BEFORE YOU START

All Flatline Van Co products must be properly assembled and secured before attaching to your vehicle. Improper attachment could result in an automobile accident, and could cause serious bodily injury or death to you or to others involved. You are responsible for assembling and securing Flatline Van Co products to your vehicle, checking the mounting points and attachments prior to use, and regularly inspecting the products for wear and or damage. We always recommend you use a professional to install any aftermarket accessories to your vehicle. If you have no mechanical experience and are not thoroughly familiar with the installation procedures, you must have the product installed by a professional installer or other qualified persons. The responsibility is yours and must be taken seriously for everyone's safety.

INSTALL

STEP | 01 LAYOUT AND INSTALL PREP

The **Rear Platform Gear Cage** is designed to be compatible with **FVC Rear Door Platforms**, but can be modified for installation with other rear door accessory systems.

1.1 Determine Mounting Height: Dry fit the cage to your mounting surface and determine the desired height of install. If you'd rather measure, see **FIG 2** for distances between the mounting points.

1.2 Modify Gear Cage (Optional): If you are using a product other than the FVC Rear Door Platform, mark the back of the **Rear Panel** to match your available mounting points and drill out (4) 3/8" holes accordingly.

PRO-TIP: A table or stand of an appropriate height can be very helpful during this install.

PRO-TIP: Masking tape can also be used to mark desired install height.

NOTE - Modifying your **Rear Storage Box Gear Cage** for mounting to products other than FVC Rear Door Platforms is done **at your own risk**. If you don't feel comfortable installing this on your own, see our **Find a Builder or Upfitter** page to locate an approved installer near you.
