

Colour Match Express

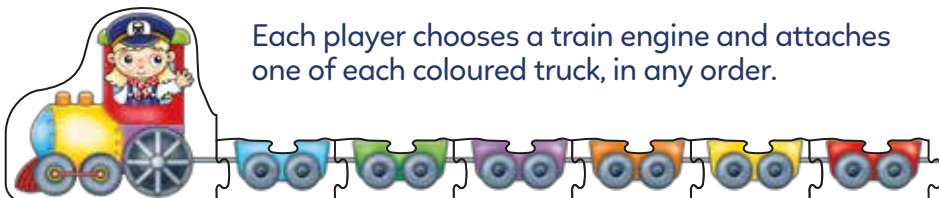

Fill your train by rolling the dice and matching the coloured animals and carriages. A fun colour matching game!

Contents

• 4 train engines • 24 passengers • 24 trucks • 4 luggage trucks • 1 colour spot dice

Setting up the game

Each player chooses a train engine and attaches one of each coloured truck, in any order.

The passengers and luggage trucks are placed, face up, on the table.

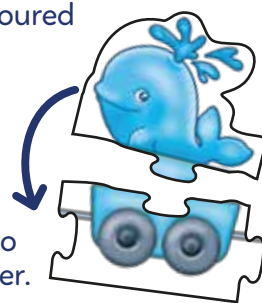

1 To play

The youngest player starts. Roll the dice and choose a passenger which matches the colour rolled. Attach your passenger to the matching coloured truck.

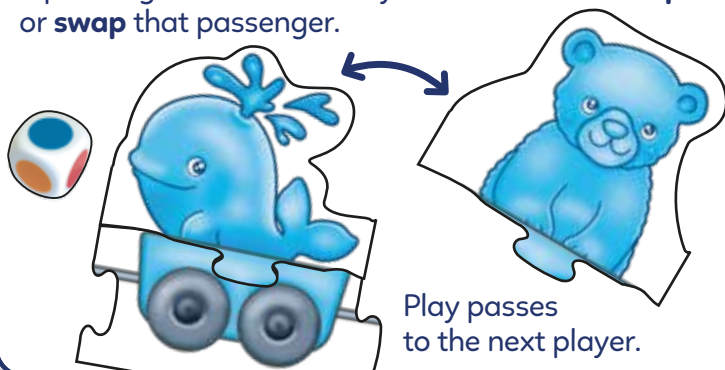

Play passes to the next player.

2 Rolling a colour you already have

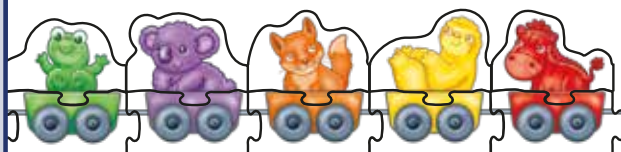

If you roll a colour and you have already collected a passenger of that colour, you can decide to **keep** or **swap** that passenger.

Play passes to the next player.

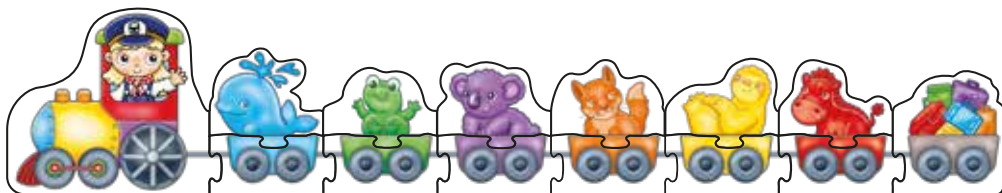

3 Add the luggage truck

Once you have filled all your trucks with matching coloured passengers, you can pick up a luggage truck and attach it to the end to complete your train.

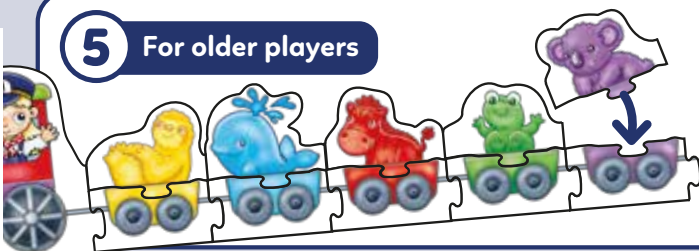

4 The winner

The winner is the first player to get all six passengers on their train and attach a luggage truck.

5 For older players

For a more challenging game, players can collect their passengers in the same order as the colours of their trucks. If a player has first attached a yellow truck to their engine, then a blue, then red, then green, then purple and orange, they collect their passengers in that same order and finish with a luggage truck to win the game.
