LEZYNE

ELECTRONICS YEAR 12

Much like our rapid rise to becoming a leading LED light maker, we've quickly established ourselves as a premier player in the GPS market. With a dedicated in-house R&D team of programmers and engineers, we are able to stay at the forefront of technology in both categories. Our electronics team is constantly working to stay ahead of the curve; an example of this is the always free periodic GPS firmware updates that add new features and functionality to our existing devices. The following pages feature our category-leading collection of LED lights and our state-of-the-art GPS platform.

GPS COMPUTERS

WE OFFER THE MOST COMPLETE GPS PLATFORM AVAILABLE,

including all-new off-line navigation and customized training integration. When paired with our free Ally smartphone app and corresponding GPS Root website custom routes with turn-by-turn navigation can be created. Once a location map is downloaded through the phone app on-line the GPS has off-line mapping, navigation and route building capabilities if you lose a phone signal. Starred Strava Routes can now be followed through the app. We also have complete integration with Today's Plan and TrainingPeaks apps and websites allowing users to follow structured workouts on training specific pages with multiple data fields. Lezyne GPS offers all this and a whole lot more.

NEW

MEGA XL GPS 83g
48-HOUR RUNTIME

The ultimate in GPS technology, our new Mega XL is a must have device for serious road, gravel and mountain bike riders and racers as well as long distance adventure riders. Its 2.7-inch, 240x400 high-resolution display is 50-percent larger than our Super GPS and includes the option of vertical or horizontal viewing modes.

MEGA XL GPS FEATURES:

- Durable, composite construction
- Super accurate, advanced data recording system combines GPS plus Glonass satellites
- Simultaneous ANT+™ and Bluetooth Smart connectivity
- Multiple real-time features when paired to the Lezyne Ally app
- Barometer and accelerometer
- Simple setup through Lezyne Ally phone app
- Import .tcx and .gpx files
- Trainer Mode
- Multiple bike profiles
- Full navigation
- Custom route building
- Intuitive four button operation
- Lithium polymer battery provides up to 48 hours of runtime
- Micro USB rechargeable
- Stores up to 800 hours of ride data
- Customizable fields and page count (up to 10 fields)
- On screen preloaded maps
- Custom alerts and auto presets
- Extremely weather resistant
- Includes X-Lock Standard Mount

CONNECTIVITY:

- Receive text, email, phone call and message app notifications when paired to smartphone
- Sync rides via Bluetooth Smart to the Lezyne Ally phone app
- Instant download of ride files (.fit) via plug-and-play flash drive technology (Windows/Mac) and upload directly to GPS Root website for ride analysis
- Auto-sync to Strava, TrainingPeaks and Today's Plan
- Pairs with Bluetooth Smart or ANT+ enabled heart rate monitors, cadence/speed sensors and power meters
- Connects with compatible electronic drivetrains
- Turn-by-turn navigation
- Off-line maps and rerouting
- Follow starred Strava segments and routes
- Follow structured workouts from Today's Plan and TrainingPeaks

DIMENSIONS:

- Computer: 57.5mm (W) x 78.3mm (L) x 26.6mm (H)
- Screen: 35.3mm (W) x 58.8mm (L)
- Weight: 83 grams

DISPLAY DATA:

- Map
- Turn-by-turn navigation
- Live Tracking icon
- Strava Live Segments
- Structured Workout
- Heart Rate*: Current, Average, Max.
- Cadence*: Current, Average
- Power* (6 data display options)
- Training specific fields
- Electronic drivetrain data
- Speed: Current, Average, Max.
- Distance: Current, Trip Total, Trip 2, Odometer
- Time: Ride Time, Clock
- Date
- Laps and lap averages
- Elevation: Ascent, Descent, Current
- Grade
- Calories
- Temperature
- GPS signal strength
- Battery life indicator for device and paired devices
- Connected devices icons
- Bread crumb trail page

LOADED KITS

Expanded GPS kits loaded with additional accessories and mounts. Durable Composite Matrix container with sturdy foam organizer. Three available options cover all our GPS models.

- NEW

Mega Loaded Kits
MEGA LOADED KIT CONTAINS:

 - GPS Computer
 - Heart Rate Flow Sensor
 - Speed/Cadence Flow Sensor
 - Direct X-Lock Mounting System
 - Micro USB charging cable

- Super Loaded Kit**
Micro C Loaded Kit
Mini / Macro Loaded Kit
Micro C Watch Loaded Kit
Micro Watch Loaded Kit
- LOADED KIT OPTION 1 CONTAINS:
- GPS Computer or Watch
 - Heart Rate Flow Sensor
 - X-Lock Standard Mount
 - Micro USB charging cable
 - Bar watch mount (watch only)

- Super Loaded Kit**
Micro C Loaded Kit
Mini / Macro Loaded Kit
- LOADED KIT OPTION 2 CONTAINS:
- GPS Computer
 - Heart Rate Flow Sensor
 - Speed/Cadence Flow Sensor
 - X-Lock Standard Mount
 - X-Lock Forward Mount
 - Micro USB charging cable

DIRECT X-LOCK SYSTEM

- Versatile GPS and accessories forward mount.
- Multiple mounting options to maximize GPS and accessories placement
- Composite matrix construction with aluminum arms.
- Bolts directly to stem faceplate.
- Lezyne X-Lock and GoPro mount compatible.
- Includes mounting hardware

This product is not affiliated with, endorsed by or in any way associated with GoPro Inc. or its products and services. GoPro, HERO, Session, Karma and their respective logos are trademarks or registered trademarks of GoPro, Inc. *FormMount licensed from F3 Cycling

- HEART RATE FLOW SENSOR**
47g
- Durable, lightweight polycarbonate with translucent body.
 - Conforms to Bluetooth Smart standards for maximum compatibility.
 - Flexible athletic strap.
 - Replaceable CR2032 coin cell battery.

- CADENCE SPEED FLOW SENSOR**
26g (w/ battery), Magnet 6g
- 2-in-1 speed and cadence sensor.
 - Conforms to Bluetooth Smart standards for max compatibility.
 - Powerful rare earth magnets allows wider engagement spacing.
 - Lightweight polycarbonate construction.
 - Adjustable swingarm and versatile mounting system.
 - Replaceable CR2032 coin cell battery.

X-LOCK MOUNT

- 6g (mount only)
- Utilizes Lezyne's unique press-and-twist X-Lock system.
 - Constructed from composite matrix.
 - Includes two pairs of different sized mounting O-rings.
 - Fits a wide range of bars and stems.
 - Included with all Lezyne GPS units.
 - Mount in any direction.

FORWARD MOUNT

- 22g
- Low profile and streamlined.
 - Utilizes Lezyne's unique press-and-twist X-Lock system.
 - Composite matrix construction.
 - Sold separately or in Loaded Kits.

The Free Lezyne GPS Ally App.

GPS ALLY APP

Our GPS Ally phone app is more than just an app, it's the nucleus of our interactive GPS platform. Acting as a link between rider and GPS, a whole collection of features are readily available when paired through a Bluetooth Smart connection. Quickly and easily program and customize your GPS device directly from your phone with the Ally App. Rides can be wirelessly uploaded to our Lezyne GPS Root and auto-synced to Strava, Today's Plan and TrainingPeaks. By enabling notifications you can get phone notifications including texts, email and phone calls as well as from multiple popular messaging apps. Load Strava Live Segments to chase PRs or Q/KOMs in real time. Utilize mapped route-building capabilities or load a saved route to get instant turn-by-turn directions. Upload and save a map to experience off-line mapping, navigation and re-route if you lose a phone signal. Enable the Lezyne Track tracking feature so friends and family can follow your ride in real time.

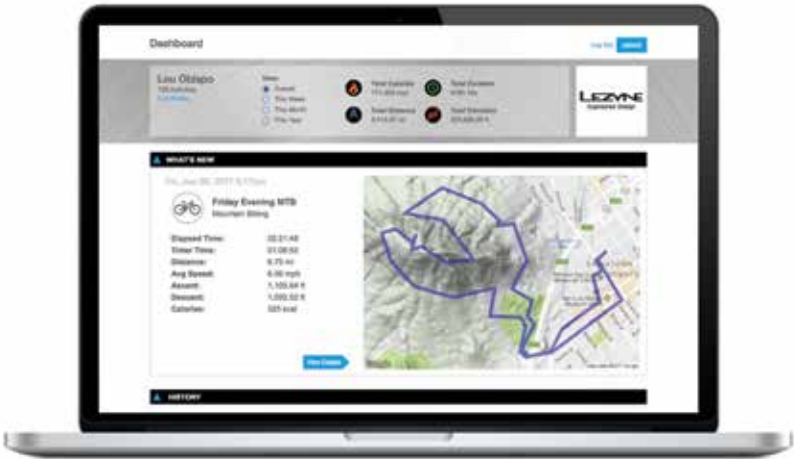

OFF-LINE NAVIGATION AND MAPPING

Riding anywhere and everywhere without getting lost is as easy as creating your own route using way-points, searching for an address or tapping a destination with our Lezyne phone app mapping, Strava Route Builder or Ride With GPS to create customized and detailed turn-by-turn navigation.

We also feature unique off-line navigation capabilities. With an online connection to our Ally phone app, you'll download a map of your desired region and once it's saved you can continue building routes through waypoints, searching for an address or simply tap a destination for instant turn-by-turn navigation—even if you end up offline. Once the region map is downloaded and saved you're no longer relying on your phone signal for navigation.

Comprehensive Navigation, Route Building and Mapping integration.

The Free Lezyne GPS Root Cycling Database.

GPS ROOT WEBSITE

GPS Root is a free, user-friendly website developed to organize and analyze ride and training information. Activity data can be uploaded directly from any Lezyne GPS computer and then shared (optional) on Facebook®, Twitter®, Strava or sent via email. Ride and activity detail is intuitively cataloged and data can be examined in low, high or ultra resolution for comprehensive evaluation. Data is also synced via cloud technology with the Lezyne Ally app. Furthermore, custom routes can be created virtually anywhere in the world within the Root website for the ultimate turn-by-turn navigation platform.

LED LIGHTS

OUR RANGE OF ENGINEERED LED LIGHTING CONTINUES TO LEAD

the industry in quality and safety. Our lights are designed and produced in-house meeting our strict performance standards. Our LEDs feature advanced programming, the best materials, lenses and electronics and they're quality tested in our own integrating sphere to verify our stated lumen output and runtimes. With daytime visibility becoming more important than ever we offer a full range of head and taillight options to keep you safe at all hours of the day. This year we've also developed new remote switches found in select Loaded kits.

DECA DRIVE 1500i 268g

LOADED KIT Includes: *Infinite Light Power Pack, USB Cable*

- Max 1,500 lumens high performance LED system.
- 266 hour runtime in Femto mode (with one Infinite Light Power Pack).
- Optimized Constant Lumens System maintains steady lumen output.
- Heat-dissipating CNC machined aluminum construction.
- MOR Optics optimizes output and beam pattern.
- Race Mode toggles between Overdrive and Economy Modes.

- External power pack doubles runtimes of compatible Power & Deca LEDs.
- Can be used as an external USB charger for GPS units or mobile phones.
- Securely mounts to bars or frames.
- Powerful 6000mAh capacity.
- Includes 14"/35.56cm cable.

SUPER DRIVE 1500XXL 257g

LOADED KIT Includes: Remote Switch, Direct X-Lock System, USB Cable

- Max 1,500 lumens / 148 hour runtime in Femto mode.
- Optimized Constant Lumens System maintains steady lumen output.
- Heat-dissipating CNC machined aluminum construction.
- MOR Optics optimizes output and beam pattern.
- Race Mode toggles between Overdrive and Economy Modes.

STVZO LEDS

Specific to the German market and its regulations, our StVZO compliant lenses maximize brightness and safety by combining an approved floodlight with a long-range beam that’s capped off to prevent oncoming traffic from being interfered by the light.

POWER STVZO PRO 80+

290 Lumen / 80 Lux

- StVZO optimized lens with high output LED.
- CNC machined aluminum body.
- Rechargeable double-cell Li-Ion battery with charge indicator.
- Three power modes: 290 lumen Blast, 180 lumen Enduro, 80 lumen Economy.

E-BIKE LEDS

Our new line of e-bike lights are designed to be an aftermarket performance upgrade to road, mountain and commuter e-bikes. They easily plug into batteries from top makers including Bosch, Shimano and Yamaha. Improve your view and safety with Lezyne e-bike lights.

MACRO DRIVE 1000

- 1000 Lumen
- Includes Direct X-Lock and aluminum CNC fork mount.
- Enhanced Maximum Optical Reflection (MOR) lens.
- E-bike compatible 6 – 12v input, 6w.
- 140cm power cable included.

MICRO DRIVE 500

- 500 Lumen
- Includes Direct X-Lock and aluminum CNC fork mount.
- Enhanced Maximum Optical Reflection (MOR) lens.
- E-bike compatible 6 – 12v input, 6w.
- 140cm power cable included.

POWER STVZO PRO E80

- 280 Lumen / 80 Lux
- StVZO optimized lens with approved flood and long range beam.
- Includes Direct X-Lock and aluminum CNC fork mount.
- CNC machined aluminum body.
- Intelligent auto day 50 lux/night 80 lux mode increases battery life.
- E-bike compatible 6 – 12v input, 8w.
- Computer controlled thermal management gradually controls light output.
- 140cm power cable included.

HECTO STVZO E50

- 200 Lumen / 50 Lux
- StVZO optimized lens with approved flood and long range beam.
- Includes wire fork mount.
- CNC machined aluminum body.
- E-bike compatible 6 – 12v input, 4.5w.
- 140cm power cable included.

FENDER REAR STVZO

- Two high output LEDs provide 11 lumens.
- StVZO optimized lens with wide light spread.
- E-bike compatible 6 – 12v input, 1.25w.
- Composite matrix fender mounting system.
- IPX7 water resistant.
- Stainless Allen key hardware included.
- 135cm power cable included.

DIRECT X-LOCK SYSTEM

- Versatile LED and accessories forward mount.
- Multiple mounting options to maximize LED and accessories placement
- Composite matrix construction with aluminum arms.
- Bolts directly to stem faceplate.
- Lezyne X-Lock and GoPro mount compatible.
- Includes mounting hardware
