Description

The Series 2 industrial displays are available in sizes from 10.1" to 21.5" and can be equipped with either a projected capacitive, resistive or no touchscreen. Particularly noteworthy is the extremely narrow display edge, which enables an almost frameless design. The front of the housing is IP65 rated and, thanks to the specially designed die-cast aluminium housing, has a very compact and robust design. The low installation depth means that the displays can be used almost anywhere.
