FLEXYLED DIY

Flexible and configurable LED modules for integration into profiles and micro-profiles

Tailor-made light, designed for every project. The FLEXYLED DIY collection by Domus Line offers a complete range of flexible linear LED modules, developed for precise and discreet integration into profiles and micro-profiles, including fixtures with removable diffuser screens.
Available in dimmable single-colour, dual-colour D-Motion, or dual-colour D-Motion Wave versions (with progressive switch-on and reverse sequence switch-off), the FLEXYLED DIY modules are built on LED strips ranging from 6 to 10 mm in width. Depending on the model, they can be installed by sliding into place or using an adhesive base. The 6 mm LED strips are compatible with Plug&Play CH6 and CC6 connection systems.

All versions are available in 10 or 20-meter reels without power cables or, upon request, as Prewired (PW) modules in customized lengths, complete with a 2000 mm cable and Micro24 male connector. The light sources can be cut into regular segments—depending on the model—to provide maximum freedom of configuration.

The collection includes high-density LED modules that ensure continuous, homogeneous lighting without visible interruptions, with solutions offering up to 504 LEDs per meter. Every light source is designed to precisely meet increasingly advanced lighting and aesthetic requirements.

FLEXYLED DIY is the ideal solution for those seeking versatile, high-performance light sources that can be invisibly integrated and adapt to various shapes, functions, and atmospheres. A collection designed to illuminate with intelligence, precision, and freedom.

Warranty

Each unit is fully guaranteed for a period of 24 months from the date of delivery. From the warranty are excluded all defects caused by force majeure (lightning, fire, etc..), as well as any damage caused by improper use of equipment. The products must be installed and/or used in accordance with the specifications and instructions given by Domus Line Srl. They must also be installed and/or used in compliance with the provisions governing the installation and/or use of electric material force in the country where the products are installed and/or used. To this end, the buyer expressly releases Domus Line Srl from any responsibility for improper use, failure to comply with safety standards, technical specifications and instructions for use. The products which do not meet the standards and/or specifications in force in the European Union, will only be provided to the buyer that in the order specifies that the destination country does not belong to the European Union and indicating to have exhausted all the controls on compatibility of safety standards in force in the country outside the EU for which they are intended. In the absence of other arrangements for testing of the equipment, the standards established by the CEI (Italian Electrotechnical Committee) are valid. The warranty is void without fail in the event of tampering with the equipment by persons or technicians not specifically authorized by Domus Line Srl. The warranty does not cover normal wear and tear or the consequences of improper installation, nor the failure and/or breaks caused by inexperience and/or neglect.
