Fiber-Tech™ Technology provides the ultimate comfort and support.

Introducing Fiber-Tech™ Technology, designed to offer superior structural stability while maintaining a comfortable surface for a luxurious and refreshing spa experience.

POWERFUL AND SAFE HEATING SYSTEM

The Positive Temperature Coefficient (PTC) heater is designed to maximize heat transfer to the water, while ensuring the highest level of safety, performance and longevity.

HARD WATER TREATMENT SYSTEM

Built-in Hard Water Treatment System makes water gentler on skin, clothes and the entire spa system.

The system generates an electro-magnetic field that agitates calcium and other minerals in the water, causing them to create suspended crystals.

Hard water build up limits water flow and reduces the life of your spa.

The suspended crystals of hard water elements are retained in the filter cartridge, leaving soft water in the spa.

HYDRO AERATION TECHNOLOGY™

Intex is proud to bring you a new level of relaxation and water purity, by bringing revolutionary water aeration techniques into your backyard portable hot tub.

IMPROVED WATER CIRCULATION

Hydro Aeration Technology enhances filtration efficiency. Fine particles clump together and settle to the bottom of the spa during the aeration process, making it easier to remove and filter particles through the filtration system. Improved filtration and circulation create a cleaner, healthier, and more refreshing spa experience.

INCREASED NEGATIVE IONS AT WATER SURFACE

The aeration process increases negative ion concentration by infusing spa water with air. Increased negative ions have been proven to improve the air freshness around the spa as it removes air pollutants and neutralizes free radicals that affect air quality.

ENHANCED POWERFUL AND SOOTHING BUBBLE JETS

By mixing air with water, the total volume of bubbles is increased to give you a more vigorous and soothing massage.
