

TS4146

WIRELESS SYNCHRONIZED ANALOG CLOCK

Acurate, Synchronized Wall Clock

Facility-Wide Synchronized Time, Easy Installation, Maintenance Free

The TS4146 is a Wireless Synchronized Clock that comes with a Cherry Wood Frame and can receive time synchronization signals to provide accurate time display throughout any sized facility.

The TS4146 Synchronized Wall Clock receives a wireless time signal transmitted daily by a main wireless paging base station. It uses the time signal to automatically adjust its time during Daylight Saving Time changes and minor daily time adjustments, if necessary, to ensure accurate and synchronized time throughout the entire facility.

The TS4146 is battery operated and does not require any wiring, making it ideal for renovation projects and new synchronized clock system installations, while also providing years of improved productivity and a maintenance-free solution.

TS4146 KEY FEATURES

TIME ADJUSTMENT

Automatically adjusts for Daylight Saving Time or minor daily time adjustments so time is always accurate

POWER OPTIONS

Can be powered with C sized batteries, AC outlet, or low-voltage POE

CUSTOMIZABLE

Options for clock customization including 24 hour dial face, custom logo, red second hand, and sealed clock
