SELECTOR CHART FOR G61 SERIES

SELECTOR CHART – FOR LENNOX G61MP & G61E SERIES

Use the selector charts below to choose the required add-on cooling system for your Lennox or alternative brand furnace.

Look for the furnace model on the left hand column and match up the most suitable capacity, power supply and coil type from the options listed.

A full system is made up of a condenser, indoor coil and TX valve. If transitions are required please refer to the Transitions section on page 73.

Note: The above information is compiled from publicly available information from manufacturers, the accuracy of which is not the responsibility of Lennox Heating and Air Conditioning.

No guarantee is expressed or implied as to the compatibility or performance of Lennox add-on cooling equipment when used with other brands of furnace.

Capacities listed are ARI Gross ratings (26.7/19.4 air on & 35°C ambient) obtained from Lennox Industries. For Net Capacity ratings, refer Lennox Technical Bulletin or MEPS Ratings at www.energyrating.gov.au.

Allowance has been made for stated available static pressure. In most cases, existing ducting should be increased.

Lennox Energy Efficient Solutions

Complete HVAC solutions that won't break the budget

Lennox split systems are stylishly designed and quiet during operation. They incorporate the latest energy-saving technology and are built to the highest standards. They offer energy ratings up to 3 stars, which exceed current stringent MEPS compliance.

When it comes to efficient gas furnaces, you can't beat a Lennox. The G61V has a star rating of 5.3, so you gain comfort and save money. And, when combined with optional Lennox Add-on Cooling, you enjoy year round climate control.

Plus, Heatcraft supply a broad range of Refac products, so whether you need to connect, hang, brace or mount, we've got you covered.

LennoxTM and RefacTM - Durable, cost effective solutions with today's environment in mind
