

Notice:Itunes files are NOT MP3 files, but rather MP4's. You can drag the Itunes MP4's easily into the IPX8 player, but if you do this without converting the files first to MP3's, the player will not change mode from Bluetooth to MP3 player. Converting the Itunes files to MP3's is super easy (google it), and after doing that and then uploading the converted files into the player, it WILL change mode to MP3 player (double click the center button) and play your music.

Bone Conduction Bluetooth Earphone

Instructions for usage and warranty
Operating instructions and Warranty description

Ear phone's introduced

Charge

The headphone with a rechargeable battery , the first use of the headset must be fully charged to the battery . In use , if the voice " Di-Di " prompting low power , that the battery is low , then you need to charge the headset .
