

# HACH SC200 UNIVERSAL CONTROLLER WITH ULTRASONIC FLOW SENSOR

## Applications

- Wastewater
- Collection Systems
- Industrial Water

**The SC200 Universal Controller with Ultrasonic Sensor is designed to give highly accurate flow and depth measurements for your open channel flow monitoring applications.**

From the easy-to-read display to reliable data management with SD card data transfer, the flow system provides an economical choice for flow monitoring.

The flow system can be used for a variety of applications including NPDES permitting requirements and the monitoring of storm water, inlet flow, final effluent and activated sludge. It replaces the Hach GLI53 analog controller with advanced features for easier operator use.

The SC200 controller platform can be configured to operate either 2 Digital Sensor Inputs, or 1 or 2 Analog Sensor Inputs, or a combination of Digital and Analog Sensor Inputs. Customers may choose communication options from a variety of offerings ranging from MODBUS RTU to Profibus DPV1.

## Maximum Versatility

- Standardized controller eliminates the need for a variety of dedicated controllers
- Multi-channel controller operates either 1 or 2 sensors reducing inventory holding costs and providing an inexpensive option to add a second sensor at a later time
- True dual sensor controller provides 4-20 mA outputs to transmit primary and secondary measurement values
- Controller may be panel, surface or pole mounted (hardware included)

## Display

- Large display with scrolling menus for easy set up
- Transreflective display stays readable even in sunlight

## Data Management

- SD Card simplifies data download and transfer
- Update firmware via SD card or special RS232 cable

## Ultrasonic Flow Sensor

- Select primary gauging structure from the library of flumes and weirs for flow sensor set up or enter a flow curve for non-standard structure
- Non-contact flow sensor requires no routine maintenance
- Pulse echo technology

## Sensor Inputs

- Analog sensor modules may be added in the field
- Digital sensor ports are factory installed
- Controller will scan and detect new sensors added
- Works with GLI and Hach digital sensors

## Analog Inputs

- Enables non-sc analyzer monitoring
- Accepts mA signals from other analyzers for local display
- Consolidates analog mA signals to a digital output

## 4-20 mA Outputs

- Total of six (6) 4-20 mA outputs (2 std/4 optional) enables up to 3 mA outputs per sensor input

## Digital Communication

- MODBUS 232/485 and Profibus DP V1.0

## Ease of Use and Confidence in Results

- New display and guided calibration procedures reduce operator error
- Password protection to prevent tampering and unwanted programming changes
- Visual warning system provides critical alerts

## Specifications\*

### SC200 General Specifications

|                                  |                                                                                                                                            |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Display</b>                   | Graphic dot matrix LCD with LED backlighting. Transreflective                                                                              |
| <b>Display Size</b>              | 48 x 68 mm (1.89 x 2.67 in.)                                                                                                               |
| <b>Display Resolution</b>        | 240 x 160 pixels                                                                                                                           |
| <b>Height x Width x Depth</b>    | 144 x 144 x 181 mm (5.7 x 5.7 x 7.1 in.)                                                                                                   |
| <b>Weight</b>                    | 1.70 kg (3.75 lb)                                                                                                                          |
| <b>Power Requirements</b>        | 100 – 240 Vac $\pm 10\%$ , 50/60 Hz;<br>24 Vdc -15% + 20%                                                                                  |
| <b>Operating Temperature</b>     | -20 to 60°C (-4 to 140°F),<br>0 to 95% RH non-condensing                                                                                   |
| <b>Storage Temperature</b>       | -20 to 70°C (-4 to 158°F),<br>0 to 95% RH non-condensing                                                                                   |
| <b>Analog Output Signal</b>      | Two 0/4 to 20 mA isolated current outputs, max 500Ω                                                                                        |
|                                  | <i>Operational Mode</i><br>Primary or secondary measurement or calculated value (dual channel only)                                        |
|                                  | <i>Functional Mode</i><br>Linear, Logarithmic, Bi-linear, PID                                                                              |
|                                  | Optional 4 additional 4/20 mA isolated current outputs, max 500Ω @ 18-24 Vdc (customer-supplied power source)                              |
| <b>Security Levels</b>           | Two password protected levels                                                                                                              |
| <b>Enclosure Materials</b>       | Polycarbonate, Aluminum (powder coated), Stainless Steel                                                                                   |
| <b>Mounting Configurations</b>   | Wall, pole and panel mounting                                                                                                              |
| <b>Enclosure Rating</b>          | NEMA 4X / IP 66                                                                                                                            |
| <b>Conduit Openings</b>          | 1/2" NPT Conduit                                                                                                                           |
| <b>Relays</b>                    | Four electromechanical SPDT (Form C) contacts, 1200W, 5 A, 250 Vac                                                                         |
|                                  | <i>Operational Mode</i><br>Primary or secondary measurement, calculated value (dual channel only) or timer                                 |
|                                  | <i>Functional Mode</i><br>Alarm, Timer, Feeder Control, PWM or FM Control, System Alarm                                                    |
| <b>Digital Communication</b>     | MODBUS RS232/RS485,<br>Profibus DPV1 optional                                                                                              |
| <b>Memory Backup</b>             | Flash memory                                                                                                                               |
| <b>Electrical Certifications</b> | EMC: CE compliant for conducted and radiated emissions CISPR 11 (Class A limits), EMC Immunity EN 61326-1 (Industrial limits)              |
|                                  | Safety: General Purpose UL/CSA 61010-1 with cETLus safety mark                                                                             |
| <b>Data Logging</b>              | Secure Digital Card (Maximum recommended capacity 8 GB) or special RS232 cable connector for data logging and performing software updates. |

### UltraSonic Flow Sensor

|                                           |                                                                                                                                                                                                |

### Ultrasonic Flow Sensors

|                |                                      |
|----------------|--------------------------------------|
| <b>U53S010</b> | Ultrasonic sensor with 10 ft. cable  |
| <b>U53S030</b> | Ultrasonic sensor with 30 ft. cable  |
| <b>U53S100</b> | Ultrasonic sensor with 100 ft. cable |

### Power Cords

|                |                                                                   |
|----------------|-------------------------------------------------------------------|
| <b>9202900</b> | SC200 power cord with strain relief, 125 Vac                      |
| <b>9203000</b> | SC200 power cord with strain relief, 230 Vac, European-style plug |

### Accessories

|                      |                                                        |
|----------------------|--------------------------------------------------------|
| <b>9220600</b>       | SC200 Weather and Sun Shield with UV Protection Screen |
| <b>8809200</b>       | SC200 UV Protection Screen                             |
| <b>1000G3088-001</b> | Weather Protection Cover                               |
| <b>9218200</b>       | SD card reader (USB) for connection to PC              |
| <b>9218100</b>       | 4 GB SD card                                           |
| <b>9012700</b>       | Flow Module                                            |
| <b>9013100</b>       | Module for 4 additional analog mA out (passive)        |
| <b>9013200</b>       | Modbus module                                          |
| <b>YAB104</b>        | Profibus DP kit                                        |
| <b>LZX887</b>        | Data com cable                                         |
| <b>3004A0017-001</b> | Flow sensor mounting kit                               |
