FAQ

What should I do if there is occasional freeze/delay?

If the LED on the headphone case does not turn on when opening or closing the headphone case, it is showing the power out status of the headphone case. In this situation, the automatic power on doesn't work. You need to touch the headphones manually to turn on the power.

What should I do if the bluetooth pairing is unsuccessful?

Occasionally there will be unsuccessful pairings. When it occurs, please ignore the connected Bluetooth device name in Bluetooth settings and turn off the device Bluetooth. Put the earphones in the headphone case for more than 10 seconds, then turn on the device Bluetooth, take the earphones out of the headphone case and wait for 5-10 seconds for the successful pairing.

Low battery mode:

When the battery is less than 20%, you'll hear alerts every 5 minutes.

Specifications

Model name

T1

Bluetooth version

5.3+EDR

Operating frequency

2402MHz-2480MHz

Working distance

≤10M

Charging voltage

5V/400mA

ANC mode

6 Mics for ANC

Standby time

260 Hours

Speaker impedance

32Ω±15%

FCC Statement

Manufacturer

Foxx Development Inc.

Brand

MIRO

Phone

(+1) 855-585-3699

Address

3480 Preston Ridge Rd Suite 500, Alpharetta, GA 30005

Precautions

What should I do if there is no sound from the earphones?

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

First:

Please check if the headphones are paired to the correct device.

Second:

Check the volume of the phone after connecting the headset to the phone. The maximum volume of the android phones is subject to the default volume of the phone.

Third:

Reorient or relocate the receiving antenna.

Reject:

Keep away from Wi-Fi, routers, and other high-frequency transmitting equipment. Those devices will generate radio interferences and cause the sound to be stuck or disconnected.

Answer:

When a call comes, double tap left or right headphone to answer the call.

Reject:

When a call comes, long press 2s left or right headphone to reject the call.

Multi-functional touch area

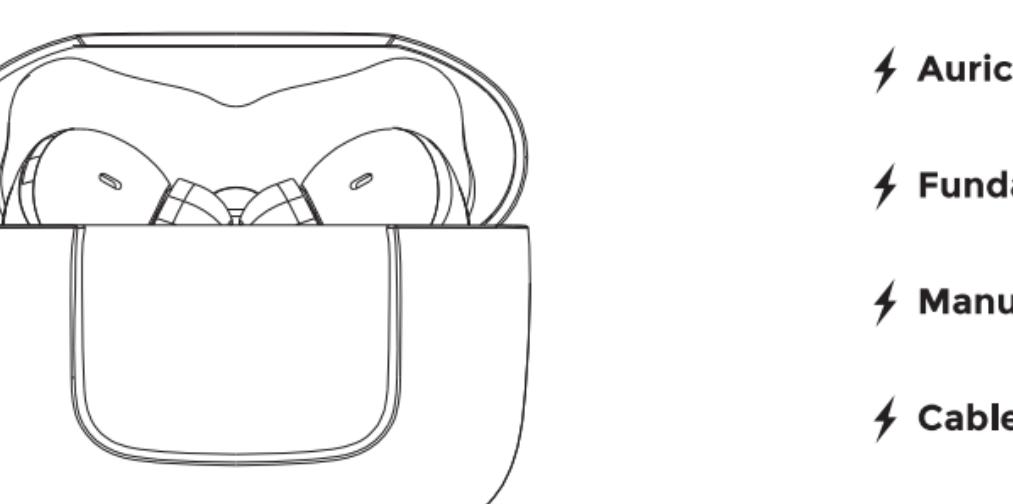

Master voice control

Speaker impedance
