-  **Screen Snooze Button** - Press to turn OFF your display.

Easy Filter Installation Guide

Filter Placement / Replacement Instructions

Pre-installation note: it is recommended that the fan is laid down on a flat surface while placing or replacing your fan filter.

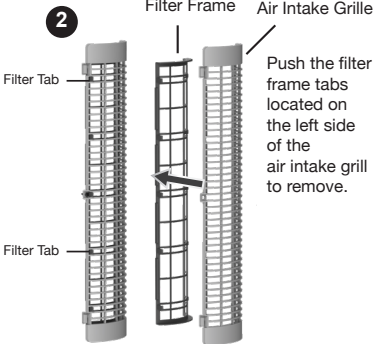

1

Remove the safety screw from the air Intake grill using a phillips-head screwdriver.

Press the top and bottom tabs then pull up to detach the air intake grill from the fan body.

2

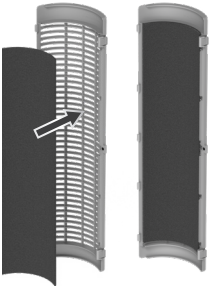

Filter Frame

Air Intake Grille

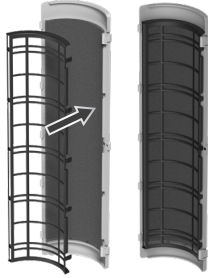

Push the filter frame tabs located on the left side of the air intake grille to remove.

3

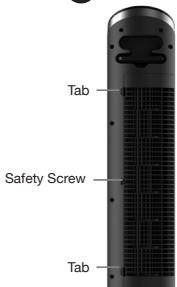

Place the filter inside of the air intake grille.

4

Install the Filter Frame to the air intake grille by aligning the arrows on the top of each part and snapping the filter tabs into the air intake grille.

5

Reattach the air intake grille to the rear of the body of the fan. Align the tabs as shown above. Reinstall the safety screw on the back.
