

Fireplace Dimensions

Model		A	B	C	D	E
TR-42	IN	42 1/4	39 1/4	32	40 1/16	5x8
	MM	1073	996	812	1017	127x203
TR-46	IN	46	43 1/16	36	44	5x8
	MM	1168	1093	914	1117	127x203

Clearances below are to non-combustible materials.

Chimney Installation

Horizontal Termination

For 5x8 vent pipe termination create a 10"x12" opening

Vertical Termination

For 5x8 vent pipe termination create a 10"x10" opening

Flat vs Recessed Installation

Flat Installation

Recessed Installation

Heat Release and Air Intake

Required Heat Release Open Air-Flow Minimum

42" and 46" Traditional Fireplace - 140 square inches minimum.

Required Air Intake Open Air-Flow Minimum

42" and 46" Traditional Fireplace - 70 square inches minimum.

*(*Traditional, Blower Kit, Double and Triple Glass)*

*(***Openings are measured for open air-flow)*

NOTE: Dimension “Y” assumes the fireplace legs are set to the default height of 2”, placing the glass opening at 4” above the floor. This “Y” dimension can change based on where your client wants their viewing window.

*All framing and finishing must be secured to your projects back wall, ceiling or floor and must never bear weight on the fireplace in any circumstance. For more information reference the [Installation Manual](#).
