with a solid steel double quillon quard.

The handles are made of deeply checkered Kray-Ex™ that totally encompasses the Leathernecks extra wide, full tang. The Leatherneck's handle is capped with a thick, machined steel butt cap (not cheap casting or plastic like some others on the market) so they can even double as a hammer in an emergency! To carry the Leatherneck knives safely and conveniently, each blade comes complete with a sturdy and versatile military style Secure-Ex® sheath with fully detachable and ambidextrous belt loop.

AK-47 Field Knife

Our AK-47 series of blades have set the standard for hard-use tactical folders. A firm favorite with military personnel and special units, these rugged folding knives have seen use all over the world and in several conflict zones. When we decided to explore designs for a multi-purpose fixed blade field knife that would be suitable for military use, we kept coming back to our classic AK-47 design. Designed by Andrew Demko, the AK-47 Field Knife is enormously sturdy. Expertly crafted from CPM3-V steel, the AK-47 Field Knife is then DLC (Diamond like Coated) from the tip of its beefy saber ground clip point blade through its full tang and integral steel pommel ensuring and hard wearing, super tough finish. Supplied with a versatile Secure-Ex[™] sheath, the AK-47 Field Knife is the perfect companion for today's modern Military personnel.

COLDSTEEL®

COLD_{STEEL®}

58

San Mai®

San Mai® comprises of three layers of expertly laminated stainless steel combined in one blade.

Hard carbon steel is sandwiched between two layers of tough lower carbon spring steel, thus maximizing edge holding ability while still being able to withstand impact and lateral stresses.

Produced in extremely small production runs, San Mai® is used on only our most collectible high-end fixed blades, and is a registered trademark of Cold Steel worldwide!

NEW SRK in San Mai®

The SRK® in San Mai® features a tremendously strong clip point blade that's fine enough for delicate work, yet possesses enough belly for efficient cutting, slashing and skinning strokes as well. And, at 3/16 of an inch thick, the SRK® offers the sturdiest possible point and edge configuration, without sacrificing sharpness. The SRK's® handle sports a single quillon finger guard and a deeply checkered Kray-Ex® grip. If you want a knife you can bet your life on, and is reasonably priced, check out our SRK® it's the knife for you.

NEW Recon Tanto in San Mai

Our Recon Tanto continues to redefine the standard for combat knives around the globe. Having seen active military application in numerous conflicts over the last 20 years, it is well on its way to becoming the preferred fixed blade for special military units and even SWAT teams on our own soil. Experience the extraordinary quality - test the distinctive razor-sharp edge for yourself and you will see why the Recon Tanto is a knife you can't afford to be without! Also available in SK-5 and 3V.

Trail Master in San Mai®

of becoming the best all-purpose Bowie Knife in the world. From its broad clip point and hand honed, razor sharp blade to its extra sturdy non-slip Kray-Ex™ handle, the Trail Master is built to perform! Popular with hunters and survival experts as well as with military personnel who appreciate a larger fixed blade that can serve multiple roles in hard conditions, the Trail Master is a rugged Bowie that will be your trusted companion whatever your mission! This model features VG-1 San Mai® steel and is hand-made in limited edition in Japan. It comes complete with a Cor-Ex[™] sheath.

NEW Tai Pan in San Mai®

Like its serpent namesake, the Tai Pan® is aggressively fast and deadly. Designed by Lynn C. Thompson in the distinctive "Tanto" style, the Tai Pan® embodies all the best features of a classic dagger while minimizing its shortcomings.

Most daggers are notorious for having thin, fragile points that are easily broken. In contrast, the Tai Pan® features a sturdy spear point which is wide and thick enough to resist breaking without compromising its ability to offer deep, effortless, penetration.

TANTO XII

NEW San Mai® American **Tanto Series**

There isn't a person working in the knife industry today that knows more about the Tanto than Cold Steel® does. It was, after all, Cold Steel® who invented and popularized this knife style in the early 1980's. We have spent millions of dollars persuading the public, both through advertising and live or videotaped demonstrations, of the Tanto's many advantages. We have been producing Tantos for more than 35 years now, and there is still no factory or custom knife maker around making a Tanto

that can approach the cutting, slashing or piercing power of one that is manufactured by Cold Steel®. All of our Tantos feature a deep lustrous satin finish on the hollow ground blade bevels and a contrasting line grain finish on the blade flats.

This technique highlights our state of the art grinding methods and emphasizes the
Cold Steel Tanto's unique appearance. In addition, the Tantos come with our famous flattened oval Kray-Ex[™] handle. The oval shape provides a solid grip and resists rolling or twisting in the hand under hard use, the kind that, over time, would destroy a lesser knife. The use of Kray-Ex[™] in knife handles is another Cold Steel® innovation. Kray-Ex[™] is an unparalleled space age material that won't crack or rot and is immune to the ravages of bad weather.

The tapered, solid steel pommel is another important Tanto feature that should not be ignored. Lynn Thompson designed it to concentrate the full force of a crushing blow in a small area so that even a moderately powerful blow can be remarkably effective in disarming or otherwise

incapacitating an attacker. The Tanto series knives in San Mai® all come with a thick, high quality Secure-Ex® sheath that is sure to give years of hard service and keep your Tanto at your side, ready for action.

Mini Pal

For a small knife, the Mini Pal™ delivers heavyweight performance!

It has an edge that zips through a host of materials at unbelievable speed. And, since the one inch long blade is razor sharp, it will open delicate packages and envelopes, cut rope or punch through heavy cartons with ease.

Also, the Kray-Ex™ handle totally encapsulates the tang and part of the shaft, for increased comfort and improved control.

Urban Pal

The Urban Pal should be standard equipment for survival in today's urban jungle! Weighing less than half an ounce, it's perfectly at home unobtrusively carried in a pocket or purse and can be easily attached to a key ring, or hung around the neck.

Super Edge

This rugged little workhorse can cut through tough materials that would make a bigger knife choke!

Its diminutive size and light Secure-Ex sheath make it a natural for attachment to a key ring, zipper pull, "D" ring or a belt loop. A perfect "EDC" choice.

Urban Edge

Our Urban Edge makes a surprisingly versatile and useful everyday utility tool. Its secure grip allows the user to open their hand while still having full control over the knife. Many of Cold Steel's employees use them regularly - opening boxes, pausing to sign for deliveries or type on computers or tablets - all without the knife ever leaving their hand! Light enough to be worn as a neck knife or hung from a key ring, but still packing enough cutting power to handle tasks that would challenge even some larger knives; the Urban Edge also makes a formidable last resort self-defense tool.

Recon Tanto

Over the last 35 years, Cold Steel has succeeded in establishing the Tanto as a superior blade for combative application. Our pioneering research, development and refinement of this blade shape has proven the value of the "American Tanto" style reinforced point beyond question. Our Recon Tanto continues to redefine the standard for combat knives around the globe. Having seen active military application in numerous conflicts for more than two decades, it is well on its way to becoming the preferred fixed blade for special military units and even SWAT teams on our own soil.

Finn Bear

Reflecting the best of its Finnish heritage, the Finn Bear is ideal for use in the great outdoors, and makes an efficient utility knife as well! Its sub-zero quenched German 4116 Stainless blade is hollow ground and given an RC of 56-57 so it will hold its edge well while remaining easy to re-sharpen in the field.

The Finn Bear has a sturdy point for piercing and plenty of belly for skinning and carving.

It's big and strong enough to skin large game, yet thin and delicate enough to slice a tomato or cut an apple. The durable Polypropylene handle has a modified diamond cross-section that will fit your hand like a glove and accommodate a wide variety of gripping methods. To carry your knife safely and conveniently in the field, we are including a pouch-style versatile low profile polymer sheath that can be easily worn on a belt or tucked into your pack or tackle box.

Outdoorsman Lite and Tanto Lite

Following the overwhelming success of our Pendleton Lite Hunter, we decided to make more economical versions of our incredibly popular Tanto and Outdoorsman knives.

They resemble their more expensive counterparts in many ways, (with similar blades, guards and pommels) but featuring sub-zero cryo-quenched German 4116 Stainless Steel blades, and newly designed handles. The handles are made in two parts. They feature a Polypropylene quard, pommel, and core section, which envelopes the knives' full tangs. The core is then over-molded in a deeply checkered Krav-Ex[™] for a non-slip grip that's easily cleaned with soap and water. To carry your knives safely and conveniently in the field, we are including a pouch-style versatile low profile polymer sheath with integral belt loop that can be easily worn on your hip or tucked into your pack or tackle

Finn Hawk

A design collaboration between Andrew Demko and Lynn C. Thompson, the Cold Steel Finn Hawk is the latest in our series of inexpensive hard wearing bushcraft and outdoor tools. Its traditional Nordic styled "Scandi Ground" German 4116 steel blade is sub-zero cryo-quenched for superior edge holding potential, with a steep 7.5mm blade bevel and a functional curving belly for skinning and slicing strokes. Furthermore, its 4" blade is more than big enough for most game processing tasks, not to mention for camp chores and food prep too.
The Finn Hawk's handle is two time injection

molded. The first layer of high-impact polypropylene is strong, durable and highly weather resistant, while the outer layer (made of Thermo Plastic Rubber) has a whorled spiral pattern providing a food safe, comfortable and secure grip in even the worst conditions.

The Finn Hawk is supplied complete with a slim line Secure-Ex® polymer sheath with integrated belt loop.

Pendleton Lite Hunter

Over the years our Pendleton Hunters have become enormously popular, and many people have asked us for a more affordable Pendleton that will accommodate just about anyone's budget.

In appearance, the Pendleton Lite Hunter strongly resembles Lloyd's classic functional designs, with a practical drop point blade, modest guard, hollowed bolster area, and a flared butt to aid retention in slippery and inclement conditions. The only major changes were the adoption of subzero cryo quenched German 4116 Stainless steel and the use of high-impact polypropylene for the handle. If you are looking for a dependable and award winning hunting / utility knife that will serve you well for years to come – then you would be hard pressed to beat the Pendleton Lite Hunter.

Roach Belly

Historically, the Roach-Bellied knife was a short blade with a pronounced upswept curve and a sharp point that saw popularity in 17th century Britain and the American Colonies.

It was most likely named after the common Roach Fish, which had a similarly round curving

Cold Steel's model is a nod to the Black Powder Community, which has continued to appreciate the Roach Belly's economy, versatility and effectiveness.

The hollow ground blade is made of sub-zero quenched German 4116 Stainless steel, expertly heat treated to RC 56-57, and given a sharp edge that's easy to maintain.

Instead of the traditional wood handle, ours is made of a tough injection molded polymer, making the Roach Belly considerably more weatherproof than historical examples - not swelling, shrinking, rotting or cracking like its wooden counterparts.

The Roach Belly comes complete with a durable Secure-Ex® sheath, making it a breeze to carry all day or on extended hunting or camping adventures.

Canadian Belt Knife

The Cold Steel Canadian Belt Knife takes its inspiration from an old 1950's classic. It has all the features that made the original an awardwinning, international favorite plus some modern improvements.

Our contemporary version is made out of sub-zero quenched German 4116 Stainless steel and hollow ground to an incredibly sharp edge.

Unlike some wooden handles, our durable Polypropylene handle is tough enough to endure hard knocks while remaining light and comfortable to use. This super lightweight 2 ounce blade comes with a secure low-profile polymer sheath, making it a breeze to carry all day or on extended hunting or camping adventures.

Boar Spear

For 200 years, the boar spear reigned supreme as the hunting tool of choice in the dark forests of Europe, and made many appearances on the battlefield as well.

Its distinctive wide leaf shaped blade and dual cutting edges cut and thrust with equal capability and the sturdy cross quillons kept danger (whether four legged or otherwise!) at bay!

Cold Steel's modern recreation of this classic spear is cold forged out of medium carbon SK-5 steel and heat treated to a spring temper, flexing under stress rather than breaking. The Boar Spear comes complete with a heavyweight American Ash shaft and a sturdy Secure-Ex Sheath.

Assegai

The spear is one of man's oldest, reliable weapons. Early examples were no more than sticks or poles with fire hardened points, but as man learned how to knap flint cast bronze and forge metals, spears quickly evolved.

With modern cold-forging - a process pioneered by Cold Steel - we are now able to offer high performance modern spears at affordable prices.

Our Zulu Assegai [as-uh-gahy] are made from SK-5 medium carbon steel, heat treated and drawn to a tough spring temper, and designed to flex or bend under impact forces rather than breaking or shattering. The Assegai blade is available with a choice of two different premium American Ash shafts (A shorter model for thrusting or a full length throwing shaft), and comes complete with a durable Secure-Ex® sheath.

Tiger Fork

Back in the 1990's, Cold Steel's President Lynn C. Thompson purchased a Chinese Tiger Fork to add to his collection. He fitted it with an old rattan staff and has trained with it ever since. Lynn enjoys reading tales of hunting exploits in historical accounts and had read stories about Chinese hunters using these giant forked tools to dispatch big cats. He also had the pleasure of training with Chinese Martial Artists and studying how this tool was modified as a weapon of war.

After 20 years, Lynn has finally brought his own version of the combative Tiger Fork to a modern

Cold Steel's interpretation of this Martial Artist's tool features a stout 64" Ash handle, and a carbon steel head - with an elongated central spike to maximize its thrusting potential and inwardly curved outer forks to increase the success of trapping techniques.

Man at Arms Spears

The Man at Arms was a stalwart and dependable fighter who exhibited great martial prowess with a range of weapons. He was a capable and competent warrior who was the veteran of many conflicts and was often first into the fray. Although he was not a Knight, he fought and trained alongside them as a brother in arms. To honor these rugged, reliable, salt-of-the-earth warriors we have created a range of true journeyman's weapons that we have called the Man at Arms Collection.

Each of these battle-ready pole-arms features 1055 Carbon steel and is deeply blued to a lustrous finish and comes complete with a premium American wood shaft.

MAA Lance Point

The Lance Point was (as its name suggests) a formidable tool when used from horseback.

Historically it was used by German, French, British and Indian cavalry troops. During our research and testing we were consistently astounded by the penetrative power of the Lance Point's hollow ground, spring tempered triangular blade. Puncturing hard targets with the slightest effort, it was fast, lively in hand and incredibly effective whether used from horseback, on foot or even thrown into appropriate targets!

MAA European Boar Spear

Cold Steel's European Boar Spear takes inspiration from antique Germanic hunting spears. With its broad head, twin edges and pronounced double quillons it is a high performance example of this ancient hunting tool. The European Boar Spear features a stout leaf shaped blade and a thick reinforcing central spine, and it's sturdy quillons stop the spear from penetrating too deeply when used against dangerous game With a premium American Ash shaft, the European Boar Spear is sure to be very popular with the hunting community and historical re-enactors alike.

MAA Winged Spear

The Winged Spear was a true product of the battlefield. Its blade was wide and sharp enough to almost double as a pole arm, while its pronounced wings can be used to trap and pin an opponent's limbs, snag his shield and parry and entangle his weapons. If you study battlefield arts or have a passion for historical re-enactment, we heartily recommend purchasing a Winged Spear by Cold Steel.

MAA European Spear

The Cold Steel European Spear is a prime example of effective and simple design. Its design has changed very little since the Bronze Age. It is quite simply a spear done right!

Every inch of this high quality hunting and battlefield tool screams perfection, from its fully sharpened double edged blade to its walnut stained American Ash handle, it is a beautiful spear that is sure to have pride of place in any collection.

MAA Classic Leaf Shaped Spear

The classic leaf shaped spear is found throughout history and across the globe. It was used for hunting and warfare for hundreds of years by many nations.

The long socket imports a great deal of strength, reinforcing the central ridge of the head, while the extra wide double edged blade and stout point are amazingly effective! Our modern interpretation of the leaf shaped spear features a fully sharpened carbon steel blade with a hard spring temper and a premium American Ash shaft.

Samburu Spear New Wide Blade Model

The warriors of the semi-nomadic Samburu tribe in Kenya (known as "Lmurran") are imposing figures - never cutting their long braided hair, and decorating their faces and torsos in intricate patterns using a mixture of animal fat and red ochre. Their herds are constantly menaced by vicious predators and subject to raids by lawless bandits, so the Lmurran rarely venture far without being armed with their infamous spears! The Samburu warrior's throwing spear is the most advanced spear of its type on the planet. Routinely dispatching leopards, lions and even those firearm toting bandits at impressive distances!

WIDE BLADE SAMBURU SPEAR

95SB Samburu

Inspired by the Samburu, we developed our two variations of Samburu spears, but with modern materials.

This year, marks the introduction of the new Wide Blade Samburu Spear. Based on Lynn C. Thompson's hunting experience with the Samburu Spear, we have created a new variation with a much wider head. Intended for thin skin game where penetration is not an issue, it cuts a huge wound channel to dispatch the quarry in an even quicker, more humane manner.

The Cold Steel Samburu is comprised of three distinct components:

- The sharp leaf shaped spear head itself, which is welded to a steel shaft.
- The counter-balancing steel butt spike (or "shoe") which used as an alternative point for practice.
- A black Hickory handle with a double taper.

All of our Samburu spears are easily disassembled for transportation, and they all come complete with a Secure-Ex® sheath.

NOTE: We've made our Samburu spears as tough as possible. However, if you bend your spear shaft or "shoe" (butt spike), it can be easily straightened in a vise. The tough hickory handle of your spear can eventually break, so please be prepared to

Special Forces Shovel

Cold Steel's Special Forces Shovel is modeled after an original Soviet "Spetsnaz" military entrenching tool. This durable and effective shovel has a stout hardwood handle, a broad flat steel blade and 3 sharp edges. A popular tool with military and special operations units worldwide, we've heard tell of it being used to dig foxholes and bunkers, to chop branches, build shelters, act as an improvised paddle, and even as a last-resort weapon of defense!

Our Special Forces Shovel is also immensely popular with the throwing community, as its head-heavy balance and multiple sharp edges make it an excellent alternative

to a Tomahawk for sport and recreational throwing!

A Cor-Ex™ sheath with integral belt loops is available and is sold separately.

Name: Special Forces Shovel
Weight: 25.7 oz.
Thick: 2mm (shovel head)
Handle: Hardwood
Steel: Medium Carbon Steel
Overall: 50 cm (19.68")

Templar

The Cold Steel Templar is a specialized throwing tool made for modern sport or competition throwers.

Designed by custom bladesmith Dave Baker, the Templar is inspired by an ancient historical throwing axe known as a Hurlbat. Made of one solid piece of tough spring tempered carbon steel, the Templar is fun to throw and easy to use. When it comes to "sticking" potential, it's the next best thing to a shuriken or throwing star, landing with a satisfying "thunk" over and over again!

With an axe-style head, top and back spikes and a tapered spiked handle, it hits hard at almost any distance and rotation, and thanks to its head-heavy balance it is capable of being thrown even over extended distances.

Jack Dagger Thrower

Jack Dagger is one of the most popular and well known knife throwers in the world. The "King of Fling" has traveled all over the world showcasing his throwing prowess, and has become the go-to trainer for Hollywood's elite, preparing them for knife wielding roles on the big screen.

Making regular appearances on television dazzling audiences with his skills with the blade. Jack has brought knife-throwing to international audiences on a scale that's hard to believe!

We are proud to introduce a new throwing knife to our line-

up that is based on blades used and thrown by the legendary Jack Dagger. Expertly heat treated and made from a single piece of 1050 high carbon steel, and made to Jack's exact specifications, this new thrower is perfect for professional and competitive knife throwers who are looking for a big, wide clip point "Bowie Style" throwing knife.

A single sharpened edge also makes this a handy utility and camping knife. A functional and tough tool that will also be great fun to throw on those hot summer nights by the campfire!

LaFontaine Thrower

Luke LaFontaine is a long-time member of our Cold Steel crew. Known primarily for his expertise in Japanese Sword Arts, he is also a highly knowledgeable Western Swordsman, historical fencer and amateur historian.

As an actor, stuntman and weapons expert for the big screen, Luke has perfected a wide range of combative skills, including knife throwing. Combining his love of historical weaponry, with his passion for "sword and sandals" action adventure movies, Luke has designed an eye catching and fun knife that will serve multiple roles.

The LaFontaine Thrower is heavily curved, with a wide belly, sharp cutting edge and an acute tip, that's accented by an unsharpened false edge. With an integral finger guard to stop your hand from sliding onto the sharp edge, and a tapered easy-release handle for throwing, the LaFontaine Thrower is a capable cutting and slashing blade as well as an excellent throwing knife.

True Flight Thrower

The Cold Steel True Flight Thrower is one of our most

popular throwing knives.

Made from 1055 carbon steel, and finished with a black, baked-on protective coating, the True Flight is a beautifully balanced and hard wearing thrower that also has a sharp, functional utility edge. As such it will also serve as an excellent bushcraft or survival knife.

Sure Strikes

The Sure Strike is our interpretation of the classic Shuriken or throwing star. Used for centuries in China and Japan, the throwing star consists of a well-balanced piece of flattened steel with 3 or more sharp points. When thrown overhand like a baseball, side arm, underarm or back hand like a flying saucer, it hits on at least one point every time. Our Sure Strikes aren't like the cheap, shoddy throwing stars you see at flea markets, guns shows, and in martial arts magazines. They are precision laser cut from high carbon steel and heat treated to a durable spring temper before sharpening. They are then treated with a black, baked-on epoxy finish to protect them from the rigors of the elements and repeated throwing. Available in three weight variations — Light, Medium and Heavy.

HEAVY SURE STRIKE LIGHT SURE STRIKE MEDIUM SURE STRIKE 6.4 oz. 4.2 oz. 2.8 oz. 9.9 oz. THICK: 6мм 4мм 2мм 2.8мм 1055 CARBON 1055 CARBON 1055 CARBO 1055 CARBON STEEL: DIAMETER: 5 3/4" 5 3/4" 5 3/4" 10 5/8"

Battle Star

The Cold Steel Battle Star is quite possibly the largest production throwing star ever offered! Its huge spikes are almost 4 inches long and 2 inches wide at the base, tapering to fine but sturdy points that penetrate even tough materials with relative ease. Big and strong enough to be thrown with force, it hits as hard as a heavy duty throwing knife, and its balanced and accurate enough to hit with precision as well as strength. Perfect for sport, competition and recreation, the Battle Star is a must for any thrower's collection!

COLDSTEEL®

G.I. Tanto

Our G.I. Tanto is a no-nonsense tactical knife that comes with a legion of practical uses.

The GI Tanto's broad blade, integral quillon guard, and Polypropylene handle scales exemplify a tactical knife stripped down to its bare essentials.

Made from spring tempered 1055 carbon steel and protected by a rust resistant finish, it's rugged, hardwearing and dependable.

Popular with sport throwers, the GI Tanto is perfectly balanced and capable of being thrown by the blade or handle. In a survival or self-defense situation, it can be guickly and easily converted into a spear too! Just remove the handle scales and lash the blade securely to a suitable wooden shaft! Best of all, it's a great value blade — inexpensive enough to buy duplicates to keep as back-up or bug-out bag knives, or even just to throw for fun on a sunny day.

A stalwart and reliable knife that you can depend upon in a pinch.

Shanghai Shadow

The signature ring on our Shanghai Shadow allows tremendous versatility when handling this popular and

It provides a totally secure grip when the index finger is locked in place through the hole. The wielder can also pivot the blade around the index finger for a quick change of grip, and even use the ring as a means of extending his or her reach by as much as four inches.

Made from one solid piece of 1055 Carbon steel the Shanghai Shadow has a tough spring temper and twin hollow-ground edges. It is provided fully sharpened, and equipped with a heavy-duty military style Secure-

Shanghai Warrior

The Shanghai Warrior's origin lies in the kind of "what if" moment that can only come from a company of Martial Artists!

"Sparring it out" has always been a big part of our design process for knives with combative intent, and it was during one such training session our company President had a thought - What if we had a Shanghai Shadow that was as big as a Bowie Knife? This question led to numerous prototypes that eventually evolved into the blade we now know as the Shanghai Warrior! At 16" long, the Shanghai Warrior's SK-5 High Carbon, full tang blade is continuously curved with sharp twin edges and a reinforced central spine to add rigidity to the point. A sturdy steel ring allows deft manipulation between grips, and its removable high-impact polymer scales make it comfortable to use. The Shanghai Warrior's massive blade is safely contained within a versatile Secure-Ex® sheath for ease of carry in virtually any gear configuration.

Torpedo

The Cold Steel Torpedo is a lot of fun for target throwing. The double tapered points slide effortlessly from the hand for a perfect release and offer twice the sticking potential of a conventional throwing knife. What's more, the heavy 2 lb. weight lets you stand way back from the target (15 yards or more) and throw them with surprising force. Popular with Sport Throwers and hobbyists alike, the Torpedo has remained a popular edition to our line-up for many years — and with good reason!

6.4 oz. 8.2 oz. 11.2 oz. 16 oz. 3.5мм 3.5мм 5 1/4" 7 1/4" 9 1/4" HANDLE: 4 3/4" 4 3/4" 4 3/4" 4 1/4" 4 1/2" 13 1/4" 13 1/2" 12" 13 3/8"

Sport Series Throwers

For many years now we have offered some of the finest premium professional-grade throwing knives. Our throwers have become a mainstay in the throwing community and they make regular appearances in the highest level throwing competitions all over the world. Now, due to popular demand, we are proud to introduce

a new line of intermediate grade, inexpensive sport throwers. Made from 1055 Carbon steel, and with the same hard spring tempering as our higher end models, these sport models

are slightly thinner and lighter but with the same durability and balance that our customers have come to expect. Suitable for any skill level, they are markedly less expensive than our original pro-grade models and make it easier than ever to take up this enjoyable and rewarding pastime.

Sure Balance Thrower

The heavyweight Cold Steel Sure Balance Thrower is just shy of 13 1/2" long and weighs a little over a pound! Twice as heavy as many amateur throwing knives, these professional grade knives fly straight and hit like a freight train, sticking in almost any target! With their expertly heat treated solid 1055 carbon steel construction, they are sure to offer many years of hard service, even when used by the most dedicated throwing enthusiast.

Pro Balance Thrower

With its substantial heft and pronounced point, our Pro Balance Thrower was developed for the professional / competitive knife thrower. You can throw from either the blade or handle and it will sink into even hard targets with ease. Made out of sturdy 1055 Carbon steel, with a black, weather resistant finish and equipped with replaceable composite handle scales, it will last for hundreds of tournaments and OPTIONAL SHEATH

Perfect Balance Thrower

The Cold Steel Perfect Balance takes inspiration from a classic thrower from the 1950's.

Thanks to its considerable weight and fully sharpened clip point blade, it hits hard and penetrates its target effortlessly. The Perfect Balance's strong 1055 carbon steel construction, black rust-resistant finish, and composite handle scales make it durable enough for thousands of throws.

This blade has also become a firm favorite as a low cost utility and hunting tool. Its big Bowie-style blade and tough spring temper make it a rugged reliable companion for the toughest conditions.

Drop Forged Tomahawks

Our high-quality tomahawks are precision drop-forged from 1055 Carbon steel. The Drop forging process offers many distinct advantages for the production of impact tools, particularly ones that require a cutting edge.

By using a series of progressive dies affixed to high-powered hammers, the steel is kneaded and compressed into a completely homogenous mass, creating a very uniform grain structure and minimizing imperfections.

All of our Tomahawks are also differentially heat treated. With a cutting edge and hammer face that is fully hardened to take a keen edge, while the body of the blade is kept soft to absorb the shock and impact of striking blows.

All of the tomahawks shown here feature American Hickory handles and can be complemented with an optional sheath (sold separately).

THE AMERICAN TOMAHAWK COMPANY® IS A REGISTERED TRADEMARK AND A DIVISION OF COLD STEEL, INC.

Trail Hawk

Modeled after an early frontier pattern, the Cold Steel Trail Hawk has proven to be incredibly popular with Survivalists, Preppers and Outdoorsmen, who admire its versatility and durability. It's an excellent chopping tool and has a functional hammer poll with a hardened face so you can drive nails and hammer in stakes. Best of all its extremely lightweight and a cinch to tuck it under your belt or lash it to a pack or shooting bag.

Rifleman's Hawk

The Rifleman's Hawk has a functional hexagonal hammer poll designed for serious work, like pounding nails or stakes. Reminiscent of some early American designs, the Rifleman's Hawk features the "peace pipe" appearance that was commonly used by Native Americans during the last century. In terms of fun and sport, this hawk throws and sticks extremely well. If you want something that hits its target like the proverbial "ton of bricks," then the Rifleman's Hawk is for you!

Frontier Hawk

Suitable for re-enactors from any period stretching from the French and Indian War clear up to the final settling of the West in the late 1800's, our Frontier Hawk is a joy to use!

Norse Hawk

The influence of the Viking's famous weaponry far out-lasted the reign of the Vikings themselves. Their axes in particular, have influenced many designs that can be seen to this very day.

Our Norse Hawk has a curved cutting edge to facilitate deep, slashing cuts and terminates in two sharp points. Traditionally, the bottom point would be used to capture an opponent's shield, leg, arm, shoulder or neck, momentarily immobilizing or bringing him closer and easier to dispatch. The top point was used to execute direct chops or, with a thrusting motion, to pierce or gouge.

The Norse Hawk remains one of our most popular Tomahawks. Both with reenactors and with sport throwers, who admire its balance, effectiveness and effortless sticking power!

Spike Hawk

Our Spike Hawk features a differentially heat treated and drop forged blade and tough steel spike.

This unusual hawk is very popular with sport throwers, who admire its ability to deeply "stick" into wooden targets by blade or by spike - Effectively doubling the chances of a successful throw!

Additionally, a hand crafted leather sheath (designed to safely house the point and edge) is also available and sold separately.

Pipe Hawk

PRIMARY EDGE: 2 1/4"

wide cutting edge and a solid, fully hardened hammer poll that's turned and ribbed to mimic a traditional hollow pipe bowl.

TRAIL HAWK

bowl will drive nails, spikes and stakes with the power of a framing hammer.

Trench Hawk & War Hawk

The Cold Steel Trench Hawk features a sharp cutting edge and wedge-style spike. offering numerous tactical "options" for our nation's modern warriors. Drop forged from 1055 carbon steel and differentially hardened, the head of the Trench Hawk will withstand tremendous blows as well as the awful stress of prolonged hard use.

The Polypropylene handle of our Trench Hawk is highly resistant to shock and will withstand abuse that would break even a tough hickory handle. And, as an added benefit, is easily and cheaply replaced when finally worn out from repeated throwing.* The Trench Hawk comes complete with a patented articulated Secure-Ex[™] sheath.

Our War Hawk combines the tactical styling and material used in our popular Trench Hawk with historically inspired design elements from fighting hand-axes of old. With its wide "bearded" axe head and curved reinforced reverse Tanto style spike it is a thoroughly modern tactical tomahawk and breaching tool! Each War Hawk is supplied with a patented articulated Secure-Ex™ sheath.

DROP FOR

Man at Arms Series

The Man at Arms was a stalwart and dependable fighter who exhibited great martial prowess with a range of weapons. He was a capable and competent warrior who was the veteran of many conflicts and was often first into the fray. Although he was not a Knight, he fought and trained alongside them as a brother in arms. To honor these rugged, reliable, salt-of-the-earth warriors we have created a range of true journeyman's weapons that we have called the Man at Arms Collection.

MAA Gothic Mace

We are proud to add this eye catching Germanic-style Mace to our line-up of historically inspired Man at Arms weapons.

This modern interpretation of a classical Gothic Mace is hand made from 1055 carbon steel. It features a thick walled hollow steel handle, and a weighty pommel to counterbalance the Mace's heavy helmet crushing head.

Designed to oppose armored foes, the MAA Gothic Mace features six steel flanges. Each one is profiled and tapered to reduce weight but also add "bite" upon impact, denting and crushing even the strongest plate armor, while the spiked finial at the crown allows the Mace to be used as a thrusting tool. Wielded with either one or two hands, the Gothic Mace is light enough to use with speed, but stout enough to block, parry and, of course, deliver a crushing blow!

Richly blued to a deep black finish, with a hand stitched leather wrapped handle, this good looking Mace is sure to be an exciting addition to the collection of any Historical European Martial Artist, Historical Reenactor or weapons enthusiast.

MAA Polish Mace

Inspired by historical examples, and modelled after a custom weapon by Bladesmith Dave Baker, our Polish Mace is a masterclass of minimalist design.

Unlike highly decorated "Bulawa" or ceremonial weapons, these simple utilitarian Maces were often plain and unadorned, and tucked into a sash or belt at the waist, ready to be quickly snatched and brought into play as a last-ditch tool for personal-defense.

Quickly grabbed with either hand, the wielder could use this stout steel Mace to thrust and jab at speed, or swing it to land a heavier (and more devastating) percussive blow.

Small, and surprisingly lightweight, the Polish Mace has a thickly walled hollow handle and a ridged steel bulb shaped head, with a polished brass finial on the crown.

Easily customized, modified or wrapped for historical reenactment, this practical Mace is a fun and unusual addition to any collection!

War Hammer

The War Hammer was perhaps the ideal weapon for use against a knight encased in plate steel! The heavy hammer head could crush the strongest suit of plate with just a few blows, and the back spike could open that armor like a can opener!

Already proven to be popular with Historical European Martial Artists and reenactors alike, Cold Steel's modern interpretation of the War Hammer is highly maneuverable and can be easily wielded with one or both hands. The head is drop forged out of 1055 Carbon steel and differentially heat treated. The point of the spike and hammer face are fully

hardened so they can pierce and crush tough materials, while the rest of the hammer is forged to be softer - to absorb the shock of heavy blows. The handle of our War Hammer is 30" of straight grain American Hickory, and topped with a pair of sturdy steel langettes.

Axe Gang Hatchet

We've never hidden our enduring love of Martial Arts or our passion for movies. Many of the crew here at Cold Steel study and train in at least one Martial Art, and several members of our team also work in Hollywood as weapons consultants, stunt men and fight choreographers.

The classic Chinese hatchet has appeared in countless Kung Fu movies over the years, and we've always been fascinated with its use!

Our interpretation of this classic blade, the Axe Gang Hatchet is no mere movie prop! It features a differentially heat treated, drop-forged head - which has a hard edge capable of reaching razor sharpness, but a soft steel body for absorbing impact.

It also features a hand-picked straight grain American Hickory handle embellished with the Kanji characters for "Axe Gang". This stylish and iconic hatchet is as eye catching as it is durable. Add one to your collection today!

Trail Boss

The Cold Steel Trail Boss is compact enough to carry all day in your hand or strapped to your pack, yet tough enough for chores that would make a hatchet or tomahawk scream for mercy.

Featuring a European style head with a 4" blade and a 4 1/2" cutting edge, it takes a big bite with every swing. Plus, it features a very sturdy, durable straight-grained American Hickory handle. In our extensive field-tests in the outback of Australia, the Trail Boss was used to chop kindling, clear roads and trails, to build blinds and even to chop down a fair sized

Viking Hand Axe

The historically inspired Viking Hand Axe is a design collaboration between Lynn C. Thompson, and custom bladesmiths Dave Baker and Rich McDonald. The stout 30"

American Hickory handle, extra broad and sharp cutting edge, hooking "beard", and up-swept thrusting "horn" combine to make a formidable fighting axe that would be the pride of any

Viking's collection! SC90WVBA A Cor-Ex[™] sheath, sold **OPTIONAL VIKING** separately, is available for HAND AXE SHEATH the Viking Hand Axe.

Chinese Sword Machete

Cold Steel's historically inspired sword / machete hybrids are firm fan-favorites. The Chinese Sword Machete is no exception!

Similar in look and design to our record-breaking
Chinese War Sword, The War Sword Machete has a super
wide, deeply curved blade and tough one-piece full-tang
construction with over molded polypropylene handles for
maximum durability. Plasma cut from expertly heat treated
1055 carbon steel and then hand ground and sharpened
here at our Cold Steel HQ in Ventura CA; the Chinese War
Sword Machete has amazing cutting power.

Supplied with a Cor-Ex back sheath, this beast of a machete will actually out-perform many swords on the market - and at a fraction of the cost!

Thai Machete

The Thai Machete represents the culmination of over 4 years of development and refinement. Like the Thai swords that inspired it, our Machete is beautifully balanced, with a keen cutting edge and a sharp tip. Though most commonly seen used in pairs when practicing traditional Thai fighting arts, these long curved blades are amazingly versatile. Light enough to swing one handed, but with a long enough handle to employ a two handed grip for extra leverage and cutting power. The Thai Machete's wide blade and curved cutting edge make it an excellent brush cutter. Slicing grass, vines and light foliage with ease. Its fully sharpened blade is made from the same tough 1055 Carbon Steel as the other blades in our incredibly popular Machete line up. Its tough polypropylene handle has a flattened oval grip that won't twist or turn in your hand, while its steel reinforced guard offers extra hand protection.

Fully sharpened right here in our Ventura HQ, the Thai Machete comes complete with a Cor-Ex sheath for carry and storage.

Slant Tip Machetes

Like our heavier All Terrain Chopper Machetes, the Slant Tip Machetes are designed for sheer cutting and chopping power in any environment!

The European style slanted tip packs explosive performance — combining precision cutting, with weight-forward head-heavy chopping power - while the ergonomic polypropylene handle makes it comfortable to use all day, even when working in the toughest terrain.

The Slant Tip Machetes are available in 2 sizes with 18″ and 21″ blades. Each Slant Tip Machete also comes with a durable Cor-Ex™ sheath.

All Terrain Chopper

In our grueling performance tests, the ATC (All Terrain Chopper) out performed many Machetes, and even put some swords to shame! The sheer cutting potential harnessed within the ATC's extra wide blade just has to be seen to be believed!

Worn either slung over the shoulder or across the back in its weight-distributing carry sheath, the ATC is surprisingly comfortable even when carried for extended periods of time. Following exhaustive field tests, we found the ATC to be a stalwart hunting and wilderness survival companion. Much more than just a machete, and the next best thing to an axe, it packed astonishing chopping power into an easy to carry package, delivering superb performance.

Tactical Series Machetes

Our Tactical Series of machetes are inspired by our hugely popular and record breaking Warrior Series of Tantos, Wakizashis and Katanas.

Available in 3 sizes, each of these fun and distinctive machetes features a wide, curved Tanto point blade and solid steel tsuba made from heat treated 1055 High Carbon Steel with a baked on anti-rust coating. Their broad full tangs are injection over-molded with high impact polypropylene, making them incredibly durable and weather resistant. We re-created the look of a traditional cord wrapped handle, Fuchi and Kashira but used modern materials that will not shrink, warp, tarnish or rot and require very little maintenance. Sharpened right here in our Ventura HQ, each of these Machetes comes complete with a Cor-Ex sheath for carry and storage.

Cutlass Machete

Inspired by our popular 1917 Cutlass, our Cutlass Machete features a stiff 1055 Carbon steel blade that's just as capable of repelling boarders as it is for hacking a path through the blackberries to get to your favorite fishing hole!

With a tough full-tang steel construction and a steel reinforced knuckle bow guard, it's ready for your next adventure be it on land or sea!

Smatchet

Cold Steel is proud to provide our modern machete-styled interpretation of a classic World War II Smatchet. Famed for its countless exploits in the trenches and in the jungle, the Smatchet carved out a reputation for effectiveness that still echoes today. The Smatchet was all about function. Just holding a Smatchet instilled confidence and a grim determination for getting the job done. Its very name became a byword for guts, glory and bravery. Our modern interpretation of this military classic features the same broad spear point and false edge with the addition of a strong steel-reinforced guard and rugged weather-proof handle. A formidable tool that can only be described as part machete, part short sword, our Smatchet is fully sharpened, and coated with a baked-on rust-resistant matte finish.

Black Bear Bowie

Continuing our ground breaking tradition for creating unusual and eye-catching "tactical machetes", our R&D team devised a bold new blade for 2017 — the Black Bear Rowiel

It's extra wide, 12" long blade is black-powder coated with a matte-black corrosion resistant finish and then sharpened right here at Cold Steel HQ.

The Black Bear Bowie's generous full tang and solid steel guard are completely injection over-molded with fine-textured high-impact Polypropylene, creating a very comfortable but tough, weatherproof grip.

Supplied with a sturdy Cor-Ex™ sheath for ease of carry and convenience of use in the field, the Black Bear Bowie is fast and lively in the hand, and wide enough to chop through small vines and saplings, clear brush and perform admirably in many survival or bushcraft duties.

If you are looking for a truly epic bowie knife, but at an affordable price, then you will be hard pressed to find something better than the new Cold Steel Black Bear Bowie!

86

Kukri Plus Machete

The Cold Steel Kukri Plus Machete features the same wide, curved blade that makes our Kukris capable of delivering the kind of performance that's the envy of many swords or bushcraft tools, but with the addition of an integral solid steel guard for added protection and safety.

Its full tang is completely encapsulated in a comfortable and durable polypropylene handle that has been ergonomically designed for comfort and safety, allowing you to keep a secure grip on the Machete even in the most inclement conditions. Featuring a rust resistant baked on matte black coating, the fully sharpened and expertly tempered 1055 Carbon Steel blade is safely and securely carried in a sturdy Cor-Éx sheath.

Royal Kukri Machete

It's hard to find a more versatile knife than a Kukri. A stalwart ally in a tight spot and an indispensable survival tool, a good Kukri is truly apocalypse proof! Our Royal Kukri Machete presents the blade's keen point at a new, non-traditional angle, keeping the cutting power that made the Kukri the stuff of legend, but increasing its thrusting and piercing power. The handle, with its integral guard keeps the user's precious digits safe from harm while improving the balance and heft of the knife. Proven to be an outstanding multifunctional bush knife, the Royal Kukri Machete is capable of the toughest bushcraft chores. It's fully sharpened 1055 Carbon Steel blade (with rust resistant baked on matte black coating) is equally at home clearing brush and undergrowth or dispatching wounded game, it also provides the comfort

of a dependable last resort self-defense option. ROYAL KUKRI KUKRI MACHETE 21.2 oz. 2.8 мм 15 1/2"

Kukri Machetes

There are very few knives in the world that we can think of that can out-chop or out-cut a good Kukri.

It's true that some of the best Kukris (like our Gurkha model) can be somewhat expensive, and while that "thoroughbred" performs extraordinarily well, sometimes what's required is a good, inexpensive, "workhorse" model – and our Kukri Machetes are those workhorses!

Available in two sizes (one with thirteen inch blade and one with a whopping seventeen inch blade) our Kukri Machetes are ready to plow through the toughest chores!

Perfect as a lighter-weight bushcraft or camping tool that can be carried on a belt or lashed to a pack, our Kukri Machetes pack a great deal of value into a relatively small, light and inexpensive package.

Big Bore Blowguns

The blowpipe or blowgun has a long history that spans the globe. Many authorities believe it was first invented in Malaysia and migrated through the Malaysian and Indonesian archipelagos to the Philippines and even Japan.

The blowgun, however, was not just a south eastern weapon; it also surfaced in the western hemisphere in the jungles of south and Central America, moving as far north as the southeastern United States.

Cold Steel's Big Bore Blowguns feature large caliber .625 Magnum barrels that make them capable of shooting darts that are faster and heavier than other models on the market today!

Our blowguns have an effective range out to 20 yards or more, and, with practice a skilled user can hit a two-inch circle at amazing distances and deliver a heavyweight dart capable of penetrating a half-inch sheet of plywood!

All models come with a mouthpiece, rubber ferrule, dart guiver, and 36 darts (15 Bamboo Darts, 15 Mini Broadhead Darts, and 6 Stun Darts).

Shooting a blowgun is great fun. It is an activity that can be enjoyed indoors or out, in sunny or inclement weather. Skill with a blowgun can lead to many inexpensive hunting adventures and stand you in good stead in survival or self-defense situations.

2 Piece Blowgun

Our Big Bore Blowguns are incredibly easy to carry in the field. They're relatively lightweight and, because they come with a rubber ferrule, they make an excellent hiking staff. But, if you are looking for a, more convenient tool that can be stowed in a pack, we have the solution! Our 2 piece, five foot "take-down" model is comprised of two tubes with threaded joints and a reinforcing coupling section It has the added advantage of being easy to disassemble and pack.

Professional .625 Blowgun

Our Professional grade Blowgun comes with a target style mouthpiece and a 3mm thick barrel. This means it is almost twice as thick and 45% heavier than our standard models making it the heaviest commercially made Blowgun in the world.

Axe Gang Medieva and Trench Buckler Hawk **Trainers**

Supplement your training with hard-wearing replicas of our two most popular designs. The Axe Gang trainer and the Trench Hawk training tools both closely duplicate the feel and size of their sharp counterparts, while being considerably safer to train with!

Medieval

The Buckler is a small historically inspired shield about the size of a large dinner plate.

Cold Steel's sturdy training replica has a thick, raised boss to protect the hand, and a rugged handle that will withstand plenty hard of use. Hugely popular with HEMA practitioners and Historical reenactors.

Training Staff Escrima Stick

in the world of high-strength polymer production Cold Steel is proud to offer our first synthetic training staff! Our company President Lynn C. Thompson found that a hard wearing octagonal "Okinawan style" Japanese Staff was an excellent training tool for crosstraining across multiple Martial Arts disciplines. Perfect for pell work and for conditioning training, this highimpact staff will make an excellent addition to any Martial Artist's training regime!

Our Cold Steel Escrima Stick resembles a

F

traditional rattan stick used by Filipino Martial Artists in length, weight, and cross section. Injection molded from super tough black high-impact polypropylene, it weighs a little over 15 ounces and measures 32" long and 1" in diameter. Unlike rattan, it resists mildew, and won't dry out, warp, crack, splinter or shrink. It's also amazingly durable and resistant to impact stresses.

Furthermore, our Escrima Stick can easily be modified to any length to suit your personal requirements.

We're confident that you'll want to add one or more of these durable sticks to your training gear!

Steel Training Saber

A pair of much-used and worn "Hutton Style" military sabers has been in our Cold Steel Salle D'Armes for nearly 15 years. Lynn Thompson, Luke LaFontaine and Anthony DeLongis have trained with them weekly for years, and now, we have finally brought our own interpretation of this excellent training tool to the market.

Polypropylene

Martial Artists have known a simple truth for ages — If

your ultimate goal is to wield a sharp blade safely and

effectively, you need to supplement your training with

blade, yet minimizes the possibility of causing grievous,

concept was implemented by many cultures, including

the ancient Romans, who used wooden swords to train

training tools can rot, crack, chip or splinter and could not

be used in all weather conditions. Cold Steel's solution to

these dilemmas was to design a line of synthetic polymer

their Gladiators. The only problem was that wooden

permanent injury to yourself or your training partner. This

a tool that approximates the size, feel and heft of a

Swords

substitutes.

Our Steel Training Saber is deeply curved and fullered, blunted for training and with a forgiving spring temper for practice and sparring. Its substantial pierced steel guard has reinforced rolled edges for extra durability, and its tightly wrapped wire and leather grip will offer years

Japanese Styled Training Swords

Our Japanese Training Swords are closely modeled after our world-famous Warrior series swords.

Their wide blades imitate the flowing lines of our Warrior swords, but as they

are made from super tough polypropylene, with no sharp edges or points they are perfect for armored sparring, training, conditioning drills and "pell work".

Each model also features an intricately detailed imitation cord wrap grip, offering superior control even when wearing heavy gloves. Our Training Swords offer superior heavy-duty training potential

Rubber Trainers

Now you can practice with some of our most popular knife designs in relative safety - with our rubber training knives!

Each trainer has been carefully fashioned out of Santoprene to look as realistic as possible so they can be effectively used in solo practice, training drills, disarm drills, and demonstrations and any other activity where you want a reasonably close approximation of realism but not the extreme danger and risk associated with an actual knife.

Boomerang

The non-returning boomerang, or a variation of the throwing stick has been used as a hunting tool on every continent from time immemorial, and is still found in isolated pockets around the globe even today. Fashioned in various shapes, forms and sizes and made from wood, bone, horn and even metal, it was most effective when used to harvest birds and small game. Since we are in the business of making things to throw, it was only natural for us to try and improve on the classic hunting boomerang by making our own version.

Injected molded from high impact Polypropylene with an attractive wood grain texture, you can use our Boomerang for hunting and sport throwing. It's a great gift, and hours of fun!

Gunstock War Club

Cold Steel is proud to introduce our modern interpretation of the culturally significant Gunstock War Club. In the early sixteenth century, American Indians observed the potential of a rifle stock as a bludgeoning weapon, and they wasted no time in fashioning their own war clubs based upon its basic shape.

Made of straight grain hard woods, they hit with remarkable force, especially when enhanced by the addition of a short point. Designed by custom Bladesmith Rich Mc Donald; Cold Steel's version of this fascinating tool incorporates many of the features found on historical examples, including the ridged centerline, sharp point, and the classic "Fawn's Foot" handle, but instead of using traditional hardwoods, we chose to make our War Club from injection molded high impact polypropylene.

This material is highly resistant to shock; making it particularly suitable for

use in impact tools.

As an added bonus, this material won't warp, rot, crack or splinter like wooden versions! For reenactors, the War Club has been given a realistic wood grain texture, which can easily be painted to replicate the finish of

Indian War Club

Cold Steel President Lynn C. Thompson is an avid collector of wooden weaponry and ethnographic arms, and when he saw a beautiful example of a Ball Headed War Club made by custom Bladesmith Rich McDonald, he jumped at the chance to work with Rich to reproduce it for a modern audience. Cold Steel's Indian War Club is injection molded from weatherproof highimpact polymer materials that are virtually impervious to impact. This material is

highly resistant to the elements and won't warp, rot, crack or splinter like wooden versions. Each club is approximately 2 ft. long with a 3 1/4" diameter ball head, and fitted with a removable pointed steel stud. For historical re-enactors the surface has a realistic wood grain finish that can be easily painted and customized with brass studs, tacks, or feathers.

Koga Series

The late Bob Koga remains an icon in the world of self-defense and law enforcement. An Air Force Veteran and LAPD Officer, with extensive Martial Arts training in Judo, Wrestling, Jiu Jitsu, Jo Do and Aikido, he

became an outspoken proponent of the merits of the straight baton as opposed to the PR24 or side handle baton. The Cold Steel Koga SD series are made of a high-impact polymer, and are designed to function as an aid in leverage when restraining an individual, and obtaining joint locks or submission holds. But they also serve as an admirable "intermediate impact tool". Law enforcement professionals often face a perplexing dilemma when contemplating employing fist or baton blows. Blows struck with the fist may be too weak, or worse, result in a broken hand, while blows struck with a baton may be too powerful resulting in grave injury. One solution however, is the Koga SD - bridging the gap by concentrating and magnifying the effect of hand blows while the likelihood of nermanent in

English Police Truncheon

The Truncheon employed by British "Bobbies" has always held a fascination for us. Not only were these heavy sticks used as the "tool of the trade" for these tough-as-nails law enforcement officers against the criminal element of Victorian England, but they also served as a symbol of authority, and almost an Officer's badge in their own right - with the Royal crest, and his jurisdiction/department and number painted on the shaft.

Frequently made from Lignum Vitae, an incredibly heavy and dense hardwood, these Truncheons were employed with devastating effect. Truncheons have a colorful history, and techniques often included thrusting jabbing strikes, rapping strokes, and joint manipulation and locks, but these were often abandoned in favor of simply "clobbering" an opponent with a heavy strike to the head!

Much prized by collectors, particularly overseas, these beautiful sticks are often expensive, and (as they are made of wood) often cracked, warped, mildewed and aged.

Our modern interpretation of these fascinating tools is not only good looking (highly decorated with eye-catching ENGLISH POLICE details) but it's also precision injection

details) but it's also precision injection
molded from high-impact polypropylene
making it amazingly impact resistant
while being weatherproof and
waterproof. Each Police Truncheon comes
with a cord lanvard.

Cheap Shot MADEIN

Imagine an extremely accurate, highly effective broadhead for about a dollar!
That's right! The stopping

power and performance you need for even less than the price of a cup of coffee!

100% made in the USA, with multiple patents pending, the Cheap Shot™ ushers in a new era of bow and crossbow hunting potential. It's the world's first polymer broadhead!

Made from a space-age polymer developed specifically as a substitute for steel, the Cheap Shot™ is tough, sharp and practically impervious to the elements!

Unlike a steel broadhead, it will never rust, tarnish or corrode, and it will endure all but the most extreme weather conditions.

Available in two sizes, each Cheap Shot™ is outfitted with Cold Steel®'s signature "grip n' rip" style serrations - developed for use on military tactical knives - specially designed to cut tough fibrous tissue, and capable of making short work of any mere flesh and blood target, dispatching even big game quickly and humanely.

Easy to use and quick to replace, every Cheap Shot™ is accurate, lethal and dirt cheap!

"I didn't grow up with a silver spoon in my mouth, and every dollar I have I've earned the hard way.

Sure, I often use expensive broadheads when I'm hunting, but it still hurts when I miss, damage them, or lose my arrow!

That's why I invented the Cheap Shot. You can take your best shot every time you draw your bow without worrying about breaking the bank!"

– Lynn C. Thompson,President, Cold Steel®

Blackthorn Series

Our Blackthorn sticks are built for strength and durability out of high impact polypropylene. Unlike wooden sticks found in nature, ours will not warp, crack, swell, or splinter.

They are made to resemble Blackthorn examples from nature, but artfully designed to a point where they not only mimic nature, but actually rival and supersede anything the natural world could produce! If nature had fashioned the most perfect Blackthorn sticks, and you were lucky enough to own some of them this is what they would look like.

Blackthorn Staff

Inspired by an over-sized staff in the private collection of our company President Lynn C. Thompson, our newest member of the Blackthorn family is the biggest stick we've ever made!

2 3/4"

The new Blackthorn Staff (almost 5 feet long) represents the culmination of years of costly research and development in the world of injection molding and high-impact polymer production.

This king-sized hiking staff, with its rustic wood-effect texturing, "clipped thorn" nodules and polished faux-wood knob is sure to be an unusual and much talked about part of any collection.

Irish Blackthorn Walking Stick

The Blackthorn is found throughout Ireland and the British Isles, and it has been prized for centuries as a material for premium walking sticks.

The most well-known incarnation of the classic Blackthorn stick was the Irish Shillelagh — a tool that was so fearsome in trained hands that the English outlawed it! To circumvent this law, the Irish modified the Shillelagh into the classic walking stick that we are familiar with today. Cold Steel's modern interpretation of this beautiful and historically significant walking stick is made from high impact polypropylene. It's incredibly durable, and is easy to clean with a little soap and water.

Blackthorn Shillelagh

Cold Steel's Irish Blackthorn Walking Stick has been a firm fan favorite since its inception. Its good looks, combined with its hard-wearing materials have made it an often imitated but never equaled classic!

Now, we are proud to add a "little brother" to our line-up. A shorter, lighter model that we simply named the Blackthorn Shillelagh.

Modelled after an ancient cudgel in Lynn C.
Thompson's private collection, the Blackthorn
Shillelagh mimics the look, feel and balance
of the original, but made from high-impact
polymer that will withstand even the
harshest weather conditions.

With a handsome bark-like wood texture and raised "clipped thorns" on the shaft, and a highly polished faux-wood head, this good looking stick will be sure to turn heads — whether it is carried under your arm at a historical re-enactment event, or simply hung by the door to greet uninvited quests.

Apparel

Show the world you know who makes the best knives! Cold Steel has a variety of promotional apparel for almost any occasion.

Hats:

- A Cold Steel Cap: This classic and stylish flat billed cap has been designed exclusively for Cold Steel by Jiu Jitsu and Grappling lifestyle brand Newaza
- **B** Master Bladesmith Hat: Black Polyester cotton twill "Master Bladesmith" Kanji characters embroidered on front "One Size Fits All"
- Master Bladesmith "Beanie": 100% Acrylic, embroidered "Master Bladesmith" Kanji characters on front. "Cold Steel Knives" on back.
- Mossy Oak® Pattern Hat: Look cool and stay cool with our official Mossy Oak® Break-Up® Camo Cold Steel Hat. Blaze orange Cold Steel logo provides visibility for hunters in the field, and adjustable mesh panel back provides superior breathability.

Tee Shirts:

E Fighting Samurai Tee Shirt: 100% cotton.

Featuring an illustration of a Samurai on the front ready to strike with a sword, with a illustration on the back showing the sword in hand.

- **"Master Bladesmith" Tee:** Kanji character tee shirt. 100% cotton.
- G Cross Guard Tee Shirts: Tell the world how much you love Cold Steel with this tee shirt designed exclusively for Cold Steel by Jiu Jitsu and Grappling lifestyle brand Newaza Apparel.
- **III** The Undead Samurai Tee: Designed by the exceptionally talented Portland-based artist Martin Ontiveros, otherwise known on Instagram as @ martinheadrocks.

Cold Steel Tactical Gloves:

Cold Steel, the knife brand made famous for having the utmost concern for hand safety with its invention of the Tri-Ad® lock, is proud to introduce its first

tactical glove, specially designed to provide superior hand protection for the knife fighter, martial artist, or shooter in your life. Unlike other tactical gloves, the Cold Steel glove offers safety and security for your hands without feeling bulky or limiting dexterity, as its palm is comprised of smooth goatskin leather for unparalleled grip-ability and comfort. The top and back of the gloves are cut, slash, and impact resistant, extending through the end of each fingertip, thanks to 5mm of Thermoplastic Rubber (TPR). You're sure to find a pair that's the right fit for you— the Cold Steel Tactical Gloves have an adjustable hook and loop closure and are available in Coyote Tan or Black in sizes from Medium to XXL.

Siambok

In Africa, the Sjambok (Sham-Bawk) is a cattle prod, whip, riding crop and an effective means of self-protection, whether from venomous snakes, or from varmints of the two-legged variety!

Unlike most western style whips which require a rolling "crack" to function, the semi-rigid Sjambok is swung like a rod or stick. The weight, speed and flexibility of the Sjambok's lash does all the work, and little skill or training is required to wield it effectively. Our synthetic polymer version of the classic Sjambok features a thick injection molded lash, and is equipped with a soft comfortable Kray-Ex handle that's designed to resemble braided leather.

Since the Sjambok is made entirely from super-tough polymers, it's incredibly durable and able to withstand weather conditions which would cause a traditional leather whip to break, crack or mildew.

Training Video: Self Defense with the Sjambok

In addition to its use as a cattle prod and whip, the African Sjambok is an incredibly effective means of self-protection.

Several Martial Arts systems throughout the world have explored their own application of the "rigid whip" and, in this DVD, Lynn Thompson and Ron Balicki will teach you a variety of combative training ideas for this fascinating tool.

- Advantages of the Sjambok
- Gripping methods
- Combative stances
- Footwork
- One and two handed striking methods Pommel strikes
- Pushing, pulling, and hooking
- Defeating disarm attempts Using footwork to avoid blows
- Smashing, choking, and sawing • Encircling, trapping and tripping
- Defeating the charge and the standing grapple
 Defending your
- weapon hand, stop hitting, counter slashing, parrying, and blocking.

Never Unarmed

Filmed over 2 1/2 years, "Never Unarmed" DVD series features Lynn C. Thompson with the gloves off as he discusses the pros and cons of a multitude of

Never Unarmed is a thought-provoking show-andtell discussion with Cold Steel's President, featuring concepts, theories and training insights gleaned from a lifetime of study and exploration.

Dealing with concepts familiar to members of the "prepper" community, Never Unarmed often discusses controversial and graphic topics including how to defend yourself against dangerous animals as well as how to neutralize violent human adversaries.

Written and presented for an international audience. Never Unarmed offers topics of discussion and tactical concepts for those who are already severely restricted in their ability to keep and bear

Lynn discusses the use of: air guns / .22 handguns / .22 rifles / mini revolvers / pocket pistols / service revolvers / service pistols / big bore handguns / single shot handguns / single shot rifles / double rifles, / bolt action rifles / pump action rifles / lever action rifles / semi auto rifles / single and double shotguns / pump action shotguns / semi-automatic shotguns

With graphic demonstrations and exciting feats of speed, accuracy, and fire power, Never Unarmed will change the way you look at and think about firearms forever.

SIX DISC SET: APROX. 19 HRS.

Stun, Stagger & Stop

This DVD set covers Martial Arts concepts, training and combative applications of the Walking Stick or heavy stick.

Cold Steel President Lynn C. Thompson and Guro Ron Balicki present:

- The Power Stroke. The Fan.
- The Drop Stroke.
- The Redondo.
- The Flurry Wrapping Strokes.
- The Punyo (using the butt of the stick).
- How to build strength, agility, and power in your strikes.
- Stop hitting, counter slashing, blocking, parrying.
- Hitting using one or both hands.
- Defense against an opponent who's trying to wrest your stick from you.
- Defeating the charge and grappling.
- Escape from a standing grapple.
- Strategy and tactics for dealing with multiple attackers, edged weapons, and blunt impact weapons.

2 DISC SET: APPROX. 5 1/4 HRS.

Death Down Under

Join Lynn C. Thompson on the hunting adventure

On this journey, you'll head into the rugged outback of the Northern Territories in Australia where Lynn will put his skills to the test by hunting huge Asian Buffalo!

Additionally, Lynn assists property owners and government departments to cull Buffalo, Red Deer, Fallow Deer and other pest animals that threaten local crops and livestock in Southern Australia. This video features footage from over thirty days of hunting throughout Australia.

- Disc #1 Knife Fighting. Disc #2 Sword Fighting.
- Disc #3 Spear Fighting. Demos & Throwing Events.

COLDSTEEL®

New Luzon Series

Lynn C. Thompson's love of Filipino Martial Arts encouraged this collaboration with Mike Wallace on the Luzon (LOO-ZAHN) folder. Inspired by several balisongs in Lynn's collection, but functioning as a flipper, the Luzons are a politically correct alternative for those who are unable to legally own balisongs. The Luzon's blades are comprised of 8Cr13MoV Stainless, and expertly hardened to 57-58 Rockwell and feature sharp, strong, points with just enough belly to make them equally useful for cutting and slashing. You'll be dreaming of the Philippines once you experience the Luzon's bamboo-inspired handles, featuring concave segments that offer countless comfortable grip options. Made of glass-filled nylon (GFN), the Luzon's handles are impervious to the elements, and are unlike any handle we've ever made before.

Handsome and budget friendly, and a breeze to flip open, the Luzons are a formidable choice for those going in harm's way. Offering incomparable levels of safety, they're equipped with a sturdy leaf-spring lock and a (patent-pending) secondary safety mechanism that, when it's engaged is extremely resistant to shock and impact. Your fingers will be safe even under the worst conditions. Available in two sizes, both feature a lanyard hole and left and right GFN pocket clips for ambidextrous carry.
