

GIRA/KNX

To use KNX, you need a SMART BRIDGE.

Add a SMART BRIDGE to your garden.

Make sure the SMART BRIDGE is up to date and has at least software version, 1.5.5.

Click on 'Connect to KNX'.

Communicate the Pairing code & IP-adres with the KNX integrator

You want to work together with the integrator?
Here a list of the things he need:

- X1 or L1
- Logic Module
- Pairing code
- Installation manual

LOGIC MODULE

MANUAL

Make sure the SMART BRIDGE is connected to the same network as your phone

in-lite
