

Wireless Duress Alarm Solutions for Any Campus

When creating a safe school or campus environment, confidence is key. Administrators and safety officers need to know their staff can request help instantly and reliably. Responders need to know exactly where to go. Inovonics provides schools and campuses with just that: scalable and reliable ways to deliver duress alarms that help you respond quickly and protect what matters most.

Choices You Can Count On

Whether you need fixed-mount panic buttons, wearable duress pendants, or location-enabled mobile duress buttons, Inovonics provides extensive options in duress alarm solutions for your school.

Wireless Coverage for Any Campus

Our commercial-grade wireless mesh network flexibly adapts to schools of all sizes without trenching or wiring. Fully supervised network continuously monitors device status and battery levels to ensure reliable signal performance.

Precise Location-Based Alerts

Inovonics' advanced line of mobile duress buttons transmit emergency alerts with room-level accuracy, so first responders know exactly where to go, even in multi-floor buildings or sprawling campuses.

Works With the Systems You Trust

Integrate with lockdown protocols, access control, and mass notification platforms to trigger immediate alerts. Select integration partners offer direct connection to emergency response — meeting key requirements of Alyssa's Law.

Complete School Campus Coverage

Flexible Solutions to Suit Your School

Whether your school is starting with panic buttons or building a full safety ecosystem, Inovonics scales to fit your needs and budget:

SOLUTION	BEST FOR	FEATURES
Essential Duress Systems Basic emergency alert capabilities	Schools seeking a fast, cost-effective way to meet Alyssa's Law requirements.	Fixed or wearable panic buttons that integrate with existing security panels through Inovonics receivers.
Mobile Duress with Location-Based Alerts Enhanced emergency response	Schools with existing IT infrastructure and interest in future-ready, cloud-connected safety strategies.	Combines wearable duress buttons with cloud-based location tracking. When activated, the system can identify which room or floor the alert originated from, enabling faster and more targeted emergency response. Operates through Inovonics' cloud platform and partner integrations.

Beyond Panic Buttons

Expanded School Security

Inovonics supports more than panic buttons. Build a layered safety strategy with:

- **Asset & Staff Location Tracking**
Know where your people and equipment are in real time
- **Intrusion Detection**
Monitor vulnerable entry points
- **Environmental Monitoring**
Detect leaks, freezes, or other threats early
- **Mass Notification Integrations**
Send alerts across PA, text, or digital signage
