

Molle Panels

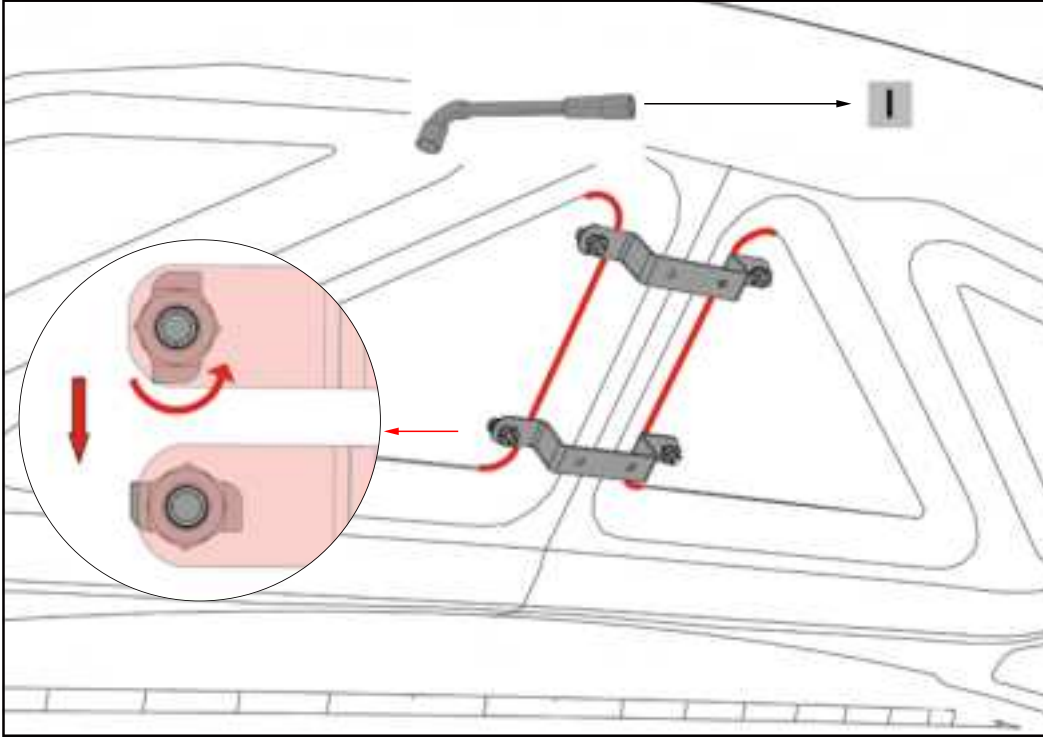

Installation Instructions

Installation position diagram

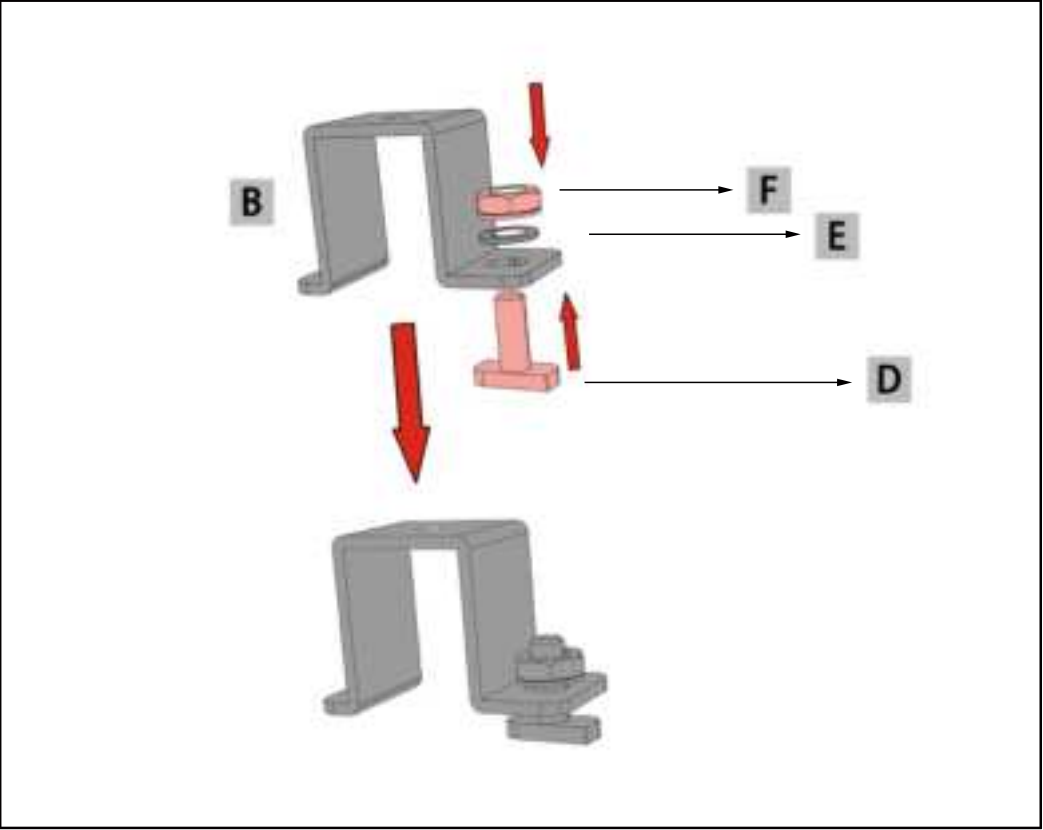

1. Install the accessories C,D,E,F as shown in the diagram (Note: Do not tighten the screws).

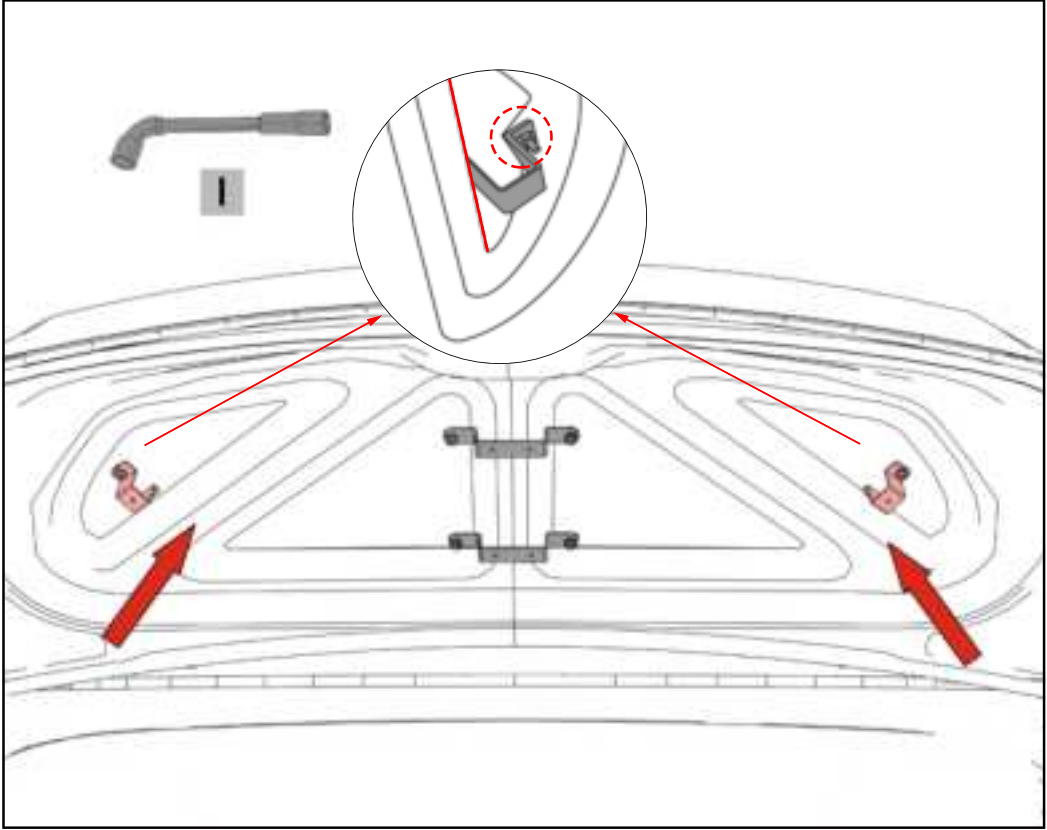

2. As shown in the diagram, fix the installed accessories inside the hood (insert one end of the T-bolt into the gap), adjust the position, and use tools to secure the nut in place.

Molle Panels

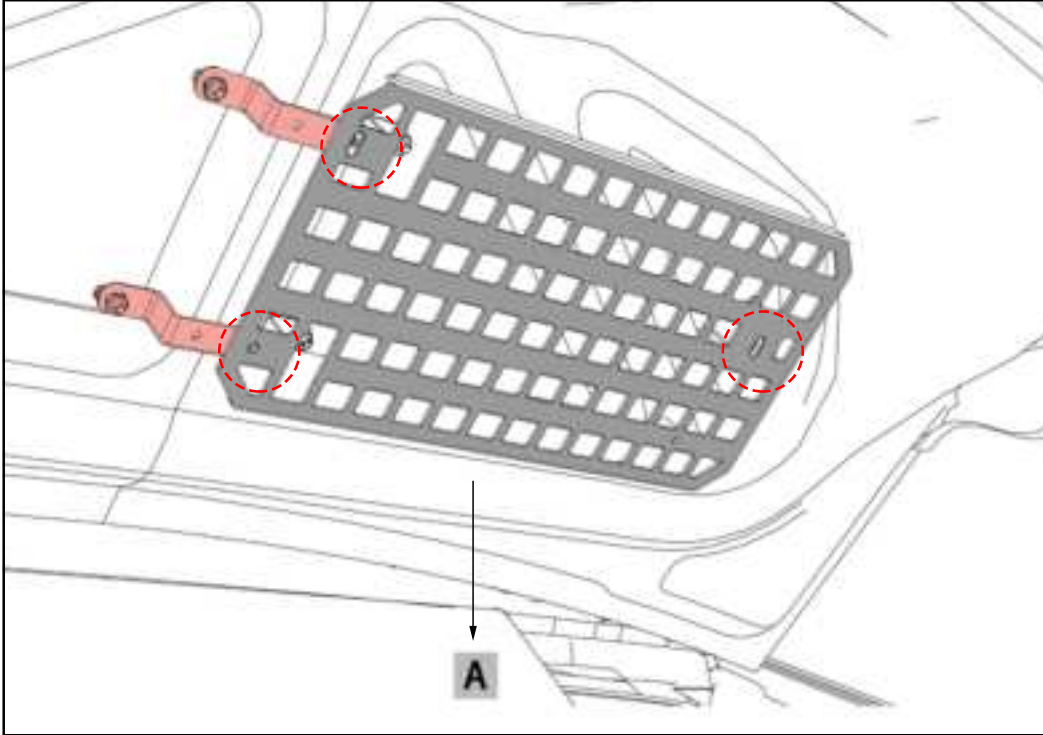

Installation Instructions

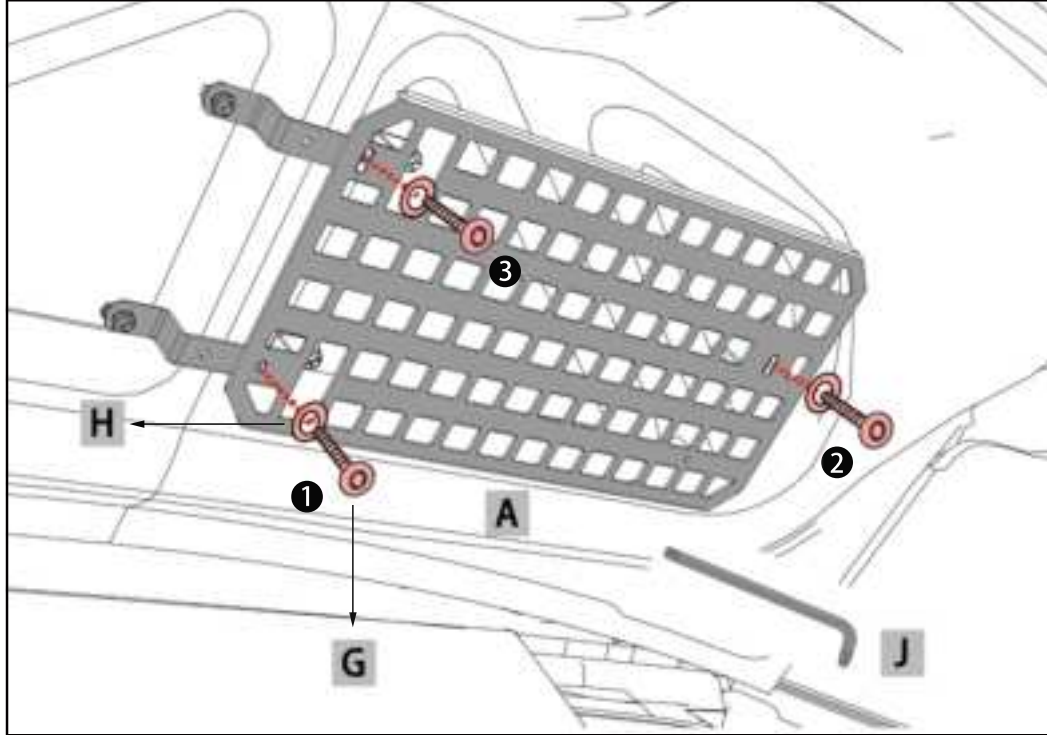

3. Install the accessories B,D,E,F as shown in the diagram.
(Note: Do not tighten the screws).

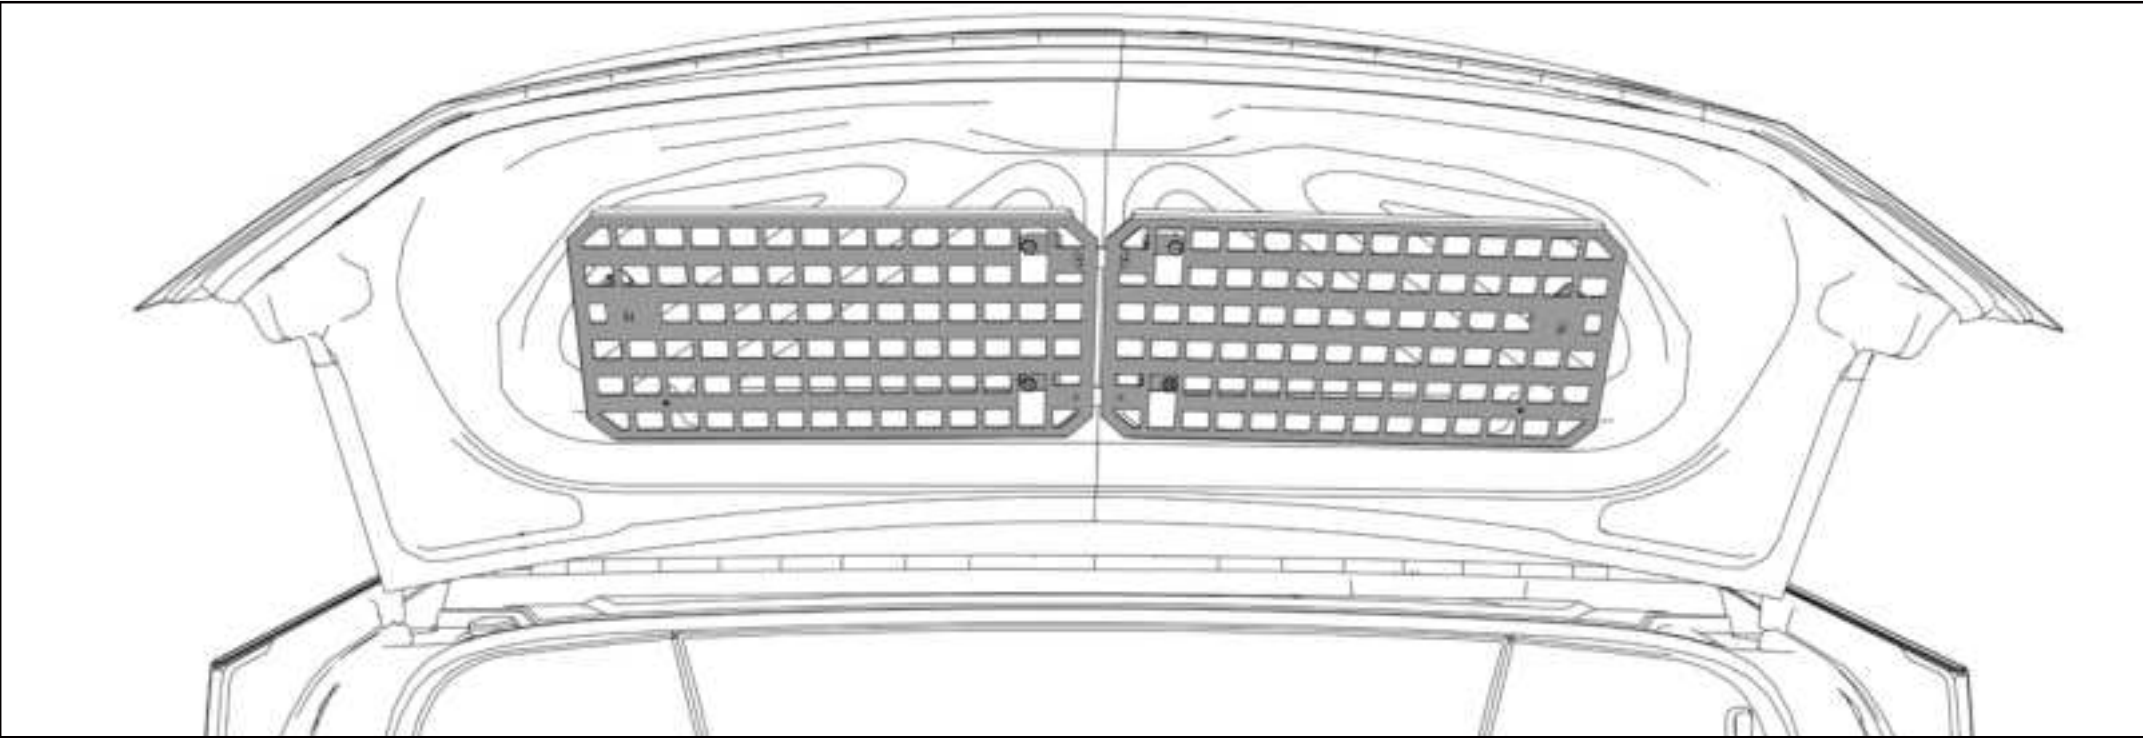

4. As shown in the diagram, fix the installed accessories to both sides inside the hood (insert one end of the accessory into the gap and the T-bolt into the round holes on both sides), adjust the position, and use tools to secure the nut.

5.As shown in the diagram, align the molle panel on the right with the holes.

6.After aligning the holes, install the screws and washers in sequence as 1, 2, 3. Once the position is adjusted, use tools to tighten the screws.

7.Install the molle panel on the left side in the same manner.
