

## Step 1

- Download the VIA JSON File on the product page
- Connect the keyboard to your PC in wired mode and open the VIA configurator:

<https://usevia.app/>

- Switch on the “Show Design tab” on the **Settings** page.

## Step 2

Click “Load” and choose the JSON file you downloaded from the first step.

### Step 3

Find **Configure Page - Authorize Device** and add the keyboard as your device.  
Finished! Enjoy customizing your keyboard.
