Product Overview

1. Battery Camera

- ① Hidden antenna;
- ② 3.6mm HD lens;
- ③ The explanation of LED indicator and some function buttons:

Red light is always on: The camera is being previewed remotely.

Red light flashes constantly: The camera is reset or waiting to be paired.

Green light is on: The camera is woken up

The green light flashes constantly: Charging

- ④ 4pcs infrared lights and floodlight;
- ⑤ Microphone;
- ⑥ PIR motion sensor;
- ⑦ Type C charge port: DC 5V;
- ⑧ Power ON/OFF.
- ⑨ Speaker.
- ⑩ **TF card slot:** Support micro SD card for local storage (Max 128GB);

Reset button: Press and hold for 5-8s, you will hear a prompt tone.

NOTE: After resetting the camera, you need to re-pair the camera again, otherwise there will be no image;

2. Camera Installation

1. The metal bracket could be installed on the ceiling and wall, please fix it with the providing screws.

2. Install the camera base into the metal bracket and align the screw holes.

3. Fix the camera on the metal bracket with the providing screws.

4. Open the waterproof rubber plug, Connect solar panel (Type-C port)

Installation complete

Note before installing the camera

1. The camera shooting angle is about 90°.
2. PIR senses human activities, and the distance to activate the monitoring is about 16ft~20ft.
3. The camera is not easy to appear offline within 100ft from the WiFi router.
4. When using the camera for the first time, it is recommend that you charge the camera for 6 hours first.

NOTE:

1. Test the WiFi signal at installation position: Use cell phone to test Wifi signal quality at the installation position before installing camera, make sure the WiFi router can provide good WiFi signal.

2. Hang the camera 7-10 ft (2-3 m) above the ground. This height maximizes the detection range of the motion sensor of the camera.
3. Avoid placing the camera under direct sunlight.
4. If a moving object is walking straight towards the camera, the camera may fail to detect motion.

Ours vs others solar battery camera

	Ours	Others
Pixel	4mp	1080P(2mp)
Battery	9000mA	4500mA
Solar panel	4W	3W
Pair to NVR	√	×
Two-way audio	Talk and listen at the same time	Can't talk and listen at the same time
Recording	Uninterrupted or Event recording	Only event record

Uninterrupted recording mode:

When battery level below 50, automatically switches to event recording mode. When battery level above 80, resumes to uninterrupted recording mode. This mode consumes power fast and is suggested only when your camera works with plug-in power.

How to paired the camera to NVR recorder?

It can be configured on both NVR and mobile phone

Configured on NVR:

Step 1 Delete camera: Right -click on the mouse → select camera settings → Delete the camera of that channel (skip this step if no camera has been added to the channel).

(CH1)CAM1

Keep recording

ON

Step 2 Reset camera: Take the camera near the NVR and reset it.

Step 3 Pair camera: Click the "+" on the channel, the NVR will say that the camera is being paired, wait for about a minute, and the NVR will say that the pairing is successful.

Configured on mobile APP:

Step 1 Delete camera: Double-click the channel you want to set, click the settings icon in the upper right corner to enter camera setting, go down to the bottom, and click "Delete channel" (skip this step if no camera has been added to the channel).

Step 2 Reset camera: Take the camera near the NVR and reset it.

Step 3 Pair camera: Enter the real-time viewing interface of the APP, click the "+" on the channel, the NVR will say that the camera is being paired, wait for about a minute, and the NVR will say that the pairing is successful.

For detailed operations, please refer to the guide:

mmqcamera.com/setup1

Enter recording setting→ set record mode and record time:
Record mode: event recording or uninterrupted recording
Record time: all day/day time/night time/ custom
recording period

4) Delete camera

Delete the camera of this channel before adding a new
camera.

Frequently Asked Questions | Troubleshooting

1. Prompt "device offline" on the APP

It means that the camera failed to connect to the Internet.

- 1) Please make sure the battery camera and WiFi router is in a valid signal range. Don't install the camera too far away from the WiFi router, otherwise the camera won't always stay online.
- 2) Check if the camera have enough electricity to work. We suggest that the solar panel should be installed in the place where the strong sunlight can be received continuously. If it is cloudy continuously, we suggest that you charge the camera with a mobile phone charger.
- 3) Power it off and power on again to check it work?
(the power switch is next to the type-c port) .
- 4) Reset the camera and pair it again .

2.Can't receive alarm notification?

- ① Enter APP→Me→settings→Enable"Notification banner"
- ② Enter your app →Me → system authority settings→ Enable "Notification".
- ③ Enter your app→Device→ system authority settings → Enable "Alarm push".
- ④ Enter your app→enter the live view interface, click Settings→Push message settings→Enable "APP push alert message"
- ⑤ The installation of the camera is too high (recommended 2-3 meters), so the camera does not detect the human body.

2. APP received too many alarm messages

Enter the camera settings → Motion detection alert → Intelligent settings

- 1 Sensitivity set to "LOW".
- 2 Custom detection area.
- 3 Change position or adjust direction.

3. I can't play back the video

- 1) Enter camera settings → storage settings → Local storage space shows TF card information which is normal.
- 2) When playing back on the mobile phone, select "SD" to play back the video of the local storage.

Playback

- 3) Maybe there is no video recording at this time, please try another date and time (the battery camera will only record when there is a motion alarm)
- 4) The camera recording mode is set to record only motion alarm, so there is no recording at this time.

4. Set up siren and floodlight

When the camera detects a moving object, it can sound a siren and turn on a floodlight to warn intruders, by default, siren is off and floodlight is on, you can modify it according to your needs:

Enter camera Settings → Motion detection alert → "Siren settings/white light alarm".

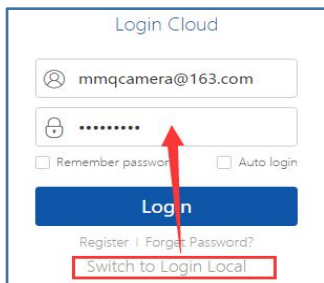

5. How do i view my cameras on computer?

① Download the computer software "Eseecloud" (not the same software as the mobile APP "Eseecloud"):

mmqcamera.com/download-eseecloud-pc

② Login PC software(There are 2 ways)

1) Log in with the mobile APP account, after logging in, the devices that have been added to the APP will be synchronized, and you can watch immediately.
