ETHERNET DAISY CHAIN - ONE CABLE, MANY CONNECTIONS

The **ND31PLUS** is equipped with **2 x RJ45 Ethernet ports** that support daisy chain topology — enabling serial connection of Ethernet devices without the need for network switches between them.

What does this mean in practice?

- Saves panel space — no need to install industrial switches,
- Reduces cabling and hardware costs — only one connection between devices,
- Faster installation and fewer errors — simplified wiring,
- Easy system expansion — new devices can be added without modifying the existing infrastructure,
- Improved cabinet organization — fewer cables result in a cleaner setup.
