## HOW TO CONNECT

### WIRED CONNECTION

PC

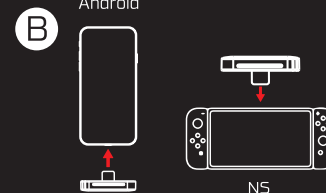

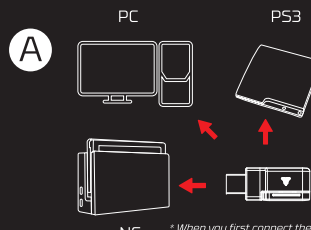

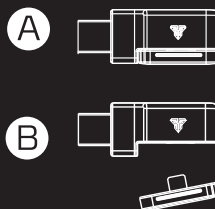

PS3

NS

### 2.4GHZ CONNECTION

\* When you first connect the dongle, you'll need to pair it.  
Press the "Home" button for 5 seconds to initiate  
the pairing process.

### LED INDICATOR

**X-Input**

(PC, Android)

**D-Input**

(PC, Android, Emu)

**S-Input**

(Emu, PS3, NS)

\* On PC, to toggle from X-Input to D-Input, press the home button for 3 seconds.

\* On Android, LED will only show D-Input notification as small picture above.  
Switch from D-Input to X-Input by pressing the home & snap buttons  
simultaneously for 3 seconds.

### FACTORY RESET

1. Press and hold the select button and R3 simultaneously.
2. Hold them for 10 seconds until the gamepad vibrates and all the indicator lights illuminate to activate.

\* After successfully resetting the gamepad,  
it will enter a locked state requiring you to  
plug in a wire to unlock it.

### TURBO MODE

1. To use the turbo effect, hold the Turbo button & press the action button you want to assign.
2. To clear the turbo effect, hold the Turbo button & press the button that you've already assigned.

\* The turbo function can be applied to  
these buttons:  
Action buttons, LT, RT, RB, LB.

### MACRO MODE

1. Press & hold the turbo button until the gamepad vibrates to activate.
2. Begin recording your macro, allowing up to 63 button inputs within a 5-minute window.
3. Press the turbo button again to stop recording & to execute the macro, press the turbo button twice.
4. To clear the macro, press & hold the turbo button until the gamepad vibrates, then press again the turbo button.

\* The macro function can be applied to:  
these buttons:  
Action buttons, LT, RT, RB, LB,  
directional pad.
