

Product size :

17mm /
0.67in

**External diameter
of the knob:**
13mm / 0.5in

**Internal diameter
of the knob:**
6mm / 0.24in

Exquisite
design

High quality

High temperature
resistance

Easy
Installation

Product description:

Product Name Potentiometer Control Knob

Size 13 x 17mm/0.51 x 0.67in **Hole Diameter** 6mm/0.24in

Applications For potentiometer, encoder, band switch, etc.

Product details:

The surface of the potentiometer knob has non-slip stripes, which will be more comfortable and convenient for installation and use. The overall material is made of PV plastic material, which is very durable, corrosion-resistant, strong conductivity and long service life.

How to use :

Easy to install and use,
no tools required, just
put the switch cap on
the switch head and
press the switch knob
firmly.

Applications :
