
Get Started with the NXP i.MX RT1010 Development Kit

Develop Arm® Cortex®-M7 powered Audio,
DSP and Motor Control Projects

Dogan Ibrahim

Contents

Preface	9
Chapter 1 • The MIMXRT1010 Evaluation Kit (EVK)	10
1.1 Overview	10
1.2 The MIMXRT1010 Evaluation Kit hardware	10
1.2.1 The i.MX RT1010 processor	11
1.2.2 ON/OFF button	12
1.2.3 Reset button	12
1.2.4 User button	13
1.2.5 LED indicators	13
1.2.6 JTAG connector	13
1.2.7 Audio input/output connector	13
1.2.8 Power supply	13
1.2.9 Digital and analog modules	14
1.3 Getting started	15
Chapter 2 • Installing the Mcuxpresso Software	16
2.1 Overview	16
2.2 Installing the MCUXpresso SDK and IDE	16
2.3 Testing the installation	17
2.4 Creating a project from scratch	23
2.6 Importing an exported project	27
2.7 MCUXpresso for Visual Studio Code	28
Chapter 3 • Simple Program Examples and Debugging	30
3.1 Software only programs	30
3.2 Example 1 – Sum of integer numbers	30
3.3 Example 2 – Table of squares	33
3.4 Example 3 – Centigrade to Fahrenheit	34
3.5 Example 4 – Times table	36
3.6 Example 5 – Table of trigonometric sine	38
3.7 Example 6 – Table of trigonometric sine, cosine and tangent	40
3.8 Example 7 – Integer calculator	42

3.9 Example 8 – Solution of a quadratic equation	44
3.10 Example 9 – Squares and cubes of numbers	46
3.11 Example 10 – Factorial of a number	48
3.12 Debugging a project.	50
3.12.1 Example debug session	52
Chapter 4 • LED Projects	56
4.1 Overview	56
4.2 Project 1 – Flashing an external LED	58
4.3 Project 2 – LED flashing as Morse SOS signal	64
4.4 Project 3 – Alternately flashing two LEDs	66
4.5 Project 4 – Chasing LEDs	70
4.5.1 More efficient program	75
4.5.2 Using PortClear and PortSet functions	77
4.6 Project 5 – Binary counting LEDs.	80
4.7 Project 6 – Random flashing LEDs	83
4.8 Project 7 – Lucky day of the week	86
4.9 Project 8 – Binary up/down counter with LEDs	90
4.10 Project 9 – Binary event counter with LEDs.	93
Chapter 5 • 7-Segment LED Displays	96
5.1 Overview	96
5.2 7-Segment LED display structure.	96
5.3 Project 1 – 7-Segment 1-digit LED counter.	98
5.4 Project 2 – 7-Segment 4-digit multiplexed LED display.	102
5.5 Project 3 – 7-Segment 4-digit multiplexed LED display counter – timer interrupts	109
5.6 Project 4 – 7-Segment 4-digit multiplexed LED display counter – blanking leading zeroes	113
Chapter 6 • Using Serial Communication	117
6.1 Overview	117
6.2 Project 1 – Serial communication between the MIMXRT1010-EVK Development Kit and an Arduino UNO	119
Chapter 7 • I²C Bus Interface	124
7.1 Overview	124

7.2 The I ² C Bus	124
7.3 Project 1 – Port expander	125
7.4 Project 2 – TMP102 temperature sensor chip	135
Chapter 8 • SPI Bus Interface	145
8.1 Overview	145
8.2 Project 1 – Port expander	146
Chapter 9 • Using LCDs	156
9.1 Overview	156
9.2 The HD44780 LCD module	156
9.3 Project 1 – Displaying text on LCD	158
9.4 Project 2 – Using LCDs – simple up counter	167
9.5 Including the LCD codes in a program	174
9.6 Project 3 – Using LCDs – simple up counter – including LCD header file	180
9.7 Project 4 – LCD-based conveyor belt goods counter	182
9.8 Project 5 – Event counter – using external interrupts	187
Chapter 10 • Analog-To-Digital Converter (ADC)	191
10.1 Overview	191
10.2 Project 1 – Voltmeter	191
10.3 Project 2 – Analog temperature sensor	196
10.4 Project 3 – ON/OFF temperature controller	201
10.5 Project 4 – ON/OFF temperature controller – using LCD	206
10.6 Project 5 – Measuring the ambient light intensity	211
10.7 Project 6 – Ohmmeter	214
Chapter 11 • Using Pulse Width Modulation (PWM)	220
11.1 Overview	220
11.2 Basic theory of the pulse width modulation	220
11.3 Features of the i.MXRT1010 processor PWM	222
11.4 Operation of the PWM	222
11.5 Project 1 – Mosquito repeller	225
Chapter 12 • Electric Motors	232
12.1 Overview	232
12.2 Project 1 – Two-speed motor speed control	232

12.3 Project 2 – Varying the motor speed	238
12.4 Project 3 – Changing the speed and motor direction	244
Chapter 13 • Using the CMSIS-DSP Library.	254
13.1 Overview	254
13.2 Project 1 – Matrix addition, multiplication, and transpose	255
Chapter 14 • Sound and Audio Signal Processing (DSP)	262
14.1 Overview	262
14.2 Analog and digital audio sound	262
14.3 Digital audio sound file formats	263
14.3.1 Uncompressed audio file formats	263
14.3.2 Audio files with lossy compressions	264
14.3.3 Audio files with lossless compressions	264
14.3.4 Which audio file format to choose?	265
14.3.5 High-quality digital audio sound	265
14.4 Audio digital signal processing (Audio DSP).	265
14.4.1 The SAI module	266
14.4.2 The I ² S bus	266
14.4.3 The SAI bus	269
14.5 MIMXRT1010-EVK development kit audio demo project files	269
Chapter 15 • References	273
Index	274
